TOWN MEETINGS.

ANNUAL TOWN MEETING

Commonwealth of Massachusetts

Barnstable, ss.

To either of the Constables of the Town of Barnstable, Greeting.

In the name of the Commonwealth of Massachusetts you are hereby directed to notify and warn the inhabitants of the Town of Barnstable qualified to vote in Town affairs and elections to meet as follows:

- Precinct 1. Barnstable, Masonic Hall.
- Precinct 2. West Barnstable, Town Office.
- Precinct 3. Hyannis, Masonic Hall
- Precinct 4. Centerville, Howard Hall.
- Precinct 5. Osterville, Union Hall.
- Precinct 6. Marstons Mills, Village Hall.
- Precinct 7. Cotuit, Freedom Hall

in said precincts on Monday the sixth day of March A. D. 1911.

The polls will be opened at 5.45 o'clock in the forenoon and may be closed at twelve o'clock noon, then and there to act on the following:

Art. 1. To choose Moderator for the subsequent meeting, Town Clerk, Town Treasurer, Collector of Taxes, Three Selectmen and Three Overseers of Poor to serve for one year, One Assessor of Taxes for three years. Three Auditors for one year, One School Committee for three years, Three Surveyors of Highways for one year, Constables, Tree Warden, One Member of the Board of Health for three years, Three Fence Viewers for one year, and for any other officer whose name may legally appear on the official ballot; also to vote on the question: Shall license be granted for the sale of intoxicating liquors in this Town?

Agreeable to the foregoing warrant a large number of voters, despite the severe snow storm, assembled at the places named in the warrant and the following votes were cast:

Moderator, Annual Meeting, 1911

A. D. Hall had,	1 “

For License

Yes,	305 votes
No,	398 “

For Chapter 209, Acts of 1908

Yes,	368 votes
No,	62 “

In accordance with the call in the foregoing warrant for the subsequent meeting a very large number of the voters and about fifty ladies gathered at the Town House on Tuesday March 7, 1911. The meeting was called to order promptly at 9 o'clock by the Town Clerk and the warrant read, after which the result of the previous day's vote was announced. The Town Clerk also declared that by the vote of the previous day the following officers had been elected, viz:—

Moderator—Thomas Pattison.

Town Clerk and Treasurer, One Year—John C. Bearse.

Selectmen, Overseers of the Poor and Fence Viewers, One Year—Alexander G. Cash, Edgar W. Lovell, Howard N. Parker.

Assessor, Three Years—Edgar W. Lovell.

School Committee, Three Years—Zebina H. Jenkins.

Collector of Taxes, One Year—Jacob P. H. Bassett.

Auditors, One Year—John Bursley, Albert F. Edson, Edward C. Hinckley.

Surveyors of Highways, One Year—William A. Jones, Wendell F. Nickerson, Joyce Taylor.

Tree Warden, One Year—Harry W. Bodfish.

Board of Health, Three Years—Charles E. Harris.

Constables, One Year—Samuel N. Ames, Jacob P. H. Bassett, John S. Bearse, Benjamin E. Blossom, Alexander S. Childs, James F. Crowell, George F. Hart, Maurice R. Phinney, Theodore V. West, Everett Childs, Marcus Harris, Geo. Backus, Gustavus Nickerson, George Lewis, Maurier Crocker John W. Lewis, John F. Lewis, Clarence L. Baker, A. D. Hall.

For License—No.

For Chapter 209, Acts of 1908—Yes.

Thomas Pattison was then sworn as Moderator by the Town Clerk, who had previously qualified, and took charge of the meeting and the following business was transacted:

Art. 2. To elect all other necessary Town Officers for the ensuing year.

Voted that the following Officers be elected for the ensuing year:

Agent of Cobb Fund—David Davis.

Measurers of Wood and Bark—Timothy Crocker, Emilo R. Silva, M. Raymond Harlow.

Surveyors of Lumber—Charles C. Crocker, Isaiah C. Sears, Charles L. Baxter.

Sealer of Leather—Daniel B. Snow.

Deer Reeve—John J. Harlow.

Pound Keepers—Thomas W. Jones, W. F. Ormsby, J. R. Crosby, W. B. Cammett.

Field Drivers—Lawrence D. Hinkley, Theodore V. West

Art. 3. To hear and act upon the report of the various Town Officers; also to hear the report of any Committees and to take such action in regard to such as may be deemed expedient.

Voted that the report of the various Town Officers as printed, be accepted. The following report of the Committee on Common Field Bridge was read and accepted:

Your committee appointed to build the reinforced concrete bridge at Common Fields beg leave to report that they contracted with the Fred T. Ley Co., of Springfield, Mass., to build the bridge complete according to plans and speci-

cations approved by your committee, for \$4000.00. This bridge was not accepted by the committee until April 1910. The Committee sold some old material for \$20.00 and the bridge has cost the town \$3980.00.

Respectfully submitted,

FRANK H. HINCKLEY,
JOSEPH W. TALLMAN,
ZEBINA H. JENKINS.

The Committee on Grand Island Bridge reported with recommendations that the Town build a new bridge, it being unwise to repair the present bridge. This report was accepted.

Art. 4. To receive and act upon the accounts of all persons to whom the Town is indebted.

Voted that the following bills be accepted and paid:

Z. H. Jenkins, expenses on Common Field Bridge Committee,	\$21 50

James F. Crowell, Constable services, at Town Meeting,	2 00
Alexander S. Childs, Constable services, at Town Meeting,	2 00

Voted to consider Articles 5, 7 and 9, together.

Art. 5. To see what sums of money the Town will raise and appropriate for the ensuing year for the following purposes, viz: Support of Poor, Repairs on Roads, Bridges, Support of Schools, Repairs on School Houses, Repairs to Town Buildings, Burial Grounds, Tombs, Wells, etc., Printing, Interest, Taxes Remitted, Town Officers, Miscellaneous Expenses, Text Books and Supplies, Transportation of Scholars, Labor on Trees, Soldiers' Relief, Snow Bills, Contingent Expenses, Election Expenses, Suppression of Gypsy and Brown-tail Moth, State Aid, Military Aid, and for any other legal purpose.

Voted to raise and appropriate the following amounts:

Support of Poor,	\$6,000 00
Soldiers' Aid,	300 00
Printing,	600 00
Town Officers,	3,500 00
Miscellaneous,	1,800 00
Contingent Expenses,	250 00
Repairs on Town Property,	1,700 00
Election Expenses,	600 00
Interest,	4,500 00
Memorial Day,	225 00
Moth Work,	400 00
Tree Warden,	500 00
School Purposes,	23,200 00
School Supplies,	1,600 00
School Transportation,	4,500 00
School Repairs,	2,500 00
Collector's Fees and Taxes Remitted,	1,500 00
Snow,	2,000 00
Repairs on Roads,	8,500 00

Stone Road Notes,	\$10,500 00
Repairs on Bridges,	700 00
Practice and Model School Notes and Bonds,	1,150 00
West Barnstable School Notes,	500 00
Elizabeth Lowell School Notes,	1,000 00
High School Notes,	1,500 00
School Physician,	150 00

Art. 6. To see if the Town will vote to authorize the Town Treasurer with the approval of the Selectmen to borrow money from time to time in anticipation of taxes of the present municipal year to an amount not to exceed in the aggregate sixty-five thousand dollars (\$65,000) and to issue a note or notes therefor payable within one year any debt or debts incurred under this vote to be paid from the taxes of the present municipal year.

Voted that the Town Treasurer, with the approval of the Selectmen, be and hereby is authorized to borrow money from time to time in anticipation of taxes of the present municipal year, to an amount not exceeding in the aggregate Sixty-five Thousand (\$65,000.00) Dollars, and to issue a note or notes of the Town therefor, payable within one year, any debt or debts incurred under this vote to be paid from the taxes of the present municipal year, Yes 175; No 0.

Art. 7. To see if the Town will vote to raise and appropriate a sum of money for Memorial day.

Taken up and disposed of in connection with Article No. 5.

Art. 8. To see if the Town will vote to authorize the Selectmen to make such leases as in their opinion will be for the best interest of the Town, and to confirm all leases heretofore given.

Voted that the Selectmen be authorized to make such leases as in their opinion will be for the best interest of the Town and to confirm all leases heretofore given.

Art. 9. To see if the Town will vote to raise and appropriate the sum of eleven hundred and fifty dollars (\$1,150) to apply to the practice and model school sinking fund, the sum of five hundred dollars (\$500) to apply to payment of West Barnstable school house note, the sum of one thousand dollars (\$1000) to apply to payment of the Elizabeth Lowell High school note, the sum of fifteen hundred dollars to apply to payment of High school note (\$1500), the sum of ten thousand five hundred dollars (\$10500) to apply to payment of stone road notes.

Taken up and disposed with, in connection with Article No. 5.

Art. 10. To see if the Town will vote to elect one or more Surveyors of Highways at the next annual Town Meeting and to act fully thereon.

Voted to elect one Surveyor of Highways at the next annual meeting.

Art. 11. To see if the Town will vote to raise and appropriate, or to issue its notes, bonds or script, for a sum of money not to exceed twenty thousand dollars (\$20,000) for the purpose of building a new school building in the Village of Osterville, or to take any action in relation thereto or in reference to the establishment of a sinking fund, in order to provide for the payment of such indebtedness at maturity, and to take any action as to appointment of building committee, etc.

Voted that the Town issue its Notes, Bonds or Script for Fourteen Thousand Five Hundred (\$14,500.00) Dollars for the purpose of building a new four room School House of Brick or Tile construction in the Village of Osterville, Yes 144; No 0. E. S. Crocker was elected to serve with the School Committee to act as a building committee.

Art. 12. To see if the Town will raise and appropriate a sum of money not to exceed fifteen hundred dollars for the purpose of purchasing a lot of land on West Bay road, Village of Osterville, said lot now owned by James A. Lovell, the said lot to be used for the proposed new school building and that the Board of Selectmen be authorized to purchase said lot, and to act fully thereon.

Voted that the sum of \$1,500.00 be raised and appropriated for the purchase of the lot of land described in this article and that the Selectmen be authorized to purchase the same at this price.

Art. 13. To see if the Town will vote to accept the report of the Selectmen as to the layout of Guimaquessett Avenue (so called) in the Village of Cotuit and to raise and appropriate a sum of money therefor.

Voted that the report of the Selectmen on the laying out of this Guimaquessett Avenue be accepted and that \$500.00 be raised and appropriated for working this road. For the report of the Selectmen see Book 12, Page 354.

Art. 14. To see if the Town will raise and appropriate the sum of two thousand dollars (\$2,000) for the purpose of putting in a basement and sanataries in the Centerville Grammar School, or to issue its notes, bonds or script for same. (By request).

Withdrawn.

Art. 15. To see if the Town will vote to increase the salary of Town Clerk to two hundred and fifty dollars (\$250) per year and to increase the salary of the Town Treasurer to seven hundred and fifty dollars (\$750) per year or take any action in relation thereto. (By request).

Voted unanimously to pay the Town Clerk a salary of \$250.00 per year and also unanimously to pay the Town Treasurer a salary of \$750.00 per year.

Art. 16. To see if the Town will vote to elect the Constables for the term of three years each and to act fully thereon. (By request).

Indefinitely postponed.

Art. 17. To see if the Town will vote to raise and appropriate a sum not exceeding three hundred dollars (\$300) for the purpose of indexing the vital statistics of the Town in the manner as suggested by the Town Clerk or to take any action in relation thereto. (By request).

Voted to raise and appropriate the sum of \$300.00 for the purpose of indexing the Vital Statistics records, in the manner suggested by the Town Clerk.

Art. 18. To see if the Town will vote to issue its notes, bonds or script in order to raise the sum of six thousand dollars (\$6,000), and place the same in the hands of the Mass. Highway Commission provided they will agree to appropriate a like amount or more, for the purpose of building a piece of Macadam road on the North side of the Town of Barnstable, commencing at the East end of the present State Road at Barnstable, or to take any action in relation thereto, or in reference to the establishment of a sinking fund, in order to provide for the payment of such indebtedness at maturity. (By request).

Voted that the Town issue its notes, bonds or script for Six Thousand (6,000.00) Dollars and place this amount in the hands of the Massachusetts Highway Commission, provided they will agree to appropriate a like amount or more, for the purpose of building a piece of Macadam road on the North side of the Town, commencing at the East side of the

present State road at Barnstable. Yes 141; No 0.

Art. 19. To see if the Town will vote to issue its notes, bonds or script in order to raise and appropriate the sum of five thousand dollars (\$5,000) for the purpose of building a piece of Macadam road in the Village of Osterville leading from Twombly corner (so called) along East Bay Avenue on the shore road to Wianno Avenue, and to act fully thereon, or in reference to the establishment of a sinking fund in order to provide for the payment of such indebtedness at maturity. (By request).

Indefinitely postponed.

Art. 20. To see if the Town will vote to raise and appropriate the sum of three hundred dollars to be used for a new sidewalk in village of West Barnstable.

No action taken under this article. A motion to raise and appropriate \$300.00 for this purpose, was voted down.

Art. 21. To see if the Town will vote to raise and appropriate or issue its notes, bonds or script in order to raise the sum of five thousand dollars (\$5,000) or take any action as to the establishment of a sinking fund in order to pay for such indebtedness at maturity, above sum to be used for the purpose of completing the stone road leading from Centerville to West Barnstable, either on the present road or on any re-location of said road that may be directed by the County Commissioners and to act fully thereon. (By request).

Voted that the sum of two thousand dollars (2,000.00) be raised and appropriated and that three thousand dollars (3,000.00) be raised by issuing notes, bonds or script of the Town, for the purpose of completing the Centerville and West Barnstable road so-called. This amount to be used for grading and stoning the road from where the stone road now terminates thence about 200 feet on the Whelden road so-called, to the old County road, thence as shown on the blueprint to the Stone road intersecting with the Cotuit and Osterville stone road at or near the West Barnstable church, Yes 89; No 0.

Art. 22. To see if the Town will vote to accept the report of the Selectmen on the re-location of a part of the road leading from Cotuit to Rushy Marsh (so called) and to act fully thereon.

Indefinitely postponed.

Voted to consider Articles 23 and 24 together.

Art. 23. To see if the Town will raise and appropriate the sum of twenty-five hundred dollars (\$2500) for the purpose of building a piece of Macadam road leading from Irving Avenue over Hawthorne Avenue to Squaws Island in the village of Hyannisport. (By request).

Art. 24. To see if the Town will vote to issue its notes, bonds, or script in order to raise the sum of twenty-five hundred dollars (\$2500) for the purpose of building a piece of Macadam road leading from Irving Avenue over Hawthorne Avenue to Squaws Island, in the village of Hyannisport, or to take any action in relation thereto, or in reference to the establishment of a sinking fund in order to provide for the payment of such indebtedness at maturity. (By request).

A motion to issue notes, bonds or script of the Town for \$2,500.00, for the purpose of building this piece of road was lost, it not being passed by a two-thirds vote.

Art. 25. To see if the Town will vote to build a stone road from the residence of F. D. Cobb to the residence of Collins Clark in the village of Barnstable, or any portion of the same, and either appropriate a sum of money sufficient therefor or issue its notes, or bonds to pay for the same. (By request).

There was some discussion, but no action taken on this Article.

Art. 26. To see if the Town will vote to construct a stone road at Hyannisport as follows: Commencing at the end of the present stone road at the corner of Wachusett and Scudder avenue in a northerly direction over Scudder avenue to the main or direct road leading from Hyannis to Craigville, and to appropriate a sum of money for the same. (By request).

Voted that three thousand dollars (3,000.00) be raised and appropriated for the purpose of building this piece of road.

Art. 27. To see if the Town will vote to adopt the following by-law: That no person shall barter, or trade, and collect junk without a license from the Selectmen of the Town.

Voted that the Town adopt the following By-Law:

No person shall barter or trade and collect junk without a license from the Selectmen of the Town. Unanimously adopted.

Art. 28. To see if the Town will vote to instruct the Surveyor, or Surveyors of Highways that whenever oyster or other shells are placed upon the Highways of the Town that the same shall be rolled smoothly and made safe for the passage of horses and automobiles. (By request).

Voted that this matter be left with the Surveyors of Highways, but that they be recommended to use the Roller after putting shells on the road, when it was practicable to do so.

Art. 29. To see if the Town will raise and appropriate the sum of four hundred dollars (\$400) to purchase an oil road-cart, and to act fully thereon.

Withdrawn.

Art. 30. To see if the Town will vote to raise and appropriate a sum not to exceed five thousand dollars (\$5000), said amount appropriated to be used for oiling and resurfacing the stone roads.

Voted that five thousand dollars (\$5,000.00) be raised and appropriated for this purpose.

Art. 31. To see if the Town will vote to purchase one or more equipped forest fire wagons similar to those recommended by the State Forestry Department and appropriate a sum of money therefor. (By request).

Voted that \$350.00 be raised and appropriated for the purpose of purchasing such Fire Extinguishers as are recommended by the State Forester and that they be purchased by the Selectmen and Forester of the Town.

Art. 32. To see if the Town will make any recommendation or adopt any resolution concerning the moth work or take any action relating thereto. (By request).

Indefinitely postponed.

Art. 33. To see if the Town will make any recommendation or adopt any resolution concerning inspectors and inspection or take any action relating thereto. (By request).

Voted that the Board of Health be requested to see to it that the inspection of slaughtered animals be in full conformity with the requirements of the law.

Art. 34. To see if the Town will vote to raise and appropriate a sum of money not to exceed one hundred dollars (\$100) for the purpose of putting a well in the cemetery at Cummaquid. (By request).

Voted that \$50.00 be raised and appropriated for this purpose.

Art. 35. To see if the Town will vote to raise and appropriate, or to issue its notes, bonds or script to raise a sum of money not to exceed fifteen thousand dollars (\$15,000) for the purpose of building a bridge in village of Osterville known as the Grand Island bridge or to take any action as to the establishment of a sinking fund in order to provide for the payment of such indebtedness at maturity and to act fully thereon.

Voted unanimously to issue notes, bonds or script of the Town for fourteen thousand dollars (14,000.00) for the purpose of building a Concrete bridge in the Village of Osterville, know as the Grand Island bridge, and that a committee of three be appointed to act with the Surveyors of Highways in building said bridge.

The following were appointed as a committee to act with the Surveyors of Highways: E. S. Crocker, Chester Bearse, John Bursley.

Art. 36. To know if the Town will instruct the Tree Warden to destroy the caterpillar nests near the highways throughout the town and raise and appropriate a sum of money not to exceed one hundred dollars and to act fully thereon.

Voted that the Tree Warden be instructed to destroy the caterpillar nests near the highways throughout the Town and that \$100.00 be raised and appropriated for this purpose.

Art. 37. To see if the Town will adopt the plan of paying off its employees once in every two weeks. (By request).

Voted that recommendations be made to the Town Officers that they were not complying to the law in paying off the employees, which law required them to pay every week.

Art. 38. To see if the Town will instruct its Selectmen in the future not to grant any citizen an oyster grant for the purpose of selling right to any person or persons, but if said person holding said grant does not improve said grant within two years that the said grant be forfeited to the town, and that no citizen holding a grant be permitted to have any person or persons not a citizen of the town of Barnstable having any interest in any oyster grant in the town of Barnstable in whatsoever shape or form, and in case of

an application for a grant, that person not already holding a grant be given the preference and that no person holding a grant be given any more grant unless there be no other application for same. (By request).

Indefinitely postponed after a long discussion.

Art. 39. To see if the Town will vote to authorize and instruct the Board of Selectmen to lease to the East Parish Congregational Society for a term of ninety-nine years, at a nominal rental, the interest of the town, if any, in the lot of land east of and adjoining land of said Society in the Village of Barnstable. (By request).

Indefinitely postponed.

Art. 40. To see if the Town will appoint a committee of three, five, seven or nine as a special Taxation Committee to act with the Board of Assessors, and to instruct or request such joint committee and said Board to make a full and complete valuation of all property in Barnstable to be assessed in 1911. (By request).

Voted that a committee of three be appointed by the Moderator, to report at this meeting or any adjourned meeting thereof, the names of a committee of nine to be called a taxation committee, who shall make a full and complete valuation of all property in the Town of Barnstable subject to taxation, and report such valuation to the Board of Assessors. Yes 114; No 0.

The following committee was appointed by the Moderator: C. C. Paine, B. F. Sears, F. H. Hinckley.

This committee brought in at the adjourned meeting the names of the following, who were elected as the Taxation Committee:

E. F. Maher of Hyannis, L. F. Paine of Hyannisport, A. S. Crosby of Centerville, Marcus N. Harris of Barnstable, John Bursley of West Barnstable, Ulysses A. Hull of Cotuit, J. M. Leonard of Osterville, S. Fremont Crocker of Marstons Mills, Charles L. Gifford of Cotuit.

It was voted that this committee be empowered to fill any vacancy and that they be sworn to the faithful discharge of their duties.

The Town Constable business was sold at auction by the Moderator to John S. Bearse for \$50.00.

Voted that the Town Clerk be instructed to publish in the next Town Report the doings of the Annual and any Special meetings held during the year, also an itemized list of assessments.

The following Resolutions were adopted:

Resolved, that this meeting vote to instruct our Representative and Senator to vote against the bill relating to seining off Barnstable, now before the House of Representatives.

Resolved, that we the citizens of the Town of Barnstable in Town Meeting assembled, earnestly request the Selectmen to avoid as far as practicable the calling of Special Town Meetings and that when such a special meeting is required by law it shall if possible be called for some hour during the regular annual Tuesday meeting in March, and further that notice of such meetings and any other legal advertising be published in all the local papers.

Resolved, that it be the sense of this meeting that all property in the Town of Barnstable, subject to taxation, be assessed at its full and fair market value and that the committee of nine or Taxation Committee so-called, be empowered to have access to all Town Records, the use of Town Offices and to advise with and make recommendations to the Board of Assessors to bring about such assessment.

The foregoing business was not all transacted on March 7, a part of it was transacted at the adjourned meeting which was held on Saturday, March 11. It is written up by articles to be more accessible.

The meeting then extended a vote of thanks and \$10.00 to Thomas Pattison for his services as Moderator and then adjourned.

Attest,

J. C. BEARSE,

Town Clerk.

SPECIAL TOWN MEETING

Commonwealth of Massachusetts

Barnstable ss.

To either of the Constables of the Town of Barnstable, Greeting.

In the name of the Commonwealth of Massachusetts you are directed to notify and warn the inhabitants of the Town of Barnstable qualified to vote in Town affairs and elections to meet at the Town House on Wednesday, April 26th, 1911, at two o'clock P.M. then and there to act on the following articles:

Article 1. To choose a Moderator to preside over said meeting.

Agreeable to the foregoing warrant about one hundred of the qualified voters of the Town of Barnstable met at the time and place mentioned in said warrant. The meeting was called to order promptly at two o'clock by the Town Clerk, the warrant was read after which Edward L. Chase was unanimously elected as Moderator, sworn by the Town Clerk and took charge of the meeting.

Article 2. To see if the Town will vote to reconsider the vote whereby they voted for one Surveyor of Highways and to act fully thereon.

Indefinitely postponed.

Article 3. To see if the Town will take any action relative to repairs on the State road in Hyannis and provide a sum of money therefor, and to act fully thereon.

Voted that the Town Treasurer, with the approval of the Selectmen be instructed to issue a note of the Town for (\$500.00) five hundred dollars, said note to be payable within the present year, this amount to be placed in the hands of the Massachusetts Highway Commission, provided they will allot an equal sum to be used for the purpose of thoroughly repairing and oiling the State road in Hyannis Main street and properly draining said street, and that Joyce Taylor be appointed a committee to confer with the Massachusetts Highway Commission regarding this. Yes 39; No 4.

Article 4. To see if the Town will vote for the Board of Selectmen to sign an agreement to indemnify the Commonwealth against claims for land and grade damages which may result from the laying out and construction of the proposed State road leading from West Barnstable to Barnstable and to act fully thereon

Voted that the Selectmen be instructed to sign an agreement to indemnify the Commonwealth against claims for land and grade damages which may result from the laying out and construction of the proposed State road leading from West Barnstable to Barnstable.

Article 5. To see if the Town will vote to instruct the Board of Selectmen to waive all rights which the Town may have under the provisions of Sec. 10, Chapter 47, Revised Laws, to enter into a contract for the construction of a section of State highway which the Commonwealth proposes to construct in this Town this year, and to act fully thereon.

Voted that the Board of Selectmen be instructed to waive all rights which the Town may have under the provisions of Sec. 10, Chap. 47, Revised Laws, to enter into a contract for the construction of a section of State Highway, which the Commonwealth proposes to construct in this Town this year.

Article 6. To see if the Town will vote to accept the provisions of the Act of the Legislature approved April 14, 1911, entitled An Act to incorporate the Barnstable Water Company.

After quite a discussion by the voters on both sides of this question it was voted that the Town accept Chapter 286 of the Legislative Acts of the year 1911, approved April 14, 1911, being entitled, "An Act to incorporate the Barnstable Water Company." Yes 48; No 32.

With a vote of thanks to the Moderator the meeting adjourned.

Attest,

J. C. BEARSE,

Town Clerk.

SPECIAL TOWN MEETING

Barnstable ss.

To either of the Constables of the Town of Barnstable, in said County, Greeting.

In the name of the Commonwealth of Massachusetts, you are directed to notify the inhabitants of the Town of Barnstable qualified to vote in elections and Town affairs to meet at the Town House in said Barnstable on Tuesday the seventeenth day of October, 1911, at two o'clock P. M. then and there to act on the following articles:

Article 1. To choose a Moderator to preside in said meeting.

Agreeable to the foregoing warrant about sixty of the voters of the Town assembled at the Town House and the following business was transacted:

The meeting was called to order promptly at two o'clock by the Town Clerk, and the warrant read, B. F. Sears was unanimously chosen Moderator, sworn by the Town Clerk and took charge of the meeting.

Article 2. To see if the Town will vote to raise and appropriate or borrow any further sums of money for the purpose of completing the new school building in the Village of Osterville, or to take any action in regard thereto or to authorize the Treasurer with the approval of the Board of Selectmen to issue bonds, notes or script to raise funds for the above purpose, and to act fully thereon.

J. M. Leonard, Esq., of Osterville explained to the meeting the reason of its being called and that more money would be needed in order to build the school house in Osterville. After a short discussion it was unanimously voted that the whole matter be deferred until the next annual meeting in March.

With a vote of thanks to the Moderator the meeting adjourned.

Attest,

J. C. BEARSE,

Town Clerk.

MILK INSPECTOR'S REPORT.

Marstons Mills, Jan. 29, 1912

To the Board of Health of Barnstable:

Gentlemen:—

A new law having gone into effect, has caused much more work to be done.

Thus far, I have made 268 dairy inspections, and have issued 117 licenses.

Of the samples of milk that I have tested, 25 per cent. quality. While the number of samples testing low may seem large, I will say that the most of the milk testing low, I found in two dairies.

I tested the milk from one of the dairies twice; and in both instances found it to be below the standard. After the second test, according to the law, that man was liable to prosecution; but from the instructions that I had received from you, I thought that you preferred to have the quality of the milk in town made better by educating and helping the dairymen, rather than by prosecution. I then took the matter up with the dairyman, as he asked for my help. I then tested the milk from several of his cows, and found those giving the poor milk.

He sold one cow to the butcher, and bought two, whose milk I know tests well above the standard.

This seems a much better way to get good milk from that dairy, than to prosecute the dairyman.

The second case was along similar lines.

Aside from these two cases the quality of the milk sold in town has been very satisfactory.

In regard to the cow stables in town I will say that they are in a much more sanitary condition than ever before, and are being kept so.

Very respectfully,

GEORGE T. MECARTA,

Milk Inspector.

FOREST WARDEN'S REPORT

REPORT OF COMMITTEE ON TAXATION.

To the Citizens of Barnstable:

On petition of fifty voters of the town, the following article appeared in the warrant issued prior to the last annual meeting. "To see if the town will appoint a committee of three, five, seven, or nine as a Special Taxation Committee, to act with the Board of Assessors, and to instruct or request, said joint committee and said Board to make a full and complete valuation of all property in Barnstable to be assessed in 1911."

At the said annual meeting the following vote was passed: "That a committee of three be appointed by the moderator to report at this meeting or at any adjournment thereof, the names of a committee of nine to be called a 'taxation committee,' who shall make a full and complete valuation of all property in the town of Barnstable subject to taxation and report such valuation to the assessors."

The following gentlemen were appointed by the moderator: Charles C. Paine, Esq., F. H. Hinckley and Benj. F. Sears. At the adjourned meeting the following names were reported by the committee: Edward F. Maher, Temp. Ch., Ulysses A. Hull, Marcus N. Harris, J. M. Leonard, S. Fremont Crocker, L. Frank Paine, Aaron S. Crosby, John Bursley, Charles L. Gifford. The gentlemen named were unanimously elected, and it was voted that the committee be empowered to fill any vacancy in the committee, and be sworn to their duties.

At the said annual meeting, the following resolution was unanimously adopted: "Resolved that it is the sense of this meeting that all property in the town of Barnstable

subject to taxation, be assessed at its full and fair market value, and that the committee of nine or Taxation Committee, so called, be empowered to have access to all town records, the use of the town offices, and to advise with and make recommendations to the board of Assessors to bring about such assessment."

The Taxation Committee met at the Town Office March 28, 1911, and organized as follows: Chairman, Edward F. Maher, Secretary, Charles L. Gifford. Vacancies caused by resignation of J. M. Leonard and S. Fremont Crocker, and by the absence in California of Marcus N. Harris, were filled by the appointment of Henry C. Davis, Andrew W. Lawrence and Ira L. Hinckley.

The following principles of taxation were adopted by the Committee: "That the amount of tax paid on personal property, shall not affect the value to be assessed on the real estate to be taxed to the same individual." That our problem is not "What ought a particular citizen to pay?" but solely "What amount of property is there to be assessed and what is its full and fair market value?" "That since the law directs and enforces the assessment of estates of people who are dead at full valuation, and as we must thus use the full size yard-stick in the case of property which may be the sole support of widows and orphans, we cannot in fairness be more lenient in other cases." "That one thing is self evident," "that never in this Commonwealth under any law will it be allowed that the holders of large amounts of property shall be taxed on a lower basis than the holders of smaller amounts of similar property."

"That the principles employed by the Committee be made public through the medium of the local press."

It was voted in the Committee that all parcels of real estate valued at \$10,000 or more, be inspected by the full committee, and that the following members serve as special committees in assessing the property in the several precincts:

I. Barnstable—Henry C. Davis, John Bursley, Edw. F. Maher, L. Frank Paine.

II. West Barnstable—John Bursley, Andrew W. Lawrence, Aaron S. Crosby.

III. Hyannis—Edw. F. Maher, L. Frank Paine, Aaron S. Crosby, Charles L. Gifford.

IV. Centerville—Aaron S. Crosby, L. Frank Paine, Andrew W. Lawrence, U. A. Hull.

V. Osterville—Ira L. Hinckley, L. Frank Paine, U. A. Hull, Charles L. Gifford.

VI. Marstons Mills—Andrew W. Lawrence, John Bursley, U. A. Hull.

VII. Cotuit—U. A. Hull, Charles L. Gifford, Henry C. Davis, Ira L. Hinckley.

A vote extending a cordial invitation to the full board of Assessors to be present at all meetings of the Committee was passed unanimously.

At the request of the committee, State Supervisor of Assessors, C. W. Dow, met the committee and Assessors at the Town Office April 13, 1911, for the purpose of advice and instruction, especially in regard to the method of deciding the taxable value of specific parcels of real estate in the town such as certain detached peninsular forms, islands, "show places" so called, and others not comparable with adjacent parcels. Some of the main points of instruction received from the Supervisor were as follows:

"That we should follow the law in all cases."

"That we should be familiar enough and should be able to estimate reasonably enough a neighbor's bank account, and to so estimate in case of his failure to make returns."

"That the personal property tax of individuals should be increased each and every year until the party so increased is induced to file the return required by law."

"That the practice of assessing oyster growers for seed or oysters planted after April 1 of each year is illegal, but that the growers should be taxed for oysters actually on the beds or in their possession on that date, their cash on hand, and bills due them less debts."

“That the income over \$2000 of all persons should be taxed.” (The Assessors reported that no **direct** income tax had up to this time been imposed).

“That our seashore property should be treated specifically and not as ‘classified property.’”

“That all possible should be done to influence citizens to make returns.”

“That the Assessors could not be dictated to even by vote at a town meeting, neither can they be forced to print their valuations.”

The Supervisor expressed himself as satisfied with the personnel of the Committee and stated that he had already advised the Assessors to follow the recommendations to be made to them by the Committee, consistent with their oath of office.

As the valuation books of the previous years could not be taken from the Town Office, many days of laborious work were required to make copies necessary to carry on the work. Many members gave nearly an entire month to the work of making the valuation, uncomplainingly, some furnishing the use of automobiles, entertaining members at dinner, and in every way doing all possible to have the work well and fully accomplished.

It was the policy at all times to interview the owner of property to be taxed, and ask his assistance in assessing the property in his vicinity. Special mention and thanks are due to the following gentlemen for such assistance: J. M. Leonard, W. S. Scudder, Israel Crocker, H. P. Leonard, Robert Cross, L. N. Ames, N. H. Bearse, H. A. Dottridge, B. F. Sears, Howard Marston, James Otis, Winthrop Crowell, T. F. Phinney, George B. Fisher, Roscoe Hamblin, Horace Ryder, M. N. Harris, Lorenzo Lewis, Wm. T. Beales, Charles Ayling, Andrew Adie, Geo. H. Phelps, and many others.

Except in a few cases owners of real estate were very willing to place a value on their property approximating its real and full market value, in conformity to law, but expect-

ing the tax rate to be correspondingly low so that the tax to be paid would not be materially increased.

Unfortunately the Committee were not fully aware that owing to the large amount of money appropriated at the town meeting, and that the supplementary December tax the year before had enabled the assessors to make a tax rate of \$13.50 in 1910, it would be necessary to raise by taxation nearly 25 percent. more money than last year. Assuming that conditions this year were about as last year, we hoped for a tax rate of \$10.00 per \$1000, or even less. Had the **same valuation** remained however, as in 1910, the tax rate would have been about \$16.50 this year, and the taxpayers would have more easily understood the increase in their tax bills.

In some cases the Assessors may have been influenced by the report of this Committee, and many large increases may be justly laid to the Committee, for which we are quite willing to take the responsibility. A careful comparison of the reports of the Committee as to their valuation with the actual assessment finally made by the Assessors, together with the personal statements of members of the Board of Assessors, discloses the fact that in but few instances have the Board followed the recommendations of the Committee, thereby putting at naught the Committee's **adjustment of taxes** for which it worked so laboriously, and thus not securing the **net beneficial result** to the town hoped for by their labors. We perceive that the Board of Assessors realized the dissatisfaction of the people regarding the low valuation of the large estates, since these were raised in a manner, which entitles the Assessors to the approbation of the Committee and to the voters of the town." As to the raise in valuation of the real estate **in general**, this of course was found necessary if the tax rate was to be kept in the vicinity of \$13.00.

A beneficial result is the aroused public sentiment and interest in this most vital matter of taxation and the ex-

pectation that a strong demand will be made of the future Assessors for more careful conformity to law, frequent inspection of property to be taxed and above all to make "equality of taxation" the great aim of their endeavor. as neighbors will always watch each other in relation to their taxes, and if owning similar property, demand to be treated alike.

Upon learning of a recent sale at a price much greater than the assessed value, the assessors should not only adjust this particular parcel but similar adjoining parcels should also be revalued.

It is the opinion of this committee that the town of Barnstable is so large, property so diversified and changing in value so continually, especially its shore property, that no three men at the present salary can be expected to do the work at all satisfactorily. We recommend at least six assistant assessors residing in different sections of the town, to act with the Board when necessary, advising as to values, and assisting in adjusting the taxes of their neighborhood.

Also, the committee recommends much greater care and effort to locate personal property, and it is with regret that the committee were forced to make final reports, before they had fully exhausted their efforts in this direction.

The law practically says: "You may make a return, or you may run for luck." Most run for luck, and the citizen who feels any moral obligation to disclose his property to the assessors is a rare specimen. It is easily within the power of the assessors to prevent "tax dodging" by increasing the personal tax until returns are filed. It is an open question whether any member of the committee was justified in approaching the taxpayers with regard to their personal property. The Assessors alone have authority and confidential relationship in these matters, and should use all possible information as to estates probated, salaries, income, and bank deposits.

The following figures as given to this committee by an assessor, stating the **increase** in valuation recommended by us in the several villages may be of interest:

Barnstable	\$154,800.00
Hyannis	285,990.00
Hyannisport	378,460.00
Centerville	159,990.00
Osterville	677,880.00
Marstons Mills	33,250.00
Cotuit	512,950.00

In addition to the above, the Committee recommended much personal, and a large income tax. The **valuation** increase of the village of West Barnstable is not given, but owing to the 25 per cent. necessary increase, probably the taxes of all were somewhat greater than last year.

Approximately the valuation of the town was increased by the assessors 28 per cent., and if the recommendations of the committee had been adopted, the increase would have been about 47 per cent. The small taxpayer will in the future reap the benefit of this increase, as by far the greater increase has been made in the large estates.

Much interest and some criticism has been aroused over the withdrawal of a prominent resident as a voter, taking his large personal property holdings of about \$99,000 to another town. The party owns a beautiful peninsular of land estimated to be worth from \$50,000 to \$150,000, on which land exclusive of buildings a valuation of only \$14,000 was assessed in 1910, and much less in previous years.

Much just dissatisfaction had been expressed regarding this valuation and that of other similar parcels. Our committee recommended a value of \$75,000 and the Assessors placed a final value of \$60,000 this year. This and many similar examples fully justify the agitation resulting in the appointment of this committee, and is full acknowledgment

by the assessors of the discrimination heretofore practiced regarding these large estates.

The Committee sincerely regret the withdrawal mentioned and can appreciate the feeling of resentment in so abrupt an increase, but the town has greatly favored the gentleman in previous valuations, and the real estate still remains, which in the estimate of the Committee is not yet fully taxed.

The Committee find much property exempt from taxation, and in many cases believe the privilege of exemption from reason of poverty, has been exercised too freely.

While it would be interesting to all the taxpayers to have the full recommendations as to each parcel of property printed, no provision for such expense has been made. The following figures taken from one precinct will illustrate conditions as found and adjusted, on certain parcels of land only:

Assessed in 1910	Assessed in 1911	Recommended by Committee
\$5,000	\$25,000	\$35,575
5,000	16,000	30,000
11,200	18,000	29,000
6,000	14,000	17,000
12,000	19,000	60,000
12,000	28,000	32,000
3,200	7,000	9,000
120	1,550	3,500
1,100	6,000	10,000
800	3,400	5,000
1,300	7,000	11,000
4,000	7,500	10,000
3,000	6,000	9,000

It is to be regretted that our Board of Assessors should have been displeased at the appointment of the Committee,

resulting in a lack of harmonious action in the whole matter, but we feel that we are in no way to blame for the point of view taken by them.

The Committee expresses the hope that permanent good will result from its work. It has given much conscientious effort, and trusts that every citizen will in the future give more earnest attention to the whole matter of taxation and assist the Assessors in all possible ways to bring about more satisfactory assessments.

REPORT OF THE TOWN CLERK.

BIRTHS.

Births recorded in the Town of Barnstable for the year 1911, with the name, place of birth, and Christian name of parents:

- Jan. 2. Edith Mildred Long, Hyannis, Edward F and Edith F.
Jan. 6. Orrin Ansel Fuller, Marstons Mills, Ansel A. and Rose.
Jan. 10. Francis Winslow Marsters, West Barnstable, Reuben C. and Julia,
Jan. 12. (Stillborn).
Jan. 13. Alfred Francis Gonsalves, West Barnstable, Manuel and Mary,
Jan. 15. (Daughter) Enos, Santuit, Manuel and Sylvia,
Jan. 25. (Son) Ellis, Centerville, Amos F. and Cora E.
Jan. 26. Maynard Hutchinson Whittemore, Hyannis, Nathaniel H. and Eliza F.
Jan. 29. Manuel Cabral, Santuit, John P. and Mary,
Feb. 5. Marie Anna Vetquosky, South Hyannis, Joseph and Nora,
Feb. 17. David Nelson Bosworth, Jr., Hyannis, David N. and Mary A.
Feb. 17. Mary Katherine Oliver, West Barnstable, John B. and Mary,
Feb. 19. Erva Crosby Doane, Centerville, Robert M. and Emma F.
Mar. 6. (Stillborn).
Mar. 10. Annie Lillian Pyy, West Barnstable, John and Hilma,
Mar. 15. Clarence Perry, West Barnstable, Joseph and Fannie,
Mar. 23. Sidney Crowell Chase, Hyannis, Edward L., Jr., and Josephine S
Mar. 23. Luther Hastings Sears, Jr., Hyannis, Luther H. and Edith B.
Mar. 27. Sidney Bennett Lovell, Osterville, Bernard L. and Amy W.
Apr. 1. Roger Goodspeed, Hyannis, Ernest L. and Ella B.

- Apr. 8. John Caetano Medaros, Santuit, Manuel and Mary A.
 Apr. 9. Raymond Archibald Lewis, Osterville, Edward H. and Carrie,
 Apr. 9. Roger Austin Burlingame, Cotuit, Carleton A. and Helen M.
 Apr. 13. (Son) Potter, Cotuit, William F. and Maud L.
 Apr. 19. Harriet Gorham Chase, Hyannis, Walter B. and Grace,
 Apr. 27. (Stillborn).
 Apr. 28. Caton Soares, Marstons Mills, Manuel C. and Isabel R.
 May 6. (Illegitimate).
 May 9. (Daughter) Bruce, Cotuit, Amos M. and Mary F.
 May 10. Edwin Baker Walker, Hyannis, Austin A. and Agnes M.
 May 16. Gladys Evelyn Ames, Osterville, Bernard and Angelina,
 May 20. Joseph DeSilva, Marstons Mills, Antone and Teresa,
 May 22. (Daughter) Teixeira, Cummaquid, Theodore and Mary C.
 May 24. Russell Perkins Evans, Osterville, Russell C. and Melissa C.
 May 28. Richard Irving Crocker, West Barnstable, Edward I. and Eva F.
 May 28. Walter Crosby Scudder, Osterville, Walter S. and Mary W.
 May 31. (Daughter) Thomas, West Barnstable, Manuel and Rosa,
 June 5. Marjorie Irva Fuller, Osterville, Walter I. and Ester,
 June 17. Elma Mary Kallio, West Barnstable, Victor and Sandra,
 June 18. Herbert Edwin Coombs, Osterville, Henry P. and Alice F.
 June 20. (Stillborn).
 July 9. Ruth Elizabeth Howes, Hyannis, William G. and Louise B.
 July 6. (Son) Loring, Hyannis, Frank W. and Mary B.
 July 11. Myrtle Elaine Tallman, Osterville, Harry L. and Myrtle I.
 July 11. (Daughter) Anderson, Cotuit, Victor H. and Bertha A.
 Aug. 7. Dorothy Etta Covell, Hyannis, Darius and Delia W.
 Aug. 9. Ella Mary Davis, West Barnstable, Joseph S. and Mary R.
 Aug. 15. Dora Ann Pells, Hyannisport, Clifton E. and Florence I.
 Aug. 16. Joseph Larkin Swift, Osterville, Joseph and Margaret,
 Aug. 18. Florence Elizabeth Lapham, Osterville, James S. and Anna F.
 Aug. 22. Beatrice May Hall, Centerville, Charles P. and Helen S.
 Aug. 28. Elsie Mary Ruuska, West Barnstable, Victor and Linda,
 Aug. 28. Elsie Esther Kahelin, West Barnstable, Adam and Linda,
 Sept. 1. Elenor Elizabeth Morgan, Centerville, William and Susana,
 Sept. 6. (Daughter) Baker, Hyannis, Foster L. and Gertrude W.
 Sept. 12. George Rutherford Monamara, Jr., Hyannisport, George R. and Ora C.

- Sept. 15. Alfred William Childs, Jr., Cotuit, Alfred W. and Florence E.
- Sept. 21. Elizabeth Rankin, Osterville, George R. and Lucy A.
- Sept. 23. George Edwin Wirttanen, West Barnstable, Elmar and Miina,
- Sept. 23. (Son) Snow, Hyannis, Joseph B. and Mary E.
- Oct. 1. (Stillborn).
- Oct. 6. Constance Medaros, Santuit, Manuel and Nellie,
- Oct. 12. (Stillborn).
- Oct. 17. Mildred Pocknett, Hyannis, Oliver C. and Grace M.
- Oct. 22. Cora Drew Cross, Hyannis, John D. and Lizzie C.
- Oct. 26. Ella Whilmena Rosengren, Centerville, Alfred and Aini,
- Oct. 27. Stewart Westgate Stevens, Osterville, James A. and Minnie B.
- Nov. 1. (Son) Silva, Barnstable, Matthew and Gloria,
- Nov. 18. Impi Eukenia Siira, West Barnstable, John and Hilma,
- Nov. 19. William Albert Baker, Cotuit, William C. and Bertha A.
- Nov. 19. Ann Patricia Bell, Cotuit, Robert E. and Isabel P.
- Nov. 20. Albert Walworth Hardy, Hyannis, Albert W. and Alice M. C.
- Nov. 18. Elizabeth Morton Holway, New Bedford, Herbert E. and Rebecca B.
- Nov. 24. Florence Elizabeth Wyman, Osterville, Arthur and Lillian,
- Nov. 26. Mary Sylvia Repose, Marstons Mills, Manuel and Julia,
- Nov. 29. (Illegitimate).
- Dec. 1. Jeannette Howes, Hyannis, Howard W. and Marion C.
- Dec. 6. Lionel Arthur Pierce, Marstons Mills, Arthur R. and Ineze,
- Dec. 14. Barbara Tallman, Osterville, Ariel and Mary E.
- Dec. 20. Maude Odell Childs, Centerville, Herman F. and Edith M.
- Dec. 21. Arnold Lincoln Washington, Hyannisport, George L. and Lulu G.
- Dec. 21. (Son) Lumbert, Hyannis, Ralph and Lula M.
- Dec. 24. Alger Richard Macomber, Osterville, Richard A. and Edna,
- Dec. 31. Helen Elizabeth Linnell, Cotuit, Wilton E. and Abbie L.

OMITTED FROM 1910 REPORT.

- Feb. 27. Ruth Mullaney, Hyannis, Owen J. and Angeline,
- Mar. 3. Warren Thacher Baxter, South Hyannis, Benjamin D. and Elizabeth W.

MARRIAGES.

Marriages recorded in the Town of Barnstable for the year 1911 :

- Jan. 11 Clarence Oscar Rushton of Wollaston and Lillian Ward Drew of Hyannis.
- Jan. 12. Horace Cobb of Hyannisport and Edith M. Greamer of Boston.
- Jan. 14. George Harding Rogers of Ansonia, Conn. and Flora Angenette Gray of Hyannis.
- Feb. 3. David Nelson Bosworth of Cuttyhunk and Mary Adaleta Bacon of Hyannis.
- Feb. 4. Warren Alexander Tripp of West Yarmouth and Katherine Ellen Maher of Hyannis.
- Feb. 24. James Henry Keane of Hyannis and Dorris Lenore Fancey of Sagamore.
- Feb. 28. William Clark Sears of Hyannis and Beatrice Heymann of Dennis.
- Mar. 1. Henry Perkins Coombs of Hyannis and Alice Frances Jey of Osterville.
- Mar. 11. Frank Korppila of West Yarmouth and Ida Mary Aittoniemi of Hyannis.
- Apr. 6. Henry Bassett Nickerson of Newtonville and Alice Mayo Hinckley of Barnstable.
- Apr. 20. Allen Putnam Eagleston of Hyannis and Lillian Young (Shew) of Brookline.
- Apr. 27. Thaddeus Baker of South Yarmouth and Ida Blanche Childs of Centerville.
- May 26. Leo George Childs of Cotuit and Jennie Scott of Sweden.
- May 27. Ira David Havelock Murray of Hyannis and Gertrude May Allen of Hyannis.
- May 28. Arthur Erolid Bunker of Sandwich and Annie Hatfield of Sandwich.
- June 7. Erland Kurra of Centerville and Catherine Agnes Ryan of Boston.
- June 9. Lewis Crosby Perry of Centerville and Mary Ellen Snow (Robinson) of Centerville.
- June 21 Henry Harrison Baker of Hyannis and Marion Bissell Agard of Tolland, Conn.

- June 25. Ernest Daniel Cameron of South Sandwich and Estelle Percival Mecarta of Marstons Mills.
- June 28. Eben Parker Williams of Hyannis and Georgia May Simons of Springfield.
- July 3. Victor Uriah Jones of Barnstable and Louise Tabor Faunce of Marion.
- July 26. Emil Filppula of Hyannis and Ida Ahamaki of Hyannis.
- Aug. 11. David Granklin Kelley of Centerville and Una E. Cowden of Hyannis.
- Aug. 19. Tidie Benttinen of West Barnstable and Hilda Niemi of Sandwich.
- Aug. 24. Foster Lothrop Baker of West Yarmouth and Gertrude Webster Chase of Hyannis.
- Sept. 16. Henry Farrand Griffin of New York City and Mary Whitney Redfield of Barnstable.
- Sept. 16. Freeman Merton Nickerson of Cotuit and Genevieve Mendall Perry of Monument Beach.
- Sept. 17. Frederick H. Davol of Hyde Park and Nellie L. Button (Sparks) of Hyde Park.
- Sept. 21. Michael Riordan of Hyannis and Margret Durkin of Hyannisport.
- Sept. 30. Manuel Grace Rosa, Jr. of Osterville and Adeline M Francis of Gloucester.
- Oct. 3. Owen Mayhew Coleman of Osterville and Helen Josephine Logan of Providence, R. I.
- Oct. 8. Warren Lovell of Osterville and Amelia Emily Whiteley of Osterville.
- Oct. 18. Charles Edwin Smith of Hyannis and Charlottee Safford Sibley of Stony Brook.
- Oct. 22. Harold Francis Jones of Marstons Mills and Angilene Mae Fish of East Sandwich.
- Oct. 25. Leon Goodspeed Savery of Cotuit and Ellen May Long of Osterville.
- Nov. 2. Albertus E. Dugan of Brewster and Elizabeth B. Rogers of Brewster.
- Nov. 4. Charles P. Durell of Hingham and Mildred H. Fisher of Barnstable.
- Nov. 16. John Geer of Barnstable and Ethel R. Cahoon of South Yarmouth.

- Nov. 18. William C. Woodbury of Hyannis and Clara M. Woodbury of Boston.
- Nov. 18. Andrew Maki of West Barnstable and Mary Syriala of West Barnstable.
- Nov. 29. William Amos Roleau of Hyannis and Pearl Evelyn Temple of Hyannis.
- Nov. 30. Maurice Jenkins Hinckley of Osterville and Alice Morton Pierce of Marstons Mills.
- Dec. 5. Harold Elbert Buxton of Hyannis and Mae Elizabeth McCooe of Hyannis.
- Dec. 7. Samuel Erwin Landers of Cotuit and Eunice Mildred Crosby Savery of Cotuit.
- Dec. 25. Chauncey Hamblin Smith of Millbury and Agnes Granger Phinney of Hyannisport.
- Dec. 27. Edson Raymond Savery of Cotuit and Ellen Frances Baker of Cotuit.

DEATHS.

Deaths recorded in the Town of Barnstable for the year 1911 :

- Jan. 6. Harriet A. Stockwell, (Briggs), Centerville, 66 y., 8 m., 12 d.
 Jan. 12. (Stillborn).
 Jan. 19. Lucilla P. Goodspeed, (Sturgis), Cotuit, 54 y., 8 m., 2 d.
 Jan. 20. Frederick L. Baker, Cotuit, 1 y., 7 m., 18 d.
 Jan. 23. Victor Avid Johnson, West Barnstable, 4 m., 8 d.
 Jan. 25. Jonathan Hallett, Hyannis, 66 y., 7 m., 5 d.
 Jan. 29. Willard W. Holway, Hyannis, 51 y.
 Feb. 7. Mercy N. Jenkins, (Bursley), West Barnstable, 70 y., 4 m., 16 d.
 Feb. 18. Caroline S. Gray, Marstons Mills, 76 y., 8 m., 21 d.

Town Clerk.

REPORT OF SCHOOL COMMITTEE

To the Citizens of the Town of Barnstable:

We respectfully submit the following report on the Public Schools, prepared by the Superintendent and Secretary, for the year ending December 31, 1911:

Z. H. JENKINS,
J. MILTON LEONARD,
HEMAN B. CHASE.

ORGANIZATION OF SCHOOL BOARD

<i>Members</i>	<i>Term Expires</i>	<i>Residence</i>
ZEBINA H. JENKINS,	1914	West Barnstable
J. MILTON LEONARD,	1912	Osterville
HEMAN B. CHASE,	1913	Hyannis

G. H. GALGER, Superintendent of Schools, Hyannis.

Chairman of Board—Zebina H. Jenkins.

Secretary of Board—G. H. Galger, C. C. Tel., 16-7.

Auditing Committee—Z. H. Jenkins, J. M. Leonard,
H. B. Chase,

Committee on Examination of Teachers—Superintendent.

Purchaser of Books, Apparatus and Supplies—Superintendent.

Special Committee in Charge of School Buildings at Centerville and Hyannis—H. B. Chase.

Special Committee in Charge of School Buildings at Barnstable, West Barnstable and Marstons Mills—Z. H. Jenkins.

Special Committee in Charge of School Buildings at Cotuit, Santuit and Osterville—J. M. Leonard.

Committee on Transportation of Scholars to High Schools—Z. H. Jenkins, J. M. Leonard, H. B. Chase.

Truant Officers—George Smith, Barnstable; John Bursley, West Barnstable; J. Albert Grigson, Cotuit; John J. Harlow, Santuit; J. W. Lewis, Osterville; E. W. Childs, Centerville; I. J. Green, Marstons Mills; Geo. F. Hart, Hyannis.

CALENDAR, 1912

The High Schools begin Jan. 1, and continue 12 weeks; April 1, and continue 12 weeks; the first Tuesday after the first Monday in September, and continue 16 weeks.

The Training School, in the commencement and continuance of its several terms, unless otherwise ordered, is subject to the Normal School calendar, except that in the Fall it commences September 16.

All other schools begin January 1, and continue 12 weeks; April 8, and continue 10 weeks; Sept. 16, and continue 14 weeks.

Calendar subject to change,

SUPERINTENDENT'S REPORT

To the School Committee of Barnstable :

In accordance with the rules of the School Committee, I have the honor to submit my seventh annual report on the public schools, for the year ending December 31, 1911, the same being the twenty-first in the series of Superintendents' reports.

SCHOOL BUILDINGS

REPAIRS ACCOMPLISHED

Among the most important items under "Repairs" the past year were the finishing of the upper room at the Elizabeth Lowell High School, the replastering and entire renovation of the primary school room in the Cotuit Grammar School building, book closets and outside repairs at Marstons Mills, repairs on the stacks and painting the trimmings of the Barnstable High School, reconcreting the cellar of the north wing and repairing the stack of the Training School, and additional seatings for the Elizabeth Lowell and Barnstable High Schools. The Elizabeth Lowell School is now the best equipped school physically of its size in the county. A final payment of \$100 was made on the heating and ventilating plant installed the year before at Barnstable village. Thus far the plant has worked remarkably well. It should be understood that included in the "Repairs" account is the cost of cleaning the buildings, of all janitors' supplies and of new furniture. This account showed an unexpended balance of \$452.54 for the year,

REPAIRS NEEDED

A survey of the repairs and improvements that should be made on several of our school buildings in the immediate future indicates that substantial sums will be needed for that purpose.

The necessity of extensive alterations in the stairways and entrances of the Barnstable Grammar School building, offers a favorable opportunity for erecting an additional room and for installing modern sanitary conveniences, and an extensively signed petition in favor of such action has been received by the School Board. Similar improvements as to sanitary conditions should be made at Centerville and Cotuit, as previously recommended, the conditions in this matter being particularly objectionable at the latter school.

Extensive repairs will also soon be necessary at the Training School. The woodwork and walls have received no treatment since the building was erected fifteen years ago. The plastering is badly cracked and bulging in many places, due in part to the effects of the acetylene explosion of several years ago, and the entire interior woodwork needs varnishing; this will entail a very considerable expense. It is probable also that within a very few years extensive repairs will be needed on both the sanitary and heating plants.

A plan was formulated by the School Board some years ago by which at least one schoolroom a year was to be refurnished with modern adjustable seatings. Up to last year this plan had been so far carried out that the Training School and the Marstons Mills School were the only buildings in which modern seats had not been installed. I recommend that the latter school be so furnished this year and that a sufficient number of adjustable seats be supplied to the several rooms of the Training School to provide for exceptional cases.

The probable erection of a new building at Osterville will render only minor repairs necessary to the old building.

TRANSPORTATION

Fewer complaints than usual regarding transportation conditions have been received the past year. The expenditures under this head, \$4,658.59, exceeded those of any previous year and the estimated expenditures for the coming year will be approximately the same

MEDICAL INSPECTION

Superintendents of rural school districts attempted the past year to formulate more specifically the duties of school medical inspectors and to provide uniform report blanks regarding the performance of the same, but it was found that the great variety of local conditions, and the considerable differences in the compensations of the physicians, rendered such a plan at present impracticable. Testimony was unanimous however as to the value of medical inspection.

The report of School Physician J. Haydn Higgins, recently transmitted to the Board, states that the vaccination law is being better enforced and the eye and ear tests more carefully made; that the more common deviations from the normal are in function of nose and throat, digestive disturbances, and nervous troubles of the milder sort, and that Barnstable has the smallest proportion of "defectives" in the state.

TEXT-BOOKS AND SUPPLIES

The sum appropriated for text-books and supplies, though larger than that of the preceding year, proved barely adequate. The expenditure under this head was a little less than five per cent. of the total expenditures for the schools. A somewhat larger sum could be advantageously used, but any attempt to fulfill ideal requirements as to new books would be prohibitory in cost.

ENROLMENT, ATTENDANCE, ETC.

Enrolment and membership for the school year ending June 1911, differed but little from that of the preceding year. The total enrolment was 823. The percentage of daily attendance was reduced somewhat by the prevalence of whooping cough, mumps, and scarlet fever. Exclusion from school of pupils so suffering seems to have little effect in preventing the spread of such diseases, as the law provides for no effective social quarantine. It will require the best efforts of the teachers and pupils in the schools so affected to recover lost ground in lessons.

There has been but little truancy during the year and that chiefly in one village, where the trouble seems chronic and is brought about by economic conditions almost impossible to remedy.

REPORTS OF SUPERVISORS AND PRINCIPALS

The reports and recommendations of those directly engaged in teaching and supervising have a peculiar value, and the attention of parents is called to the reports of the high school principals, of the commercial instructor, of the supervisor of drawing and of the supervisor of music.

RESIGNATIONS AND APPOINTMENTS

Resignations the past year, though slightly less in number than usual, still equalled nearly one-third the entire teaching force, and involved a task of the utmost difficulty in satisfactorily filling the resultant vacancies.

Miss J. Lucile Thayer of Barnstable and Miss Lucy H. Ryder of Cotuit, both of whom showed natural teaching aptitude as part-time assistants at Barnstable and Santuit respectively, declined re-election, the latter becoming a student in the Hyannis Normal School. Miss Genevieve M. Perry of West Barnstable and Miss Charlotte S. Sibley

of Hyannis, after filling their respective positions for several years with marked ability, retired from the profession in June.

Miss Georgiana Jones of Barnstable, and Miss Rebecca C. Lapham of Santuit, succeeded Miss Thayer and Miss Ryder, and Miss Bertha S. Weber of Hyannis, succeeded Miss Perry. The vacancy in the Barnstable High School permitted a rearrangement of program and Mr. W. Sherman Atwood of Brockton, was appointed sub-master. Mrs. Florence T. Davis, as Commercial Instructor in the Barnstable High School, carried on the work with rare enthusiasm, thoroughness and efficiency, and her resignation in October was greatly regretted by all. She was succeeded by Miss Luella R. Lyon of Waterbury, Ct.

Mr. Chas. L. Gifford, principal at Osterville, resigned in March, the vacancy being filled until the following June by Edward L. Ashley of Boston. Mr. Lewis A. Sheafe of Amesbury, was appointed to the position in September.

Harry L. Edgecomb, who had shown energy and enterprise as principal of the Cotuit Grammar School, refused re-election in June and the resulting vacancy was filled by the appointment of Mrs. C. L. Hall, whose previous work as principal had been so satisfactory. Mrs. Hall, after doing invaluable work in organizing the school, resigned in October, and was succeeded by Mr. Ernest E. Smith of Westwood. Previous acquaintance with the school as a student proved a considerable aid to Mr. Andrew G. Johnson in his administration of the Training School for two years as principal. Mr. Wm. G. Currier of Braintree, succeeded to the position in September. Mabel K. Baker, having filled, for two terms, with her customary efficiency the vacancy caused by the resignation of Miss Annie H. Chadwick, was succeeded in September by Miss Mabel R. Coombs of Bardwell's Ferry.

Miss S. Gertrude Tighe, who labored most faithfully during the year as Supervisor of Music, declined re-elec-

tion in June and was succeeded in September by Miss Frances L. Stockton of Hampden.

All the above appointees, except the part-time assistants, had had both professional training and valuable experience

SCHOOL FINANCES

Presenting an unexpended balance at the end of the fiscal year has not recently been a habit of the school department, but such a balance is presented for 1911. This is due, however, to the fact that certain repairs planned were not carried out, a considerable balance under that head therefore remaining. The expenditures under "Text-books and Supplies" were kept within the appropriation, those under "School Purposes" and under "Transportation" exceeded the appropriations by \$63.79 and \$158.59 respectively. The total unexpended balance was \$231.90.

SUMMARY OF RECEIPTS AND EXPENDITURES, 1911

	Total Available Appropriations	Expenditures	Balance or Deficiency
School Purposes,	\$24,387 70	\$24,451 49	—\$63 79
Text-books, supplies,	1,600 00	1,598 26	+1 74
Repairs,	2,500 00	2,047 46	+452 54
Transportation,	4,500 00	4,658 59	—158 59
	<hr/>	<hr/>	<hr/>
Totals,	\$32,987 70	\$32,755 80	+\$231 90

ANALYSIS AND ESTIMATES

As will be seen by the above, actual expenditures tallied closely with the estimates for "School Purposes" and for "Text-books and Supplies;" the expenditures for "Transportation" exceeded the estimates by \$158.59, while under "Repairs" a balance of \$452.54 remained unexpended. Under "School Purposes" the expenditures for fuel ex-

ceeded the estimates by \$37.41; the salaries of three janitors were increased, an increase of fifty dollars was made in the annual salary of the Supervisor of Drawing, and the employment of a sub-master in the Barnstable High School in place of Miss Sibley, resigned, also involved an increase in salary. Two or three teachers entering their third year of service received the advance of \$5 per month called for by our present schedule. Most of the above increases began in September, but will of course be operative during the entire school year of 1912. The expenditures for "School Purposes" for 1911 totalled \$24,451.49. Should we by good fortune retain most of our present teachers the coming year, with no increase of salaries except as called for by schedule, about \$450 will be needed above that expended last year.

Summing up, allowing a possible income from sources other than taxation, of \$1,100, and expenditure of \$2,000 for fuel, \$250 for miscellaneous items, \$50 for the school census, and \$1,934 for janitors' salaries, the total sum needed to be voted for "School Purposes" for 1912 will be \$23,700. "Transportation" will call for approximately \$4,650; "Text-books and Supplies" \$1,600; "Repairs," as may be determined by the annual meeting.

In another place in this report the urgent need of a fairer wage return for grade teachers is discussed. An approach at least toward such action could be made at this time by an advance of one dollar per week or thirty-six dollars per year, applicable to grade teachers in their third or later year of service to the town, and also to grammar school principals of similar length of service. The total expense of this, meaning so much for the good of the schools, would be not over \$600. This, added to the \$23,700 previously mentioned would give a total of \$24,300 needed for all "School Purposes," the term comprising all salaries, including those of janitors; expenditures for fuel, the school census, and miscellaneous items.

RANK OF BARNSTABLE IN SCHOOL APPROPRIATIONS

In the tax for schools, per thousand dollars of valuation, the rank of Barnstable is one hundred ninety-sixth, 195 other towns in the Commonwealth taxing themselves more heavily. Barnstable taxes itself \$4.88 per thousand; Harwich \$5.21 and stands one hundred sixty-seventh; Orleans \$6.11 and stands ninety-seventh; Sandwich \$6.29 and stands eighty-second; Provincetown \$7.69 and stands eleventh; West Boylston \$10.56 and stands first.

Barnstable spends per pupil for text-books and supplies \$1.94, Bourne \$3.20, Brewster \$1.80, Chatham \$2.68, Dennis \$1.20, Eastham \$2.44, Falmouth \$2.75, Harwich \$1.87, Mashpee \$2.69, Orleans \$1.63, Provincetown \$1.67, Truro \$1.80, Wellfleet \$2.21, Yarmouth \$3.94. The average for the county is \$2.32.

PROGRESS OF THE SCHOOLS

ELEMENTARY SCHOOLS

Progress in most of the subjects of instruction was described somewhat in detail in last year's report, and the work of the past year calls for little additional comment.

In most of the schools progress toward securing thoroughness in the fundamentals is evident, though slow.

The new course in arithmetic is proving somewhat too comprehensive in some of its requirements and a revised course is being prepared.

There has been an improvement in spelling in nearly all the schools, but oral reading in the higher grades is still unsatisfactory, and much remains to be worked out in the question of technical grammar in the grades, especially in its relation to high school demands.

The quality of the instruction in the important subjects of geography, history and civics varies widely in the differ-

ent schools, profitable and progressive teaching in these subjects being peculiarly dependent upon the individual aptitude, ability and breadth of experience of the teacher. Nature study is fragmentary, disconnected and unsatisfactory in many of the schools, due to the inadequate training of the teachers and the time necessity of considering the subject as a minor one, to be tacked on at such times and places as other work allows.

Systematic hand training, and indispensable accompaniment of any rational and adequate system of education, is, except in connection with drawing, almost wholly absent from our schools. Some of the teachers who have the requisite ability and initiative have done something in hand training beyond that required by the drawing course. This work is excellent in itself, but as it is preceded and followed by no similar work, much of its value as training is lost. I desire here to call attention to the unusually even, faithful and thorough work being done at present by our little group of underpaid grammar school principals, and to express the hope that in the interests of the schools of Barnstable we may be able to retain them.

HIGH SCHOOLS

The high schools are making moderate progress along some of the lines suggested in previous reports. Better work is being done in English in both schools, the modified college requirements now rendering it almost possible for a capable teacher to fulfill such, without developing in his pupils a lasting distaste for standard literature. Technical algebra is now confined to two terms of the freshman year, work in narrative and business English occupying the other term. Advanced algebra is offered in the senior year to candidates for college. In modern languages four years of either French or German are offered instead of two years of each as formerly.

The appointment of a sub-master in the Barnstable High

School, has made it possible for chemistry and physics to be taught by the same instructor, to the great advantage of both. As far as is consistent with rigid disciplinary training in these subjects, their practical application is being emphasized.

No radical changes have been made in the program of the Commercial Course. While more time devoted to type-writing and shorthand would be highly advantageous from the strictly business standpoint, it still remains the policy of the Board to insist on a good general training accompanying the commercial work throughout the entire four years.

In the Elizabeth Lowell High School most faithful work has been done along the conventional lines rendered necessary by the small teaching force and the requirements of the law. Such a course, valuable as it is, is not the one best fitted, however, for a large proportion of the pupils and it is to be hoped that such modifications may soon be possible as will permit of a larger amount of work more in touch with the demands of the life of today.

Very slowly the curricula of rural high schools are being modified in the direction of the demands of modern life. Meanwhile many pupils utterly unfit for such work are being loaded with "dead vocables," with the refinements of formal rhetoric and with abstract formulas in science, because, forsooth, such things were in the past supposed to best fit pupils for entrance into college or into "the higher walks of life." The reaction against such abstractions, taking largely the form of "vocational training," is in the cities growing with astonishing rapidity. The movement, like all violent reactions, has its dangers, one of which is that of forgetting that it makes all the difference in the world in the character of a man's life, whether he lives to do business or does business to live. But the dangers of the vocational movement concern our rural high schools but little; they are trailing too far in the rear for that. It could well be the peculiar work and glory of

such schools, were it made possible for them to secure and hold adequately trained teachers, to strike the golden mean between the conservatism of the past and the radicalism of today.

But such a golden mean cannot be reached by drifting. Any approach toward such an end means continuous effort at the difficult task of judging the relative values in life of the subjects taught in these schools. It means at least the partial elimination of those subjects whose end seems to be chiefly ornament in conversation rather than use in vital activities, and of those which constitute in the main a mere mass of comparatively useless facts. We smile at the Illyrian peasant who balances the bag of grain carried on one side by a bag of the stones on the other, but our schools have been sending out their graduates loaded in exactly similar fashion. "It is not the knowledge which is stored up as intellectual fat which is of value, but that which is turned into intellectual muscle," says Spencer, and it is intellectual and moral muscle above all that our young people need. It should be the special work of "the peoples' college" to develop this to the utmost. But in so doing it will need the active cooperation of the home and the church and of the men and women engaged in the every-day work of the world. Some duties are already fairly certain: There must be a broadening and deepening of the science work, aiming to cultivate a habit of patient observation and dispassionate judgment and to instill a reverence for the laws of nature that will be lived as well as felt. Mathematics should be taught as a means of rigid mental training and as having many direct applications to every-day affairs and to the higher arts. The ends sought in the teaching of English literature, of the languages and of history have much in common, the development of discrimination, appreciation of the good in literature and life, of human sympathy, and of an earnest desire to do worthily one's part in the world. And along with all these the pupil should receive

some systematic training having reference to some one of the great industries, in order that it may not be said of our schools that they send out our youth "magnificently unprepared for the long littleness of life."

Many of these aims our high school teachers are already seeking with intelligent and faithful labor. Their efforts deserve greater encouragement and more liberal support.

TRAINING SCHOOL

Under skilled teachers much has been accomplished in the Training School, along the lines for which it is so justly noted. Mr. Baldwin's report on the School will be found on another page.

DRAWING AND MUSIC

Few if any towns in the state offer greater physical obstacles to effective supervision than Barnstable, and the wear and tear of the transportation involved in visiting eight widely scattered villages can fully be appreciated only by those engaged in the work. Since the cost of this transportation is paid by the supervisors themselves, their net financial returns are anything but generous. In spite, however, of the above obstacles and the disadvantages offered by the great variety of grading in the schools, excellent work is being done by the supervisors of both subjects. It is safe to say that few towns of the character and size of Barnstable can show better work in drawing, based on a more modern, comprehensive and wisely planned course than the work being done under the guidance and inspiration of our present instructor, and there is evidence that this is being appreciated by parents as well as by pupils and school officials.

ONE KIND OF RURAL BETTERMENT NEEDED

Perhaps not more than one-tenth of the voters of the town will do more than glance at the third column under the heading "List of Teachers" in this report. Yet the continuance of the conditions there indicated spells nothing less than disaster to the boys and girls of Barnstable. A study of the facts there given shows that over fifty per cent. of our teachers have served the town less than two years and nearly one-third less than one year. However difficult it may be for the average layman to even begin to appreciate the misunderstandings, loss of time, misdirected efforts, lack of continuity, economy and exactness in school work, brought about by such constant change of teachers, the loss to the best development of our boys and girls is so immensely great that no good citizen ought to ignore it, or do less than his best to bring about a radical change.

The work of the teacher of the average rural school, if effectively done, is incomparably more difficult than that of the teacher of the city graded school. Needing, above all, teachers of highly competent ability, the average rural town seeks to obtain such by offering difficult conditions, insecure tenure and salaries from twenty per cent. to sixty per cent. less than those paid by the cities and larger towns, offering in fact a mere existence wage. Yet with the resulting loss and change of teachers we wonder meanwhile when an occasional pupil shows an amazing ignorance of what he should know and an irritating inability to do what he should be able to do.

Better teachers and the lessening of the number of grades and pupils to a room are the two foundation stones of the arch of successful instruction, and no amount of theorizing, argument or supervision will produce the desired results until these foundations are secured. It is not at all a question to be discussed by "educational experts," but a situation, which, once understood in all its seriousness, by

parents, calls for an awakening of the public conscience to our duties to the young, who are and ever must be "the continuing hope" of the nation.

Even if we may not hope to lessen the rush to the city, it is our plain duty to send our young people there thoroughly taught in the fundamentals, with habits of close observation, clear thinking and persistent industry, and with some conception of their duties to their fellowmen.

If our schools are not what they should be their graduates will have few or none of these qualities. Some of them will drift back again to their home towns, as so many now do, taking up occupations requiring little skill or ability; others, remaining in the cities, will mix with the great mass of the unsuccessful and discouraged. And for such failures the mass of parents and voters in our rural towns are primarily responsible. It is in their power and in the power of none others to make possible the more adequate fitting of our young people for more worthy and effective citizenship.

Our rural towns demand as good roads, as good mail and telephone service as obtains in the cities; **why not as good teachers and as good schools?** Are the latter less important than the former to the future good of the community? But to secure such requires a financial policy, sincere enough to realize, and courageous enough to act upon, the proposition that only by offering the best can the best be secured, and that the best is nowhere more imperatively needed than in our rural schools.

Says Dr. A. E. Winship, the highest authority in America on actual conditions in our schools: "The country school has in its keeping the future of America. It is the universal medium of restoring a pure country citizenship.

The country school **can never do its work for American citizenship unless it is in all respects equal to the city school.**

Wages must be relatively the same for teachers in country and city.

Teachers must be specifically trained for work in ungraded schools. The country school is as unlike the city graded school, as a garden is unlike a wheat field.

The country teacher must know and love country life and **want to stay there.**"

In our own town the need of an advance in the salaries of grade teachers is an immediate and vital one, conditioning all genuine and lasting improvement in the work of our schools. We, too, are paying to such teachers, attempting work which calls for the highest skill, ability and character, a bare existence wage. Many of our teachers are paying city rates for board. Perhaps in view of existing high prices these rates are not unreasonable, but they are higher than those charged in surrounding towns. The result is that some of our teachers are actually receiving a smaller net wage than those of neighboring and financially poorer towns, increasing the already extreme difficulty of obtaining desirable candidates for vacancies.

If the basis of true democracy is giving "equal opportunities to all," then our school system is far from democratic. It will become truly democratic only when our country boys and girls are guided and inspired throughout their school course by teachers equal in ability, breadth of culture and sympathy to those found in our most progressive city schools. This will become possible only through the direct action of thoughtful and public-spirited parents and voters, action as radical in nature as the need is imperative.

Respectfully submitted,

G. H. GALGER.

REPORT OF THE PRINCIPAL OF THE BARN- STABLE HIGH SCHOOL

G. H. GALGER, Superintendent of Schools :

Dear Sir:—

I hereby submit to you my report as principal of the Barnstable High School:

SCIENCE

The Science work of the first-year class during the fall term has been wholly along biological lines. Particular attention has been given to those forms of animal and plant life that are found in the immediate vicinity of the school, and along our shores.

For the present term the class will be occupied in a study of the Human Body, and in the spring a course in Botany, including Elementary Forestry will be given.

In both Physics and Chemistry the aim has been to make the work as practical as possible, to have the pupil see for himself that the work is really worth while, and that the knowledge gained in the class room is of some value in the everyday world.

In Chemistry some very good work has been done in analysis of water. Experiments in food analysis will be performed by the class later in the year.

All experiments are carefully recorded in note-books. The installing of a new cabinet in the laboratory enables us to give much better care to the apparatus and adds to the appearance of the room.

MODERN LANGUAGES

In September, the study of French was introduced into the second-year class. By this it is hoped that the pupil will obtain a much firmer grasp of the language than has

been possible hitherto when only two years could be given. The teaching has been almost entirely by the conversational method, the end in view being to train the ear as well as the eye.

In the German classes the interest has been quickened by the singing of German songs and by readings from the new book, "Im Vaterland."

ATHLETICS

A more active interest in Athletics has been aroused this year than ever before, the cooperation of the school authorities with the boys proving to be a good thing in every way.

The football team played games with the Normal School and with town teams in the early part of the fall term. Soccer football kept the interest alive until snowfall.

The grounds to the west of the schoolhouse have been surveyed and a careful estimate made as to the probable cost of grading and putting this land into shape for an athletic field.

The estimated cost is \$700, and so enthusiastic are the friends of the school in this project that already \$415 of this amount has been raised. Contributions to this fund may be sent to Dr. Heman B. Chase, Hyannis.

PROMOTIONS

Since my last report we have done away with "conditional" promotion. A pupil can no longer pass on deficient in one or more studies.

The good effects of this have already become manifest.

At the end of the month I mail to the parent of each pupil who is deficient a statement showing in just what studies that pupil has failed to reach the rank required for promotion. In this way we hope to keep the home and school in close touch with each other.

POST-GRADUATE WORK

We desire as far as lies within our power to give to every pupil the best possible preparation for his life work, and to this end every teacher is striving to the utmost from the time the pupil enters the first grade of the Grammar school until he is graduated from the High school.

By looking at the statistics given further on in this book you will see that 16 graduates out of a class of 22 have continued their education elsewhere.

Of the class of 1910, sixty-three per cent. went to other institutions; of the class of 1911, seventy-two per cent. I am trying to make that percentage one hundred.

From time to time, I learn of a parent who would gladly send his boy or girl to some higher school or college, but who dares not cherish the idea because of the expense. If any such read this report, I shall be very glad to have him talk the matter over with me. I keep in close touch with the boys and girls who go on and know quite well just how some have managed—financially—to go on.

It would be unfair to them for me to mention in this report any of the various ways and means employed by them, but to anyone interested sufficiently to call upon me in regard to this matter, I may be able to point out a way for some other boy or girl, and that is the important thing.

A few weeks ago a pupil who has been with me for nearly three years, in response to that oft-repeated question of mine, "What are you going to do with yourself?" replied, "I should like very much to go to Normal, but I can't afford it."

She was not aware of the fact that there is no charge for tuition at the State Normal schools, and that at the local normal school there is a loan fund for the benefit of such as need aid. She is now preparing to enter a normal school.

Parents and pupils need to understand clearly that there is always a way for every boy and girl, who is in earnest, to obtain an education.

Note this offer for instance: A Harvard graduate, who desires that I shall not give his name publicity, offers financial backing for one year at Harvard to any graduate of this school, who shall pass examination to that university. This gentleman states that if the student does good work during that first year there is no doubt whatsoever about obtaining the money for him to complete his college course.

Parents and pupils should remember that we have here in Massachusetts within a comparatively short distance from home, excellent professional and trade schools.

Respectfully submitted,

LOUIS M. BOODY.

REPORT OF THE COMMERCIAL INSTRUCTOR OF THE BARNSTABLE HIGH SCHOOL

TO MR. G. H. GALGER, Superintendent of Schools:

While it is true that to make the work of this department what it should be, more time is needed; yet, under present conditions, much has been done in previous years. Much more can yet be done along fundamental lines toward fitting the student to take his place in the business world.

To improve opportunities in any line of work, one should have, first of all, the right mental attitude toward that work; and in this connection it is encouraging to recall the earnestness of endeavor and the steadiness of purpose shown by the commercial division of the class of 1911, and to note that a number of those now with us seem to be gaining that active personal interest, that feeling of responsibility for the quality of their own work, as well as for the work of their class and school, which every member of such an institution should possess.

For a number of years, the New England High School Commercial Teachers' Association has asked influential business men to tell its members just what training they think young people should have to fit them for the life commercial. It is interesting and helpful to note their agreement on first essentials. "Teach them," they say, "to be truthful, punctual, thorough, economical, clean and accurate. Encourage them to dress neatly, quietly and suitably. Teach them to spell, to use correct English, to write with facility a plain business hand, to perform the ordinary arithmetical processes quickly, to concentrate, to acquire what some one has called "the art of being kind," or the expression of good-will toward others which we call courtesy, to do their work independently and quietly, with the least possible friction, and, above all, teach them "to think relatedly and with definite purpose."

So then, in the work of this department during the past year, we have tried to use the subjects taught as helps in gaining these fundamental qualities,—as opportunities for the exercise and development of a proper appreciation of the relative values of things, as well as for the acquirement of specific information.

This year the commercial arithmetic has been made a first-year subject. It is hoped that the time thus gained in the second year may next year be given to the work in English. In these classes much time and attention have been given to drill work on simple concrete problems. The pupils have been trying to explain clearly and truthfully the processes used in solving these.

In stenographic work the aim has been to give a solid foundation of principles, as large a working vocabulary as possible, and as much facility in the use of it as can be acquired by the students in the time available for this line of work. In the short course we offer the interesting cultural possibilities of the subject must of necessity be ignored.

The pupils have been taught the fundamental principles of accounting and given a working knowledge of their practical application. As an aid in securing neat and exact mechanical work and as a means of awakening a desire in the pupils to keep individual accounts, this study of book-keeping has been of indirect as well as of direct value.

The typewriting classes have had instruction in the care of the machines, and touch work has been insisted upon. The lessons have been varied as much as possible so as to give the student a general working knowledge of differing phases of the subject. The clerical work of the school, with that sent in from outside, has been of direct assistance in making this course of practical value.

During the past year no special drill in penmanship has been given, but this year we plan to use a part of the time at present assigned to first and second-year arithmetic and

to bookkeeping for work in this study, in accordance with the general plan calling for drill in penmanship in all grades.

Respectfully submitted,

LUELLA R. LYON.

REPORT OF THE PRINCIPAL OF THE ELIZABETH LOWELL HIGH SCHOOL.

TO MR. G. H. GALGER, Superintendent of Schools:

The membership of the Elizabeth Lowell High School is smaller than last year, as we have only twenty-seven pupils recorded on our register, but the attendance is much better than last year. The pupils have been very loyal in attending school during the many stormy days that we have had, and thus our school work has not been retarded.

Our Latin course of study is practically the same as last year, but we have made some changes in our English course. United States History is given this year, and great interest is being shown in this subject. Commercial or Business Arithmetic is being given to the Senior class. This study is certainly a practical one and ought to be a help to all who take it. Very often we meet men who say that the High School education is of no use and that it is time wasted, because High School graduates know nothing about Arithmetic. This course in Arithmetic ought in a measure to stop such adverse criticism, but even then, much still depends upon the pupil himself. We also have added a brief course in natural science for the first year class.

The equipment of our school has been greatly improved by converting the room upstairs into a first-class drawing room. This room now makes it possible for us to utilize both rooms downstairs for recitation purposes, while the drawing lesson is being given. In the laboratory room we have a new chemistry cabinet, which, when completed, will add to the appearance and usefulness of that room.

The working spirit of the school is much better than last year. We have been striving to make it plain that our High School has no place for loafers and idlers. The recent term examinations showed quite pleasing results.

Seven pupils gained honors by having ranks of 80 per cent. and over, while several others were close to that grade. The work in English has shown a marked improvement, both in composition and in oral recitation.

The pupils who have earned honors have been those who have studied at home. We repeat that home study is necessary in order to obtain noteworthy results. Daily study counts more than spasmodic bursts of diligence.

Very few parents have visited the school this year and we urge that more of them come in to see and hear the work that we are doing.

We wish to commend the faithfulness and hearty co-operation of our assistant.

Respectfully submitted,

LeROY M. HANDY.

REPORT ON THE TRAINING SCHOOL.

MR. GEORGE H. GALGER, Superintendent of Schools,

Dear Sir:

Ever since I have been connected with the schools of Hyannis, the teachers of the Training School have frequently expressed dissatisfaction with the noon hour conditions. Even when the weather is good quite a number of children find it impracticable to go home for dinner and when the weather is bad this number is considerably increased. The lunches eaten by these children are always cold and often unhygienic. These lunches were, at first, eaten hastily, with no thought of a table or of table manners. After this hasty lunch the children rushed out to play with no one to see that they did not get into quarrels and other troubles incident to the unsupervised noon recess. Gradually some of these things have been improved but still there is no provision for warm soup, which is so cheap, so easy to provide and yet so wholesome, or for a suitable place for eating the lunches and for playing games on stormy days.

During the current year Miss Crowell, our teacher of physical training and hygiene, has been devoting her noon hours to supervising the children and to studying their needs. This work has been entirely voluntary on the part of Miss Crowell and has been done because of her great interest in the problem. I have asked her to give to us the results of her observations in a brief report, which I take pleasure in submitting to you.

REPORT OF MISS CROWELL TO MR. BALDWIN.

My dear Mr. Baldwin:—

We have, on the average, twenty-four children who are obliged to bring lunches. On stormy days the number rises to about thirty-two.

Last year it was customary to have the children gather in one of the lower grade class-rooms under the supervision of one of the regular teachers. The children sat either at school desks or on benches with their boxes in their laps and ate almost in silence, it being impossible to allow much conversation in so widely scattered a group. As soon as a child finished eating, he was allowed to go out-of-doors to play and all were expected to finish and go out in time to give the teacher an opportunity to go home for lunch, after the necessary cleaning up had been done.

Such an arrangement was open to several objections. It cultivated the habit of hasty eating, a habit which reacted unfavorably upon both health and good manners; it brought the children to a meal with no thought of washing their hands or otherwise preparing themselves for it; it sent them out to play vigorously after a meal; thus interfering with digestion. On stormy days play in the basement, where dust from the cement floor filled the air, was another unfortunate and unwholesome feature.

When one considers that these same children are obliged to bring their lunches every day for nine years of their school life, it is evident that the training which the noon hour brings, good or bad, constitutes a very real part of their education.

For a long time it has seemed to me that the noon hour, instead of being a weak part of our school training, might be made the basis for valuable, practical lessons in hygiene. With this in mind I obtained permission from Supt. Galger and the School Committee to take charge of the noon hour.

It seemed to me highly desirable to approximate home conditions, at least to the extent of having the children sit at table.

In the attic of the Training School there is a large space about the central chimney, separated from the rest of the attic by a matched-board partition. We used this for a lunch room. Four oblong dining tables borrowed from

the Normal School were put together to form one long table capable of seating twenty-six. With this equipment the children were able to eat under conditions somewhat like those of a family table. Paper napkins, fresh every day, were put at each place to serve as individual table-cloths. The children were encouraged to converse quietly, to eat slowly and to observe ordinary table manners. When a child had finished eating and had asked to be excused, he washed his hands and dried them on his paper napkin before going to the game table on which were games loaned by the different children. After all had finished eating, a few more minutes were spent in quiet play and then all but two of the group went out to the playground. These two remained to put the room in order. This last duty gave opportunity to every child in turn to get some valuable lessons in housekeeping.

Gradually the attic became too cold and, since Christmas, we have been obliged to go back to our old custom of eating in one of the classrooms. The experiment upstairs lasted long enough for me to make some interesting observations.

First of all, I noticed a marked change in the rate at which the meal was eaten. On the first day, all of the children had finished eating within seven minutes. Under the influence of the atmosphere of leisure produced by being seated at table and being allowed to converse, the time occupied by eating was gradually extended to twenty and then to thirty minutes.

With the improvement in the rate of eating there came a corresponding improvement in table manners. The children who had been carefully trained at home helped to teach the others by example some of the commonest courtesies, such as refraining from talking when the mouth contains food, taking small mouthfuls and asking to be excused upon leaving the table.

In many cases the quality of the lunches improved. A few of the more thoughtful and intelligent of the parents had

been in the habit of providing for their children custards and other soft desserts instead of the proverbial bread and cake lunch, repeated day after day. Their example was followed by others so that quite a number of jars of milk and of soft food of various kinds appeared. The method of packing lunches improved in some cases, a paper napkin appearing where before the food had been packed in a bare tin pail.

The children had no warm food. Several of them expressed a desire for it and recently one girl from a good home has sometimes brought a thermo-bottle and distributed warm cocoa to a few of her friends. In spite of the lack of warm food the meal upstairs was, in many respects, home-like in character and much more healthful and refining in its influence than it had been in other years.

As the weather became colder, we tried to make ourselves comfortable by wearing outside wraps at table but we were finally obliged to abandon the third floor lunch room and go to one of the class-rooms on the first floor. The children are no longer gathered at one large table, so some of the family spirit is lost. There is not so good an opportunity for games as there was upstairs, so the children now remain sitting at table until half past twelve and then go out-of-doors at once. The clearing up is a much longer and more difficult process because of the non-movable furniture.

It seems to me that a great deal of benefit would come from having a special lunch room with movable furniture. The room in the attic could easily be transformed into a very comfortable lunch room. At present its matched-board walls extend only part way up to the roof of the school building and a skylight in the roof lights the room. If a glass cover were put over the top of the room and a stove connected with the chimney which is already there, we should have facilities not only for keeping the room warm but for heating food brought from home and possibly

for preparing at school and serving warm food, at cost, to those who wished to avail themselves of the opportunity.

In some schools it has been found possible to keep the price of soup as low as three cents a plate. If we could do this, it would bring the possibility of warm food within the reach of any child.

Respectfully yours,

ANNIE S. CROWELL.

The above report of Miss Crowell seems to present the matter very well as it now stands.

May I assure you that the Normal School stands ready to aid in any attempt on the part of your Committee or of the women of Hyannis in meeting the needs which are apparent to all who consider the matter carefully?

Very respectfully yours,

W. A. BALDWIN.

REPORT OF THE SUPERVISOR OF MUSIC.

TO MR. G. H. GALGER, Superintendent of Schools:

In accordance with custom, I submit through you, to the citizens of Barnstable my report of the work laid out and accomplished this year in Music.

We have endeavored to show that music can be correlated with all other school subjects. It has been our purpose therefore to point out the place of music in the general educational scheme; to demonstrate its value as a mental training; and to prove the artistic possibilities to which music may rise in our schools.

Music has two distinct places: the spiritual, which is elusive and intangible, and the formal, which is definite and exact. It goes without saying that the child, to be educated in music, must have a sufficient experience in both of these phases. Hence, there are two tests to be applied to his musical education, which are satisfactory and final, First: he shall sing his song as naturally as a bird flies, with the utmost freedom and grace. Second: that he shall read at sight and shall understand the construction of song.

REAL ART IS A UNITY

Music is the expression of emotions and feeling through the medium of certain forms and elements. Each of these phases—the spiritual and the formal—is a complement of the other and not a contradiction; and it is only by recognition of the separate functions of the two phases, and by their combined action in the training of the child, that he can be properly developed musically.

Some one has said: "In music every element has two conditions: It may be lifeless, inert, isolated; or living, as when several notes if grouped together make a melody."

A child may have a complete knowledge of "elements" and yet may remain unmoved by song, and absolutely insen-

sible to its inspiration. And it is this problem which has confronted us, the teachers of Barnstable. To teach art rather than mere technicalities, has been our work this year.

VOICE TRAINING

Of primary importance is the work of voice training. Every boy and girl in the schools of Barnstable has been given the opportunity to cultivate his or her voice, the speaking as well as the singing voice. And much stress has been laid on daily exercises to stimulate more perfect articulation, and correct placing of tone. One of the first steps in this direction was to instill into the minds of the pupils the importance of keeping the nasal passages clean and open, that deep breathing might be established.

For the benefit of the citizens of Barnstable who may be interested to follow step by step the work laid out and accomplished in each grade throughout the year 1911-12, I will give an outline of each teacher's work which, for the most part, has been successfully followed—where the work has not been done, it is owing to the necessary break involved in change of teachers.

Work accomplished in the 1st year of School:

I. SONGS BY IMITATION

The first thing we did with those of the first grade, was to teach them a song by note—a song all on one tone of the scale. The object of this method is to encourage the unmusical child and to prove to him that he can make the same sound that his neighbor, the natural singer, produces.

After the song is learned—and every pupil in the class can sing that one tone in bell-like quality, and in perfect rhythm,—a song on two tones of the scale is studied, in the same manner; then three tones, and so on until the whole eight tones of the scale have been mastered. By this time

every child in the class can sing the scale, and the objectionable monotone of the unmusical is eliminated.

II. RECOGNITION

The next step is the representation of the staff on the board. The songs already learned by note (imitation) are now put on the board for recognition, and sung at sight.

III. NOTATION

Scale songs and simple exercises in 2-4, 4-4 time are written on the board, and sung readily at this stage.

From the beginning—the very first lesson, in fact—we work for pure, “round” tone. With the upper grades we work unceasingly in this direction; but with our little ones we have only to watch carefully our own tones, for, children are little imitators—the child voice responds with charming frankness to the influence of its teacher. Hence, it behooves every grade teacher to make a study of and give special attention to the placing of her tone.

IV. RHYTHM

From the first the teacher has marked “time” by her own emphasis with pointer, or free bodily movements, which the children have unconsciously imitated; but at the beginning of the last half of the year come a few technicalities—a few fundamental principles to cover a large part of the ground already gone over. To “teach the thing before the sign” is a well-known principle of pedagogy.

A summary, then, of our first year’s work—the most important year of all—is as follows:

GRADE I.

A repertoire of art (or note) songs rendered with pure tone and proper expression; and an appreciation and understanding of all first-grade principles, i. e.: sight reading in 2-4, 3-4, 4-4 time.

GRADE II.

I believe the only new feature this year of the work of grade II has been the close following of Samuel W. Cole's methods in sight reading, which I consider exceptionally good. Our songs have been taken, for the most part, from Silver Song Series, No. I. Each song being prepared by a system of interval drill or "skips" which occur in the song. These skips are written on the board and practiced daily as a preparation for the reading of the song. When accuracy is accomplished, the song is dictated by the teacher, then written on the board, and sung by syllable.

The grade teachers express themselves as being agreeably disappointed with the results of this method, and are pleased to find, that in consequence of its correct teaching their second grade pupil can read at sight 2-4, 3-4, 4-4, 6-8 two-part music with great accuracy. Rounds, and two-part songs from the First Reader, together with daily drill of vocal exercises comprise the work of the second grade.

GRADES III and IV.

On account of the crowded conditions of the schools our third and fourth grades have studied together, consequently the work covered has been a review of third grade principles with the essentials of fourth grade.

The aim has been to develop an understanding of "tempo," an appreciation of rhythm; and a careful training of the ear. The writing of simple exercises in 2-4, 3-4, 4-4 time, and the writing of scales has been done with accuracy and intelligence.

The latter part of the year simple chromatics will be introduced.

GRADES V and VI.

Grades V. and VI. are for the above named reason taken

together. In this class we take up 6-part measure; and begin the study of chromatics in earnest. Three-part work is introduced; also compound time.

GRADES VII, VIII, IX.

While in grades VII, VIII and IX we are doing chorus work almost exclusively, still the teachers are untiring in their efforts at constant review of first principles. The development of the major scale, and the study of the minor mode together with a little elementary harmony and musical form comprises the work accomplished in these grades during the year.

The work of teaching music in the public schools is unquestionably a missionary movement, and no one should undertake it who is not prepared to give much time, thought and effort over and above that for which he is paid. The nature of the work calls forth the best that is in one. To realize that only about one per cent. of the population of our United States has a formal education beyond the age of 14, and that the musical instruction that is given during this period is, for most people, all the training that they ever receive on the subject—to know this spurs one (who loves his art and loves also his fellowman) on to working with one's whole soul to establish in the hearts and minds of the coming generation the love for, and appreciation of the greatest of all the arts—Music.

Excepting, perhaps, for the work done by the High Schools, which have so little time to devote to music, I can cheerfully state that I am satisfied with the results of our year's labors, and I wish to thank my fellow teachers, individually and collectively, for their faithfulness in carrying out my ideas; and for their hearty response to my demands.

To the Principal of the Barnstable High School and to our Superintendent I can say only that their appreciation

and sympathetic co-operation have proved a stimulant to me, and hence a promotion to the work.

Respectfully yours,

FRANCES LOUISE STOCKTON.

REPORT OF THE SUPERVISOR OF DRAWING

TO MR. GEO. H. GALGER, Superintendent of Schools :

Last year's record in drawing was marked by increased power and interest on the part of the pupils and by the efficient and cheerful cooperation of the teachers.

Progress has been seriously retarded in several schools by the long continued presence of scarlet fever and whooping cough. Drawing cannot be given by absent treatment and children who are kept from school by illness or who lose weeks during the cranberry season can not keep pace with their class-mates. An unusual number of changes occurred among the teachers, and such changes are rarely without effect on the drawing. New teachers who propose to stay soon adapt themselves to existing conditions. But this work suffers in the hands of substitutes or teachers without knowledge of drawing. The skilled teacher can do good work without the supervisor, and half the supervisor's strength is in her teachers.

Too great stress cannot be laid upon the value to the child and to the community of retaining well trained, broad-minded teachers,—men and women who know the conditions of rural schools and can adapt themselves to their environment and grasp its splendid possibilities of service.

I have stated in previous reports that it is a delight to teach the responsive children of this town. As I watch these boys and girls continuing their studies in higher institutions or beginning to do the world's work, I am moved to beg that they shall be in no way handicapped by deficient preparation for the strenuous life of our times. Give them a chance to enter the twentieth century arena able to compete with the city-bred student or worker. Times have changed and their demands must be met.

I believe that parents are more vitally interested than educators in the problems of readjustment now confronting

us and that it is the duty and privilege of parents to aid in settling what are the essentials that must be taught in our schools. Are there not ways and means by which in most country homes the work of the school can be strengthened and extended and the home and school brought into closer relations?

One hour and a half per week is allotted for drawing, and all this time is needed for drawing itself and for working out its problems,—that is making simple objects in wood whenever this can be done by the boys or by the use of ornamental designs by the girls for practical purposes in the home.

Can an additional hour per week be taken from the more abstract studies for teaching sewing and the use of carpenter's tools, as is done in Yarmouth?

Our present handicraft work is done in November and December. Then the drawing periods in every grade are devoted to the making of interesting objects. The excellence of these objects depends upon careful planning, accuracy of execution and upon the taste and skill shown whenever lettering or simple ornament can be properly added. The results last December were gratifying, showing in many cases marked gain over the work of preceding years and justifying the outlay of time and strength.

Bench work at Barnstable was resumed last winter through the interest of the principal, Mr. Hopkins. Boys take turns in working with him while the supervisor gives the drawing lesson to the remainder of the class.

A work bench and model stand have been made and a tool cabinet is now being built. This work has been carried on with enthusiasm and a good degree of success in spite of difficult conditions. Cotuit grammar school has a room well adapted for wood-work, waiting for a complete equipment. Last spring a bench was made and some good work done by each boy and girl in the grammar school with the few tools provided.

Systematic instruction could be profitably given in this building under its present principal.

The room over the hall in the Cotuit high school, has been fitted up for drawing and bench work and when it is completely furnished we can state with pride that very few country high schools can offer as good opportunities for work in the manual arts as the Elizabeth Lowell school.

Barnstable high school this year sent its students who had specialized in drawing to Wentworth Institute and the Normal Art School, where all are making good.

At present all the Barnstable high school pupils who are required to study drawing are working with interest and enthusiasm. The members of the junior class who elect drawing have done good work in applied design, and the seniors are enjoying a course in picture study. Our present teacher of science expects each pupil to draw readily the picture or diagram needed in zoology, chemistry or physics.

This demand for **clear truthful drawings to illustrate the structure and growth of natural forms** presents drawing in a new light to many in the entering class and emphasizes its practical value. Pupils begin to realize that drawing is a necessary means of expression for every student of science, and to work accordingly.

All pupils who have any thought of entering a normal school should review drawing in their senior year. This was one of the conclusions of our late and lamented director of manual arts, Mr. Frederic L. Burnham, and its wisdom is evident to all who know the place that drawing holds in the normal schools today.

Our experiments with our limited equipment for manual training in the basement of Barnstable high school have proved that the average boy needs **systematic instruction** in the use of tools.

Most of the boys who have had no such instruction have used tools more or less all their lives, yet few of them

see the need of making exact plans before they begin to work, of laying out their work with accuracy, **of working to a line**, or saving stock. "About right" satisfies them. They need thorough training, systematic instruction, that breaks up slipshod habits and teaches that right is right.

Inexpensive arrangements could be made by which regular lessons could be given in this large well lighted basement.

Might not the proper introduction of this form of manual training go far towards solving the problem of the first year boy in the high school?

Last spring prizes were offered by Mr. James Otis for excellence in mechanical and free-hand drawing in all classes in which drawing was required. These were awarded as follows:

First year: Mechanical drawing, Harrison Ray Doty; Freehand, Ralph Milliken.

Second year: Mechanical, Manuel Suzan; Freehand, Doris Chase.

The influence of this offer was felt by every pupil in these classes and better average work resulted.

With hearty thanks to all fellow workers whose courtesy and cooperation have aided the work of this department this report is

Respectfully submitted,

LUELLA FAY MAYNARD.

G. H. GALGER,

Secretary School Committee.

December 31, 1911.

BOARD OF EDUCATION.

The School Board consists of three members, one of whom is chosen annually. The Statutes of the State define the powers and duties.

REGULAR MEETINGS.

The regular meetings of the Board occur monthly.

SPECIAL MEETINGS.

Special meetings of the Board may be called by a majority of the Board, or by the chairman.

OFFICERS OF THE BOARD

The officers of the Board shall consist of a Chairman, a Secretary, and such other officers and special committees as may be necessary.

These officers shall be chosen at the first annual meeting each year.

THE CHAIRMAN OF THE BOARD

shall preside at the meetings of the Board, and perform such other duties as usually pertain to that office.

In the absence of the Chairman his powers and duties shall devolve upon a chairman pro tem.

DUTIES OF THE SECRETARY.

He shall act as scribe at all meetings of the Board and shall keep suitable records of all their proceedings. He shall prepare a statement of all debts, moneys raised by the Town, or received from other sources, paid by the order of the Board, and furnish the Superintendent with the same for publication in his annual report, and together with the Superintendent constitute the Examining Committee.

ORDER OF BUSINESS.

The usual order of business of the Board shall be as follows:

1. Reading the records of the previous meeting; or the call, if a special meeting, and the records.
2. Reports of Committees.
3. Unfinished business.
4. Report of Superintendent.
5. Report of Secretary.
6. Other business.

(Approved by the School Committee December 23, 1893, and December 19, 1908.)

REPORT OF SEALER OF WEIGHTS AND MEASURES.

The following inventory will show the amount of state and town property in my custody on December 31st, 1911:

Standards furnished by the state and used only for testing sealer's working equipment, comprise the following: One large standard balance, one set steel weights, from 5 to 50 lbs; one set brass weights from 1-16-oz. to 4 lbs.; one set dry measures from 1 quart to 1-2 bushel; one set liquid measures from 1 gill to 1 gallon; glass slickers; 1 standard yard measure. Total value about \$275.

SEALER'S WORKING OUTFIT

One portable balance (in case); one set brass weights (in case), from 1-16 oz. to 4 lbs.; one set iron weights, 5 to twenty-five lbs.; 20 iron weights, 50 lbs. each, for testing coal scales, etc.; one nickel hanging weight; one set metal dry measures from 1 qt. to 1-2 bushel; one set metal liquid measures from 1 pint to 1 gallon; one metal yard measure; one glass graduate; one vise; one portable drill; one anvil; seal press twist drills; steel dies; cut pliers; punches; lead scale; lead wire, receipt and record book, valued at approximately \$300.

SUMMARY

Summary of year's work ending Dec. 31, 1911:

Platform Scales, capacity over 5000 lbs., adjusted 2; sealed 10; condemned 1.

Platform Scales, capacity under 5000, adjusted 13; sealed 35; condemned 3.

Computing Scales, adjusted 3; sealed 21; condemned 4.

All other Scales, adjusted 17; sealed 77; condemned 23.

Weights, adjusted 126; sealed 358; condemned 11.

Dry Measures, adjusted 8; sealed 86; condemned 8.

Liquid Measures, (other than milk jars), sealed 199; condemned 6.

Linear Measures, sealed 27; condemned 15.

Total number of articles tested 884; sealed 813; condemned 71.

Total amount of fees collected \$60.32, paid to Town Treasurer Dec. 31, 1911.

Respectfully submitted,

SAMUEL N. AMES, Sealer.

HISTORY OF THE ALMSHOUSE

To the Overseers of the Poor and the Citizens of Barnstable:

Realizing that few of the people of Barnstable know anything of the history or management of the Almshouse, perhaps a brief sketch may be of interest to them.

One hundred and fifty-eight years ago there lived in Barnstable a young man who, though feeble in body, but strong in mind, according to his will made Nov. 13th, 1754, gave to his sister, Sarah Cloghan, 66 £, to his pastor, Jonathan Russell, 5 £, and to his loving neighbor, Wm. Ebenezer Childs, 5 £, and named him as his executor. These amounts were to be paid from his personal property; his real estate he gave to the Town of Barnstable for the support of the Poor "from one generation to another forever" and never to be sold. So by the will of the young man, Parker Lumbart, who died Dec. 27, 1754, the property became an Almshouse one hundred and fifty-eight years ago.

The Farm extends from the brook crossing the Osterville and Cotuit road south of the Railroad Station to the creek in the great marshes called the "Town Dock." Much of the Farm is swamp and meadow land—about twenty acres are cleared land and cultivated as pasture and grass land.

The soil is a heavy clay and suitable for hay only. A good garden is maintained yearly. The stock of the Farm consists at the present time of one horse, three cows, two hogs, and about eighty hens, and the product from the cows and hens is all the income received.

The barn, sheds and other buildings are convenient and substantial.

The house, as near as can be learned, is not the original in which Mr. Lumbart lived—the original stood more to the north, and the present house was built about a hundred years ago. It is solid and in good repair and consists of twenty-five rooms. The Inmates' part consists of dining-room, sitting-room, kitchen, washroom and sixteen sleeping rooms with eighteen beds.

In 1911 the Overseers installed one of the best water plants to

be had—a two-horse power Fairbanks & Morse gasoline engine and a Gould double acting pump forcing the water from a driven well in the basement to a tank in the attic holding six hundred and twenty gallons. From there it runs through brass pipes to all parts of the house, supplying two bathrooms, two closets, three lavatories and a long sink where the Inmates wash.

In the last year the house received two good coats of paint and was thoroughly repaired, and it is today in a good and attractive condition.

The House is under the care and supervision of the Overseers, and kept by a Warden and his wife as Matron, who have been here five years. It is also inspected the first of each month by the house physician, J. Haydn Higgins, who is a member of the Board of Health, and by the State Inspector, Francis Bardwell of Sherborn, annually.

Outside of those mentioned above, the Inmates have received only fourteen visitors during the year, although fourteen of them have relatives in town.

The Inmates are well cared for, supplied with warm clothing, good beds and plenty of good wholesome food. The Overseers have always been ready to co-operate with the Warden, helping him in every way possible, and are more than generous in their supplies, and it gives us great pleasure to know that the House as a whole stands first in the State.

There are many days that are looked forward to by the Inmates as "Red Letter Days"—they are the Fourth of July, Thanksgiving and Christmas, when the Inmates are remembered by their friends and especially by the King's Daughters of Hyannis, who never forget them.

Religious services are held every last Sunday in the month, and are looked forward to with great anticipation. But little sickness has visited the house during the last year. In the early spring one old lady, eighty-four years of age, had pneumonia, but she is in good health now.

As a whole they are as happy and contented as it is possible to be away from home and friends.

The statistics are as follows:

Whole number of Inmates for 1912	22
Largest number at one time	17
Smallest number at one time	13
Present number	16
Average number	14+

Ages:

Between 80 and 90	5
“ 70 “ 80	4
“ 60 “ 70	3
“ 50 “ 60	3
“ 40 “ 50	1

The average number of Inmates in the State is eight and the average salary paid the Warden is \$480 and taking twenty houses whose town population is eight thousand and less, the general expense of this house is only \$36 above the average, although our average of Inmates is almost double. The cost of board for each Inmate taking the expense of 1911 as a basis is \$3.44 per week, less than many other smaller houses.

Taken as a whole I think the Barnstable Almshouse is an institution in the Town of which the people should be proud.

ALEXANDER B. CHASE,

Warden

The Auditors, as heretofore, recommend that *all bills be itemized* before being approved and paid.

A. F. EDSON,
JOHN BURSLEY,
WALTER B. CHASE,
Auditors.

MILK INSPECTOR'S REPORT

Marstons Mills, Jan. 28, 1913

To the Board of Health of Barnstable,

Gentlemen :

It once more becomes my duty to report to you, my work on Milk inspection.

There has been one conviction for selling watered milk.

There have been 39 cow stables white-washed, and 15 new windows added.

I have issued 168 licenses, and have made 255 dairy inspections.

Too much praise cannot be given the sediment tester you allowed me to buy. If the average layman is told of the number of bacteria in a certain quantity of milk, it is hard for him to realize its importance.

But when I can go to the back of a man's cart, and in one minute, with the tester can show him how much, or how little dirt there is in his milk, it is something that he can see, and fully appreciate; and as milk is considered the dirtiest food that is taken into the stomach, we should try to have it as clean as we can, and that is what I am trying to do for the town.

A state inspector has visited the town twice; and visited several of the dairies each time.

After the second inspection, he reported to the State Board of Health an improvement of 21 per cent. over the first; showing that the milk conditions are improving, and that by education, rather than coercion.

It seems that there is some simple method by which the consumers could be taught the value of milk as a food. And when it is fully understood how much cheaper it is than most other foods we buy, food value considered, there will be much more milk consumed than there is today.

Many people have the idea that when milk has been skimmed, that about all of the food value has been taken away; but only the fat has been removed, which is a small part of the food value, and many people who cannot drink whole milk, might be able to drink skimmed milk, and it be very beneficial to them.

Very respectfully,

GEO. T. MECARTA,

Milk Inspector

FOREST WARDEN'S REPORT

Report of Forest Warden for year 1912 :

Month	No. of Fires	Cost of Fires
January	2	\$3 50
February	1	2 00
March	6	74 92
April	6	34 76
May	4	20 85
June	6	62 44

J. C. BEARSE,

Town Clerk.

REPORT OF THE SCHOOL COMMITTEE

To the Citizens of the Town of Barnstable:

We respectfully submit the following report on the Public Schools, prepared by the Superintendent and Secretary, for the year ending December 31, 1912:

Z. H. JENKINS,
J. MILTON LEONARD,
EDWARD C. HINCKLEY.

ORGANIZATION OF THE SCHOOL BOARD

<i>Members</i>	<i>Term Expires</i>	<i>Residence</i>
ZEBINA H. JENKINS,	1914	West Barnstable
J. MILTON LEONARD,	1915	Osterville
*EDWARD C. HINCKLEY,	1913	Hyannis
G. H. GALGER, Superintendent of Schools, Hyannis		
Chairman of Board—Zebina H. Jenkins		
Secretary of Board—G. H. Galger, C. C. Tel., 16-7		
Auditing Committee—Z. H. Jenkins, J. M. Leonard, Edward C. Hinckley		

*Elected March, 1912; Heman B. Chase, resigned

Committee on Examination of Teachers—Superintendent.

Purchaser of Books, Apparatus and Supplies—Superintendent.

Special Committee in Charge of School Buildings at Centerville and Hyannis—Edward C. Hinckley.

Special Committee in Charge of School Buildings at Barnstable, West Barnstable and Marstons Mills—Z. H. Jenkins.

Special Committee in Charge of School Buildings at Cotuit, Santuit and Osterville—J. M. Leonard.

Committee on Transportation of Scholars to High Schools—Z. H. Jenkins, J. M. Leonard, E. C. Hinckley.

Truant Officers—Geo. A. Smith, Barnstable; John Bursley, West Barnstable; J. Albert Grigson, Cotuit; John J. Harlow, Santuit; James N. Rogers, Osterville; E. W. Childs, Centerville; I. J. Green, Marstons Mills; Geo. F. Hart, Hyannis.

CALENDAR, 1913

The High Schools begin Jan. 6, and continue 12 weeks; April 7, and continue 12 weeks; the first Tuesday after the first Monday in September, and continue 16 weeks.

The Training School, in the commencement and continuance of its several terms, unless otherwise ordered, is subject to the Normal School calendar, except that in the Fall it commences September 15.

All other schools begin January 6, and continue 12 weeks; April 14, and continue 10 weeks; Sept. 15, and continue 14 weeks.

Calendar subject to change.

SUPERINTENDENT'S REPORT

To the School Committee of Barnstable:

In accordance with the rules of the School Committee, I have the honor to submit my eighth annual report on the public schools, for the year ending December 31, 1912, the same being the twenty-second in the series of Superintendents' reports.

SCHOOL BUILDINGS

REPAIRS ACCOMPLISHED.

Centerville—Ceilings scraped and painted, fences repaired, etc.

Hyannis—High School building, external trimmings painted, about 2200 square feet of steel ceiling put up in assembly room, ell shingled, engine repaired, laboratory cabinet constructed, plumbing, and additional furniture. Training School, external trimmings painted, engine repaired, plumbing and minor repairs, additional furniture.

Cotuit—Elizabeth Lowell building, external trimmings painted, laboratory cabinet constructed, etc. Grammar School building, sheds shingled and minor repairs.

West Barnstable—New grounds graded, additional furniture, minor repairs.

Barnstable Village—Minor repairs, additional furniture.

Santuit, Marstons Mills and Osterville—Minor repairs.

Included under "Repairs" are all expenditures for ordinary repairs, cleaning buildings, janitors' supplies, and school furniture. The expenditures for the several sections will be found in the financial report of the Secretary.

REPAIRS NEEDED.

Repairs and improvements are needed, as indicated in previous reports, in Cotuit, Centerville, Marstons Mills and the Training School.

BARNSTABLE VILLAGE AND OSTERVILLE

The most important advances in school facilities for many years were accomplished during the year at Barnstable Village and at Osterville.

The school building at Barnstable village was entirely reconstructed. The roof was extended and raised to two stories in the front, the entire interior remodeled, four rooms, three finished, replacing two, an additional stack built, a second furnace and a small steam heater installed, the original basement deepened and a second basement built for the girls. The building is now well lighted, heated and ventilated, conforming to all legal requirements. The inauguration of an intermediate school, made possible by the third room, is already proving its value.

The new four-room school building at Osterville is, without doubt, by far the best constructed building of its kind in the county of Barnstable. The design of the building, the quality of the work and materials, its complete equipment, fulfilling the most modern requirements, mark an era in the school history of the town of Barnstable. Should the work of the boys and girls show as great an improvement as does the new building over the old, the town will be repaid many times over for its expenditure.

TRANSPORTATION

The increased expenditures for transportation were due chiefly to an increase in the number of train scholars and increased cost of service on the Cotuit-Santuit, West Barn-

stable, and Hyannisport routes. Few complaints have been received during the year.

ENROLMENT, ATTENDANCE, ETC.

The total enrolment for 1911-1912 showed a slight decrease from that of the preceding year, while the percentage of daily attendance showed an increase. But little truancy occurred during the year, one village which has given much trouble in that direction in the past, showing a marked improvement.

The enrolment for the fall term of 1912 was considerably greater than that for the same period in 1911. The present membership of the lower grades is about twenty-five per cent. greater than that of six or seven years ago and points to an increased membership in the upper grades in the near future.

RESIGNATIONS AND APPOINTMENTS

Resignations the past year were fortunately relatively few, but as was to be expected, they were from teachers of marked ability and success. The teachers who either resigned or declined re-election were Le Roy M. Handy, Elizabeth Lowell High School; R. B. Houghton, West Barnstable Grammar School; Mary McConnel, Centerville Primary School; Mabel R. Coombs, seventh grade, Training School; Frances L. Stockton, Supervisor of Music. Mrs. Addie G. Crosby of Osterville, who for more than thirty years had given splendid service to the town, applied for and was granted a year's leave of absence.

The following teachers, trained as indicated, were appointed to fill the above vacancies:

B. W. Sanderson, Bates College, Elizabeth Lowell High School; Taintor Parkinson, Dartmouth College, West Barnstable Grammar School; Mindwell A. Littlefield, Hyannis Normal School, Centerville Primary School; Russell Scott,

Oxford University, seventh grade, Training School; M. Genieve Leonard, Hyannis Normal School, Osterville Primary School; Sylenda B. Morris, New England Conservatory of Music, Supervisor of Music. Ellen J. Ormsby, Hyannis Normal School, was appointed teacher of the newly organized intermediate room at Barnstable village.

All the new appointees had had professional training and successful experience.

REPORTS OF SUPERVISORS AND PRINCIPALS

Attention is called to the reports of the various supervisors and principals. "On the firing line" daily, and in direct contact with the pupils, they know intimately the conditions and needs of their several departments.

SCHOOL FINANCES

The close of the fiscal year of 1911 showed an unexpended balance of \$231.90 in the school department. 1912 shows a deficiency of \$792.77, due to expenditures for repairs and for fuel considerably exceeding the estimates.

SUMMARY OF RECEIPTS AND EXPENDITURES, 1912.

	Total Available Appropriations	Expenditures	Balance or Deficiency
School Purposes,	\$25,221 61	\$25,288 39	—\$66 78
Text-books and supplies,	1,600 00	1,598 03	+1 97
Repairs,	1,500 00	2,034 51	—534 51
Transportation,	4,650 00	4,843 45	—193 45
Totals,	<u>\$32,971 61</u>	<u>\$33,764 38</u>	<u>—\$792 77</u>

ANALYSIS AND ESTIMATES.

In spite of an excess expenditure for fuel of \$580.15 over

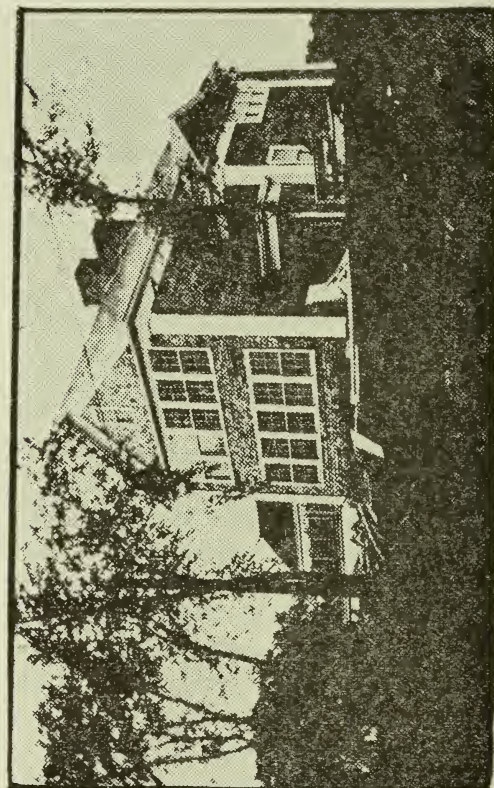

the estimate, the total expenditures for "School Purposes" overran the amount available by only \$66.78. That a larger deficiency did not occur was due to the fact that the miscellaneous receipts (dog tax, tuition, etc.), exceeded the estimates by \$221.61, and that no attempt was made to make the small increase in the salaries of grade teachers of three or more years' service suggested in last year's report.

An unexpended balance of \$1.97 remained from the appropriation for "Text-books and Supplies."

The excess expenditure of \$193.45 for "Transportation" was due to the causes mentioned under that head.

The regular salary schedule for the elementary schools is at present as follows:

Grade teachers; first year \$405, second year \$450, third year and after \$495. Grammar principals; first year \$675, second year \$720, third year \$765. The schedule is not ironclad. Under this schedule five teachers became entitled to an increase of \$5.00 per month last September. Outside the schedule the salaries of two grammar principals and one grade teacher were increased \$5.00 per month, and that of the sub-master at the high school \$7.50 per month. These increases, and the employment of an additional teacher on full time at Barnstable village, will call for a total of about \$550. Three weeks to be made up at Barnstable will call for about \$140, while salary increases for janitors at Barnstable village, Osterville and Santuit will amount to \$300, giving a total of \$990 as the probable gross increase for "School Purposes." From this should be deducted a possible decrease of \$75 for miscellaneous expenses and of approximately \$250 for fuel, leaving as the probable net increase needed for "School Purposes," \$665. The appropriation last year was \$24,000. It is impossible to estimate with any degree of accuracy the probable expense for fuel. The new buildings at Osterville and Barnstable will undoubtedly consume more coal than the old. The estimate of \$2,250 as the expense for fuel for the present year is probably a

THE REMODELED SCHOOLHOUSE AT BARNSTABLE

minimum, and is based on the assumption that the railroad-coal combine will graciously omit the creation of an artificial "shortage" next winter.

The amount needed for "Text-books and Supplies" will be the same as last year, \$1600.

At the present rate for barge service and the increased cost per head for railroad transportation, it is probable that close to \$5000 will be needed for "Transportation" this year. The new regulation in regard to commutation tickets will add about 10 per cent. to their cost.

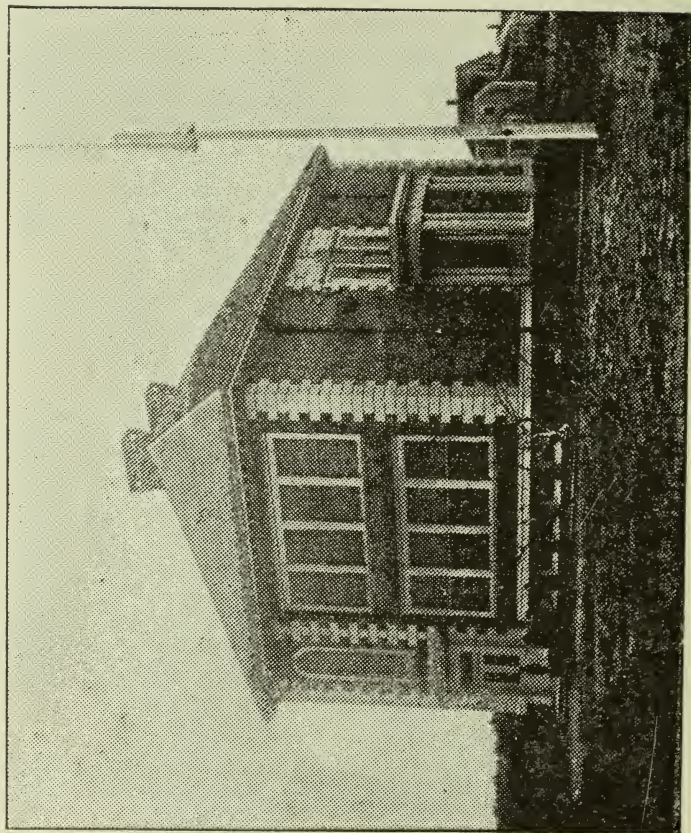

The amount needed for ordinary repairs will be determined at the annual town meeting.

RANK OF BARNSTABLE IN SCHOOL APPROPRIATIONS

In the tax for schools, per thousand dollars of valuation, the rank of Barnstable is two hundred twenty-fourth, 223 other towns in the Commonwealth taxing themselves more heavily. The expenditure for text-books and supplies is \$1.75 per pupil, the average expenditure of all other towns in the county being \$2.39 per pupil. The figures are derived from the state records of 1911, the latest available at the time of writing. The expenditure of the Town of Barnstable per pupil for books and supplies during 1912 was \$1.97.

AN ESSENTIAL REQUIREMENT FOR MAINTAINING GOOD SCHOOLS

With slowly but steadily increasing expenditures in the school department it is neither a pleasant nor popular task to advocate any action tending to a further increase, however slight. But elementary justice requires a plain statement of certain facts vital to the continued well-being of our schools. Many of our teachers are paying full city rates

THE NEW FOUR-ROOM SCHOOLHOUSE AT OSTERVILLE

for board, while clothing and all other necessities of life are abnormally high. Teachers must live fifty-two weeks a year, while profitable summer employment is open to only a very few. Their rate of pay should involve the same considerations as obtain in other skilled occupations in which it is not possible to work during all the months of the year. Our minimum salary for our grade teachers is below a living wage, our maximum barely such. The town of Barnstable has kept well to the front among the other towns of the county in increasing from time to time the wages of the grade teachers, but the original salaries were so abnormally low that we have not yet reached the point where we can afford to stop. One has only to know the kind of work done and influence exerted by our teachers who have been longest in service to realize that the retention of good teachers is far and away our most vital and our most difficult problem. It must be solved, even at considerable sacrifice, if we are to do our simple duty to the boys and girls who are directly dependent on us for the means which are to enable them to face the problems of life effectively.

PROGRESS OF THE SCHOOLS

Real progress in most rural schools is so slowly made that it is difficult in annual reports to avoid a large amount of uninteresting repetition.

During the year the tendency to concentrate on the fundamentals, so-called, has been further developed and some improvement in concrete results has been shown.

The course in arithmetic has been more closely followed, with more uniform results.

Much attention has been given to penmanship, the work in the commercial department of the high school being especially thorough.

Spelling is taught from the words in daily use by the

pupils, supplemented by the "Boston Word List," "Spaulding and Miller's Speller" and "Aiton's Descriptive Speller," and tests given seem to indicate fair proficiency, in spite of occasional grotesque misspellings of common words.

The system of reading now in use is gaining in popularity with the teachers and in the quality of the results obtained. In upper grade reading no essential changes in content or methods have been made.

Prince's Practical English Grammar has been adopted for the eighth and ninth grades. Mr. Prince's long and intimate acquaintance with actual school conditions and school limitations and his exceptional clearness of thought and directness of aim are reflected in the qualities of his text-book, and it is hoped that its intelligent use will lessen the causes for complaint, which, from time immemorial, high school teachers have alleged to exist. Just what constitutes a reasonable grammatical equipment for a grammar school graduate, however, is a question which even the Supreme Court itself might well approach with fear and trembling.

Following in general the plan of the "Committee of Eight," in its report on the study of history, Gordy's "American Beginnings in Europe" has been adopted for the seventh grade. The scheme is a somewhat experimental and difficult one and its successful accomplishment will call for a high degree of skill and a large fund of common sense in the teacher. No subject is more difficult to teach well and none more important to good citizenship to so teach than history, and that, and its allied subject, civics, should receive far more effort and thought than are commonly given them.

MUSIC AND DRAWING

The splendid work of our Supervisor of Drawing, extending its influence far beyond the technical limits of her sub-

ject, is too well known to grateful pupils and parents to need any words of commendation here.

Progress in music is greatly interfered with by the constant change in instructors. The work is extremely hard and we are able to retain competent supervisors only a year or two at most. Our present Supervisor is trying hard to unify the work throughout the town and is receiving the hearty co-operation of the teachers.

THE STATE BOARD AND RURAL SCHOOLS

One of the most vital factors making for progress in our rural schools is the work of the present State Board of Education. Long and valuable training and experience, and personal investigation of rural school conditions, have made it possible for the Board to render most effective service in the direction of suggestions for improving and strengthening our country schools all along the line. The various courses of study, carefully prepared under the direction of the Board, by practical school workers, promise to be of high value to teachers in their daily work and in obtaining more uniform and satisfactory results than have been possible in the past. These courses are being gradually adopted by our Barnstable schools, with such modifications as local conditions seem to demand.

THE MOST VITAL DEFECT IN THE RURAL SCHOOL PROGRAM

Education for good citizenship involves three fundamental aims, namely, to secure to the individual

Physical health and strength,

Mental and moral power,

Ability to earn a livelihood.

That the first two aims are directly the work of the public schools all agree; as to the third some difference of

opinion exists. Yet the ability and the will honestly to earn a livelihood constitute the first essential of good citizenship and public safety. Under modern conditions, however, few industries and still fewer homes offer to children the kind of systematic training leading to such ability. Our young people must obtain such training in the public schools or postpone it beyond the time when it can most effectually be given, and suffer thereby a lifelong handicap. Many city schools, forced by strong social and economic pressure and by the law, are providing such training in varied forms, but the great majority of country schools, deadened by the inertia of custom and crippled by financial stringency, are doing practically nothing in this direction. Yet in many country communities, the support of public sentiment once accorded, something of real value could be done, though the work would have to be simple, confined to a few lines and inexpensive. Refusing such training deprives the country boy and girl of one of their most important and fundamental rights and makes for individual failure and inefficient citizenship.

MEDICAL INSPECTION

Besides performing his regular duties as School Physician with his accustomed faithfulness, Dr. J. Haydn Higgins has given particular attention the past year to the individual child manifesting abnormal features, whether mental, moral or physical, and his careful diagnoses and wise advice to teachers and parents have resulted in treatment of a most helpful and promising character in the case of many children whose future has heretofore seemed most dubious. Under the influence of school physicians, schools generally are giving much more thought and effort than in the past to questions of practical hygiene and the treatment of "defective" children.

AN INTERESTING EXPERIMENT

An experiment, which may prove an aid in solving the difficult problem of maintaining, among those staying at home, vigor, enterprise and efficiency, in a community constantly losing a large proportion of its most energetic young men to the cities, is now being tried in the town of Harwich. An Agricultural High School Department has been established. Five towns contribute pupils, and financial and other aid is received from both the state and national governments. An outline of the work offered is given below:

OUTLINE OF COURSES IN THE AGRICULTURAL DEPARTMENT OF
THE HARWICH HIGH SCHOOL.*A. Agricultural Science.*

This Course consists of a broad general text book study of agricultural principles and practices. The topics include the composition and structure of plants and animals, their growth, improvement, feeding and management; the chemical, physical and biological properties of soils and fertilizers; the origin of soils and the maintenance of soil fertility; horses, cattle, sheep, swine, poultry; cereal, forage and fiber crops; fruit and vegetable growing and forestry, insect pests, plant diseases, farm management, the farm home and community.

Two or three text books will be covered during the four years' course.

B. Project Study.

1. Kitchen Gardening—An elementary course, serving as an introduction to the more advanced courses in plant production. A study of the location, soil requirements and plans of a garden; seed selection, seed testing, choice of varieties, planting, fertilizing, and cultivation of fruits and vegetables adapted to a family garden. Attention will also be given to Ornamental planting and home improvement such as improvement of lawns, planting of shrubbery, and shade trees, flowering plants, construction of hot beds, etc.

This course will be given even years ending 1912, 1914, 1916, etc. It will alternate with the course in Poultry which is given odd years.

2. Poultry—A course introducing the study of domestic animals. Poultry rearing as a business, breeds, breeding, incubation, brooding, rearing, feeding, fattening, killing, picking, packing and marketing of poultry and poultry products. Poultry buildings and equipment, home grown crops for poultry, kinds, quantities, seeds, soils, rotations, tillage, harvesting and storing. This course will be given odd years ending 1913, 1915, 1917, etc.

3. Commercial Fruit Growing—Orcharding and small fruits not before dealt with. Soil and climatic adaptations, varieties, propagation, planting, pruning, spraying, picking, grading, packing, storing and marketing of fruit.

Market Gardening—A study of the important vegetable crops adapted to the region, their requirements, adaptation, varieties, culture, enemies, harvesting, storing, marketing, seed selection and improvement.

Farm Machinery—Implements and buildings used in Fruit growing and market gardening, their cost, construction and use.

These courses to be given to Juniors and Seniors in even years.

4. Farm Animals—Horses, cattle, sheep and swine; judging, breeding, feeding, management, sanitation and disease. Milk production, testing, handling, and marketing.

Farm Buildings and Equipment—Conveniences, plans, construction and upkeep.

Farm Crops—Cereal and forage crops for feed, and for sale, rotations, cultivation, harvesting, etc.

Farm Mechanics and Engineering—Purchase, operation and care of farm machinery including gasoline engines, outfits for water supply and sewage disposal, concrete mixing and construction, elementary surveying and mapping the farm.

Farm Management—This course considers the farm as a whole, and the relation of the different enterprises such as fruit growing, gardening and stock raising to one another; types and systems of farming, selection and purchase of a farm, forms of tenure, layout of farm, amount and distribution of capital, cost accounting, efficient use

of labor, machinery, and horses, preparation and plans for the organization and management of specific farms.

This enterprise will be watched with friendly interest by well-wishers of the future of the Cape.

HIGH SCHOOLS

The intense and earnest endeavors which have characterized the work of our high school teachers the past year have not been without result and there has been a noticeable increase in seriousness of purpose and power of application on the part of a large majority of the pupils.

The reconstruction of the high school program is proceeding slowly. At Hyannis, beginners are offered four years of Latin or German or of both. The present French classes will take the French planned for originally, possibly more. The freshman class will have one term of general history. The vexed problem of the first year's program is not yet satisfactorily solved; educational authorities differing widely thereon. Its solution will be a matter of experiment and time.

Through the inspiration of their instructors and by the co-operation of parents a notable proportion of the graduates of the Barnstable High School continues to fit for lives of broader usefulness by entering higher institutions.

At the Elizabeth Lowell High School the regular program is being somewhat closely adhered to. Until some further modifications in college requirements shall be made, the changes needed in the program of this school to render it of greater practical value to many of its pupils must probably be postponed. A marked improvement has taken place in the spirit of the school during the last few years, and its graduates who have entered the profession of teaching are doing notably good work.

A PRESENT NEED.

The vexing and difficult problem of the revision of the conventional course of studies characteristic of the rural high school is now receiving much attention. The need of such revision, now admitted even by the most conservative, has become constantly more imperative, as profound and rapid changes in industrial, social and political life make themselves apparent. The old program offered good disciplinary training under a good teacher, but it attempted too many languages, its mathematical work was too formal, it failed to give sufficient attention to modern applied science, to history and to civics, it prepared its pupils almost solely to meet scholastic tests rather than the varied tests of daily life, and only too often the spirit was that of seeking knowledge and power for individual advancement rather than for service to society. To make a program that will continue to give the pupil some comprehension of the wonder and worth of human achievement in the great fields of literature, art, science and history, and still give that specific knowledge and training by which he becomes an effective and unselfish **doer** of his natural work in the world, is a task which will be solved only by patient and long-continued co-operative effort.

THE HIGH SCHOOL CONFERENCE

The most significant educational event of the year on the Cape was the County Conference on the Small High School held at Hyannis last November, attended by high school teachers and superintendents representing every town in Barnstable county. Following a careful personal study of the high schools of the Cape, Deputy Commissioner Orr and State Agent Kingsley summed up the necessary limitations of the small high schools, showing the necessity of some changes in the program and outlining clearly some of

the changes tentatively proposed. The program or "Course of Studies," as planned is designed to

- (1) To give certain elements of education that are needed by all boys and girls, including those who are going to college.
- (2) To keep in the high school a larger proportion of those who enter.
- (3) To attract many who do not now enter.
- (4) To direct boys and girls into those vocations for which they are adapted and in which they are needed.
- (5) To continue to provide "preparation for college."

It is proposed that the work of the first two years shall aim to provide the best education for pupils of high school age, whether planning to go to college or not, and that the specific preparation for college shall be given largely in the last two years. In the work of the first two years the aims are to give the pupil

- (1) Appreciation of good literature and practice in written and oral expression.
- (2) Appreciation of the value of science and practice in applying its principles.
- (3) Appreciation of the value of community and collective activities, and practice in securing first-hand information concerning such activities.
- (4) A thoughtful attitude toward the choice of vocation, information upon various vocations, and, when possible, opportunity to test capacity in some particular field.

A tentative four years' course was submitted and is here given:

First Year

Required:—English, Natural science (introductory), and social science (community and collective activities).

Elective (select two):—Practical arts, Algebra or business arithmetic, Foreign language.

Second Year

Required:—English.

Elective (select three):—Social science (history or geography), Natural science, Practical arts, Geometry, Foreign language.

Third Year

Required:—English, a natural science.

Elective (select two):—Foreign language, English history or Ancient history, Practical arts.

Fourth Year

Required:—English, United States history and Civics.

Elective (select two):—Foreign language, Mathematics, A Natural science.

In addition, the school may provide music, free-hand drawing and physical training.

Space will not allow a report of the vigorous debate following the presentation of the above outline. The program is receiving the careful and earnest study by teachers and school officials which its vital importance demands.

During no year of which I have knowledge have the teachers of Barnstable shown themselves more thoroughly faithful, conscientious and efficient than in the year just past. Receiving in the future, as in the past, the co-operation of the parents and the hearty support of the School Board, we shall have good reason to look for solid results in the development of our boys and girls.

Respectfully submitted,

G. H. GALGER.

REPORT OF THE PRINCIPAL OF THE ELIZABETH LOWELL HIGH SCHOOL.

To Mr. G. H. Galger, Superintendent of Schools:

I herewith present the annual report of Elizabeth Lowell High School.

The small enrollment, so much regretted by last year's principal, is even smaller this year. Only 22 were registered at the beginning of the year; and two of these left during the first month. All the others have attended very regularly, our average thus far being 94.9 per cent. When the absence of one pupil means a loss of 5 per cent. in the percentage, it will be seen that we have an average of only one absence per day, including some irregularity during the cranberry season, and on the part of one of those who dropped out. This shows a good degree of interest, for if a pupil is not interested he is constantly seeking excuses to stay away from school—and in the present age, a very small excuse is usually sufficient.

Being so small, our school is like a large family, working together and playing together in a spirit of comradeship, with no factions or jarring natures to cause discord.

It is, of course, possible to give more attention to the individual, but with our ample accommodations, forty could be taught as easily as the twenty; for each class is represented and the same ground must be covered as for a larger number.

We are following the regular courses closely, the only variations being a class of Bookkeeping for the two upper classes and one in Ancient History for Seniors. The plan of reading and reporting on one book each month is continued, and provides a means of becoming acquainted with English authors and their works, of various periods and lines of thought. In this way, many books are read which would not be, if the pupil were left to his own inclinations.

Often a taste for reading is developed where it would not be accomplished under the analytical treatment necessary in teaching College Requirements. We also keep in touch with current history by the use of "Current Events," daily papers and magazines.

It would seem that we are requiring too much foreign language for our courses to have a satisfactory balance. Two years of Modern Language are enough for the average pupil and a year could thus be saved to be devoted to Science, Mathematics or History. It seems difficult to find a place for vocational training of any kind under present conditions.

During the Fall term we had the pleasure of a visit from Mr. Orr of the State Board of Education. An inspector with Mr. Orr's kindly nature is sure to be welcome, whatever may be the criticism which follows.

The conference at Hyannis brought together those of us having similar problems, and suggested a remedy for some of those which are most perplexing.

I wish to add a word of appreciation for Cotuit Library. I have found it unusually complete for a small village, and being open daily it is always accessible and helpful. Miss Howard's keen personal interest in the pupils and their work has been a valuable aid. It is a serious loss to the school as well as to the community that circumstances have compelled her to resign her position here.

We are very fortunate in having Miss Flewelling with us for the third year. I am glad of this opportunity to commend her good work in the school and her active interest in the pupils.

I wish to express my appreciation of the friendly attitude of the pupils as shown in many little ways and for the kindly spirit of the townspeople whose interests we are trying to serve.

Respectfully submitted,

BURTON W. SANDERSON

REPORT OF THE PRINCIPAL OF THE BARNSTABLE HIGH SCHOOL.

G. H. Galger, Superintendent of Schools:

Dear Sir:—

I hereby submit to you my report as principal of the Barnstable High School:

In the year just closed it has been the purpose of the teachers of this school to make the work if possible more intensive than that of previous years, to bring the pupils to a more definite realization of what such work means and to inspire in them ambition to make the most of their opportunities.

The present day pupil has somehow come to believe that work is play and that on the teacher rests all the responsibility for their progress. Consequently we have found it no easy task to make the pupil realize that nothing really worth while can be accomplished without hard, persistent, conscientious daily work; that only by the independent mastery of each problem as it presents itself can he obtain the power to meet the greater problems of school and life and that power, power to attack and conquer unaided one's own life problem is after all one of the greatest of attainments. In spite of all difficulties we have held fast to our purpose. We have tried to check the growing tendency to depend entirely upon the teacher, to lead the pupil to think for himself, to have ideas of his own—not merely to reproduce the thought of others—and I believe that we are meeting with some measure of success.

S C I E N C E .

The work in first year science is arranged with three aims in view: first, to interest the student in scientific subjects; second, to encourage observation of natural phenomena;

and third, to secure the liberal attitude necessary to understand the scientific facts of every-day experience. Three subjects are taught during the first year in science. Botany includes considerable class work out of doors, and endeavors to stimulate interest in the growing world of nature. Physiology in the winter months gives a fundamental understanding of the human body and its conservation, the study of Hygiene. During the spring term, Physical Geography will be introduced. These subjects are well adapted to the beginner, and serve to prepare the way for the somewhat more difficult science work of the second and third years.

The work in Chemistry includes as much practical work as is consistent with a course in General Chemistry. Among the practical subjects considered are water analysis, bleaching and dyeing, and various technical operations employed in industrial chemistry.

Three seniors are doing advanced work in applied chemistry, which includes analysis of foods, soil analysis, and a study of bacteria, yeasts, and moulds, including work with a compound microscope.

HISTORY AND GERMAN.

The freshman course in English History has been supplemented by a course in General History. The two courses continue throughout the year. The present classes in History have shown considerable ability.

A new German Grammar is being used with the beginners in German. The book presents the essential features of the so-called New or Direct Method, and was highly approved by the visitor from the State Board of Education. Two divisions in the first year class result in more personal attention to each pupil.

The senior class in German are interested in a German Magazine and before the end of the year they will be reading Scientific German.

WALTER S. ATWOOD.

ENGLISH.

That it has been possible this year to increase the number of hours given to English, has been most gratifying. Thus, more time has been devoted to grammar and to composition.

It has not been proved satisfactorily that the ordinary pupil acquires by instinct the technical knowledge of his mother tongue, necessary to express himself. On the contrary, it is not until a thorough knowledge of the common elements of English grammar, gained by constant drill extending over many years, has become a second habit to him, that he can be expected to be able to grasp the principles necessary to state his thoughts clearly. With this as a necessary foundation, it is not, however, until he has learned by constant practice in oral and written work, how great is the power that lies within himself to express agreeably to his fellow beings the multiple interests making up his own personality, that he can become fully awakened to that same power in others. This consciousness once present, leads on to wider outlooks. It awakens an interest in, and an ability to choose the best in thought that is being put forth today, and it brings out a sympathetic understanding for the best that the past has given.

It is with the above aims in view; namely, that the pupil may learn to express himself readily, and that he may grow into his rightful heritage, as an heir to all the ages, that the teachers, heartily co-operating, are endeavoring to strengthen the English Course.

LENA B. NUTTER.

COMMERCIAL SUBJECTS.

The general aim of this department which was outlined in the last report, still remains essentially the same, excepting as the progress of the past year has lifted and broadened it.

As a step toward the fulfillment of a desire to extend the efficiency of the course, the number of hours given each week of the present year to the purely commercial subjects has been increased, as indicated by the comparative schedule given below.

Number of periods offered weekly in the following subjects during the years		1911	and	1912
Fourth year	Stenography	4		5
"	" Typewriting	3		5
"	" Bookkeeping	4		5
Third year	Stenography	2		5
"	" Typewriting	2		5
Total		<hr/> 15		<hr/> 25

This change, by means of which the work of the department has been greatly strengthened, was made possible by doubling the third year typewriting classes with those in other subjects, thus conducting two recitations in the same room at once. In spite of the advantages of this arrangement it is by no means an ideal one. Because of conflict in individual programs, there is hardly a period during the day when the machines are not in operation. Obviously, the resultant noise places considerable nervous strain upon the pupils reciting in other subjects. It is true, also, that the typewriting classes have less personal attention than formerly, but this is more than offset by the power gained in additional practice. The third year pupils are doing remarkably good work in typewriting.

As shown by the foregoing table, our course in stenography and typewriting is now equal, in number of recitation periods, at least, to that of the city high schools.

As a further step toward a better all-round equipment, a much-needed course in penmanship was introduced last spring for the benefit of the first-year pupils. This practice has been continued three periods weekly up to the pres-

ent time, the object being to attain an easy, rapid, and legible style of writing.

Given entering pupils who possess a knowledge of the elements of English grammar and composition; who have acquired a reasonably generous vocabulary, including an acquaintance with phonics; who have gained an accurate knowledge of arithmetical processes; who have attained facility in the proper use of pen and pencil; and who are prepared to supplement this fundamental knowledge by faithful heed to direction, and by intensive, unremitting effort, we should certainly be able to fit them well for such positions as they may secure.

However, as a success factor, the best of courses can never wholly take the place of definite, steady endeavor. A fellow teacher used to say that if we could awaken early in our pupils the deep earnestness of purpose necessary for the accomplishment of things most worth while, we could well-nigh assure their success. It is encouraging to notice that here and there in our midst are pupils who consciously possess this quality; and, indeed, throughout the department the students, as a whole, work with patience and cheerfulness. There seems to be a growing sense of respectful regard for fellow classmates and their work, reflected possibly from a dawning realization of the part each has in the great whole. In working with them, this unity of interest is shown by their friendly desire to co-operate and the elimination of undesirable friction. Certainly the conditions present are conducive to the development of well-equipped, effective office assistants who possess "That aggregation of virile and decent qualities which we group together under the name of character."

LUELLA R. LYON.

Believing that some knowledge of the history of past civilization is an aid to an understanding of other studies in the school curriculum, a course in General History for the first year class is being conducted by Mr. Atwood.

At the beginning of the fall term, German was substituted for French in the second-year class.

The Alumni Association at its December meeting reminded us of its continued interest in the school by a gift of fifteen dollars for the purchase of a picture to be placed in the main room.

At no time has a better school spirit existed than at present. An increasing number of pupils look upon their teachers as friends and helpers rather than as taskmasters. Among the teachers themselves there is the heartiest cooperation.

Respectfully submitted,

LOUIS M. BOODY

REPORT ON THE TRAINING SCHOOL.

To Mr. George H. Galger, Superintendent of Schools:

Dear Sir:

In response to your kind invitation I am glad to submit through you a few words regarding the Training School for the consideration of my fellow citizens.

PRACTICAL EDUCATION.

The demand of the times is more and more for practical results. More and more, everything, whether it be implement, organ or institution is being tested by the question, is it doing the work for which it was intended; does it function?

Modern education cannot claim exemption from such tests. Nor does modern education which is worthy the name attempt to avoid the issue. On the contrary, one of the principal issues which modern education claims for its own, is directly along this line.

It considers the child and his needs and then examines the school to see whether it is doing its legitimate part toward ministering to these needs. Nearly all of the changes which are coming into our schools are caused by attempts to give the children a more practical education. This is why cooking and sewing have come into all schools which can afford to have them.

COOKING AND SEWING IN THE SCHOOLS.

Among the reasons why cooking and sewing are being taught in the public schools, four occur to me as of primary importance, viz.—

1. Every girl ought to be able to cook and sew as a prospective home-maker.
2. The training of the hands is a very important part of education.

3. When properly taught these subjects afford valuable mental training.

4. In connection with these subjects the pupil comes to see the importance of language, arithmetic and of art work.

SCHOOL GARDENING.

Training quite similar to the above is obtained by the boys in their school garden work. In connection with this work eighth grade boys raise vegetables, sell them, make out bills, bank money and checks, draw money from the bank with checks, and in fact, learn all of the ordinary business forms in doing their own business.

The amount of time spent in the garden is very small. During the whole school year only about fifteen to twenty school hours are so spent, but the good effect upon the other school work is, we believe, very great.

EDUCATION OUTSIDE OF SCHOOL.

Nearly everyone who is not a pedagogue or a preacher knows that the best part of his education, that part which he uses in everyday life with which to do his business, was obtained outside of schoolrooms. Much of that which he did get in the schoolroom has not been used and so has been sloughed off and forgotten. He also knows that if the education which he got outside of school could have been supplemented by the education which the school might have given him he would be better off than he now is.

MODERN EDUCATION.

Now modern education is trying to do just this kind of connecting up of the education outside of school with that inside of school, so that he will find his school work more real, more vital, more worth while.

To do really good work one must have the right attitude toward it. He must see that it is worth while, that it really amounts to something and that it amounts to something for himself.

ARTIFICIAL SCHOOL WORK.

Much of our school work is artificial and dead because the problems to be solved are the same old problems which have been solved over and over again and always without effecting any change in the school life. The children are apt to feel much as prisoners who remove stones from part of a yard only to turn about and move them back. It is said that the same prisoners will do much more work and be much happier if they use the same stones in building their own prison wall.

CHILDREN BUSY AND HAPPY.

We try to keep the children very busy doing things which seem to them worth while. They do not commit to memory so many useless facts, but what they learn means more to them. They are happier in their school work; they read and study more books than ever before and they know better how to use the knowledge gained.

Two questions we ask. 1. Are the children growing in thinking power? 2. Are they growing in the right attitude toward life?

The proof is found in the amount and quality of work accomplished and in the spirit of helpfulness developed.

“Learning to do.

Doing to earn.

Earning to live.

Living to serve.”

A TIME OF READJUSTMENT.

In a time of such readjustment as is now going on throughout the world there are certain to be differences of opinions regarding every change. We must take it for granted that some mistakes will be made, but no one is now willing to confess himself a “standpatter,” we are all progressive if not “progressives.” Is it then strange that some mistakes are made in education?

If a man looks at his neighbor who is bringing up a family he can always discover some grave mistakes which the neighbor seems to him to be making. Sometimes he even sees mistakes which are being made by his "better half" in his own family.

Is it surprising that when he looks into the schoolroom, where the one teacher is trying to train forty children, he will occasionally discover some happenings which seem to him queer?

IMPORTANCE OF THE TEACHER.

It has often been said, "As the teacher so the school." The best that we can do then is to secure the best possible teacher, give him considerable liberty and sympathetic support, and in case of dissatisfaction go straight to him and try to have a good understanding with him.

MUTUAL CONFIDENCE.

The greatest need of any school is mutual confidence between the home and the school. This will lead to mutual helpfulness. We should recognize the fact that all concerned desire to accomplish the same thing, viz: To make the children into helpful citizens.

SELECTION OF TEACHERS FOR THE TRAINING SCHOOL.

Great care is exercised in the selection of teachers for the Training School.

Three points we always try to keep in mind:

First: Is this person a man or woman of fine character?

Second: Is he well trained for his work?

Third: Will he be able to get on well with the children and their parents?

I believe that the teachers now in The Training School are without exception strong along all of these lines.

We are enabled to have such teachers only because The State supplements the salaries paid by the Town. During the current year the State is paying toward the salaries of six teachers \$2545, or an average of about \$424.

ASSISTANCE FROM STUDENT-TEACHERS.

During the first half of the year the teaching is practically all done by these teachers and the school is a model school. During the second half of each year the Senior Normal Students who have been in training at the Normal School for one and a half years go into the Training School to learn from the Training School teachers how to do the real work of the class room. The regular teacher of the room is responsible both for discipline and for teaching. This makes it possible to give much more attention to backward children and to do many things which could not well be done in a school with only one teacher.

TRAINED SUPERVISORS.

Besides the regular teachers the Training School receives the benefit of expert supervision in music, drawing, physical training and industrial work and in all of the regular subjects. This is furnished by the State at a cost of more than \$700.

GENEROUS EQUIPMENT.

So much for the teaching. Let us turn now to the matter of equipment. The Town furnishes for the Training School books, paper and other material at the same rate per pupil as to the other schools of the Town. The State supplements such supplies by purchasing such books and other equipment as may, from time to time, be needed to put this into the most favored class of the schools of the State. The pupils of the Training School have also free access to Normal School laboratories, manual training room, cooking room and to any other appliances which may seem desirable for broadening their horizon. Classes in geography have the free use of the stereopticon with about one thousand fine lantern slides; opportunities are even given upper grade children to see Venus, Saturn and other planets through the fine Normal School telescope under the

leadership of the instructor in astronomy. The Normal School library is well provided with books on plants, animals, biography, and all other subjects which come into the work of the children. These are at all times accessible for use in the Training School.

GRADE OF WORK.

It will readily be seen that it is possible to afford, here in the Hyannis Training School, opportunities for an education equal to that offered by any public school in the State.

The school is often visited by experienced experts in education. These approve of the general plan of the school and compare its work favorably with that of the best schools of the country.

It is interesting to note that nearly all of the things which are urgently requested for the schools by our own superintendent of schools and by superintendents of similar towns throughout the State, such as higher salaries and more money for equipment, are taken as a matter of course in our Training School.

It is well sometimes to count our blessings and to cheer each other on our way.

Very respectfully yours,

WM. A. BALDWIN

REPORT OF THE SUPERVISOR OF DRAWING.

To Mr. George H. Galger, Superintendent of Schools,
Dear Sir:

There have been no marked changes in drawing during the past year. In the higher grades a steady gain in power can be noted in most of the pupils.

The grade teachers, with three exceptions, returned to their schools in September. This fact has greatly strengthened the work of my department. It takes time for even expert and experienced teachers to grasp the problems of the country school of several grades and some months pass before the best work can be done for the pupils. Parents sometimes think school is school and one teacher will do just as well as another. They do not realize that changes among faithful, capable teachers must decrease efficiency for a considerable time. Money paid to retain strong teachers is an investment that touches the heart as well as the pocket of every tax-payer who wants Barnstable's coming citizens well-fitted for their life work.

We have scored for the manual arts this year in Cotuit and the village of Barnstable by introducing sewing systematically and increasing the wood-working equipment in both buildings. The teacher and pupils of the Cotuit school deserve commendation for their efforts to help procure additional tools for their workshop. The School Board promised a sum for tools equal to that which the school could raise. Stimulated by this promise an entertainment was given in Freedom Hall, whose proceeds, with the promised addition, have given this work-shop a fair equipment. The lessons in precision and accuracy learned in the shop are already telling on the school-room habits of these boys. They are more alert when directions are given and are drawing with more intelligence and care.

The wood-work in Barnstable village is done in an unfinished room of the remodeled building. Two carpenters' benches are now in use in this room. One of these was made two years ago when the present principal undertook to carry forward this work in spite of the disadvantages of carrying on carpentry and drawing in the same period. The other bench was made last fall in our new shop. A comparison of these benches shows a marked and most satisfactory gain in the work of these young boys. One little fellow who has learned to use tools in this school reported to me last fall that he had earned seventy-five cents a day during part of the vacation because of the instruction he had received in school.

Last December the boys in this building chose to make brackets, shelves, and various articles needed as the classes settled in their new quarters, instead of making things to take home as Christmas gifts for their friends.

The girls of the intermediate and grammar schools of Cotuit and Barnstable village sew under the direction of the intermediate-room teachers on Friday afternoons while the boys from the same rooms are receiving instruction in their shop-work.

Drawing and sewing lessons were combined in December in these schools, the drawing being represented by the old-fashioned cross-stitch patterns with which we used to ornament gifts made with the needle. It is only fair to state that the beauty and accuracy of the work on the old-fashioned samplers of the great-aunts and grandmothers from which we took our best letters were examples that ought to stimulate their easy-going descendants.

The work of the average pupils in Barnstable village already shows how much more can be done for them under the three-room arrangement now possible for the first time in that section.

Santuit suffers at present from the burdensome handicap of the one-room school, and many pupils in many grades.

There is no suitable place for the assistant to work and it is a constant struggle to hold the work up to our past Santuit standards.

I often wonder as I meet the good citizens of this town week after week as we, your supervisors, drive over this seventy-five mile area, if you do not question what good comes from all this traveling and teaching. I believe many are still saying "What does drawing amount to anyway?"

It should help meet the demands of the hour for efficient men and women. Drawing, properly taught, trains the eyes to see quickly, to see essentials, the big facts of form and proportion in their true relations. A boy should know when things are plumb and level if his eyes give him facts as a basis of judgment and action. He should be willing to lay out a garden by an orderly plan instead of with straggling rows and uneven beds. He should be more alert and less slipshod in everything he undertakes, with the grit that makes him finish whatever he begins.

The grammar school aims to send out boys and girls who can represent simple objects as they see them and make drawings of plant forms that are true to life. They should be able to show a carpenter by means of a freehand sketch with dimensions or a ruled drawing made to scale, just how a set of shelves, a cupboard, or a table should be made, or to understand the carpenter's own plans for any simple piece of work. A boy should feel that the natural way to explain to a blacksmith just what sort of a brace or rod he wants made is to show him a sketch of the object with dimensions properly placed. He should know if he wants to make a box, a sled or a boat that it is wise to first make the drawing by means of which he can determine just how much stock he needs, so that he can count the cost before he begins his job. He should be able to read working drawings well enough to work from a foreman's simple blue-prints, without assistance.

Time is spent in color study primarily to give each child

greater delight in the world of beauty around him, to enable him to choose papers for the walls of his rooms and carpets for his floors, that are restful to live with, or for instance, to help him decide what colored clothes and neckties should be worn by the man with pronounced red hair. He or she should be able to use color or direct its use on the outside of buildings in a way that adds to the beauty of the home and the town. Let us go beyond the life of the village and consider the relation of drawing to manufactures. Do we realize that every machine is made from drawings, that the draftsman's plans are followed when the machinery of a big plant is set up? That a slight error in a drawing may render a machine useless and cause heavy loss? The thought that guides all mechanical processes is constantly expressed by drawings. Every tall building, every big piece of engineering construction must be described by drawings that enable skilled workmen to make these visions of trained and gifted minds realities.

Drawing is the universal language of skilled workmen the world over. By means of it and the training that goes with it some of our own boys are today doing valuable work at good wages in the outside world.

In the jewelry manufacturing district centering near Attleboro, the towns, aided by the state, are to have vocational courses in design and metal work, not only for boys in the day schools, but for men already at work in the factories. These workmen know that their earning power increases as they increase their artistic, as well as their technical knowledge.

The more beautiful the product of the factory and shop the greater the return in money to the manufacturer and the laborer. The buyer with taste to recognize a fine thing is of as much value in the commercial world as the skilled producer. The study of color and design in the public schools is constantly increasing the number of such buyers.

A drawing teacher of long and rich experience sums up the benefits of drawing in the following terms:

“Forethought; The planning of a piece of work before starting.”

“Concentration; Constant effort to do the very best work.”

“Self-reliance; Confidence and courage to do the work set out.”

“Persistence; Sticking to the work until it is finished.”

Our teachers and pupils received much stimulus and inspiration, last winter, from preparing drawings for an international exhibition of drawings from public schools, normal schools and art schools held at Dresden, Germany, last August, at the fourth International Congress of Art Teachers. Our drawings were sent to Albany, where they were submitted to the committee in charge of the exhibit from the rural schools of the United States. The drawings sent to Albany represented the work of every school in town under my supervision. Every mark on our papers was made by our children, the lettering of the primary sheets being done by older pupils. Every drawing bore the words “Barnstable, Massachusetts,” as well as the child’s name and grade.

Photographs were accepted showing high school drawings too large to be sent; stenciled and block-printed designs; the boys at Barnstable at work at their bench in the old school-room; and the entire grammar class at West Barnstable, some sketching from the windows while the others drew with T squares and triangles.

Our work constituted nearly one-third of the entire rural school exhibit from the United States and received commendation. The drawings that were not sent to Dresden have been used by the Art teacher of the Albany College in her classes as examples of good work done in country schools.

The work of our high schools after the first year is largely individual. We endeavor to develop each pupil along the lines of his taste and purpose in life. The

young man who is preparing for Wentworth Institute or a Technical school should be prepared to do easily and well the drawing demanded in his school. The pupil with especial talent for drawing can prepare for an art school, not with the idea that he or she will make a living painting landscapes or portraits, but because a thorough art education opens many avenues for self-support along the lines of commercial advertising, drafting and designing. The best art schools today teach not only designing, but the construction of the articles designed, and many students are placed in paying positions on their graduation.

Our high schools should send well-prepared pupils to the Normal schools.

Drawing is optional in the last two years of our high schools, and pupils who take the required work without effort or interest and drop it the moment the law allows, decide at a late hour in their senior year to go to a normal school. It is then too late to remedy their neglect and they enter absolutely unprepared.

We are attempting to remedy this deficiency by means of a special class for Normal candidates, whenever we know of their purpose.

Science drawing beyond the required work of the first two years is needed if any standard of efficient expression in physics or chemistry is to be maintained. Most pupils fail to see that they should use their drawing as a means of clear expression in the sciences and wherever maps aid in illustrating historical topics.

More stress must be laid upon these phases of the work in our grammar schools until drawing seems to the child a natural aid in descriptions or explanations.

The last and present senior classes of the Elizabeth Lowell School have printed excellent posters by means of which they have advertised their school entertainments.

The B. H. S. programs of the last Junior Promenade were designed and printed, a hundred and fifty of them by the juniors themselves, and merited commendation.

Good lettering when it is used for such purposes, or meets the demands of commercial advertising, is designing of the most practical sort and well worth doing.

The James Otis prizes for excellence and effort in drawing were awarded as follows:

Seniors for Art Note Books:—Mary W. Murray, Mary M. Hallett; Juniors:—Grace E. Bursley. Honorable mention, Frances Maher, Helen Linnell.

Second Year:—Mechanical, Carroll Stevens. Honorable mention, Hilda Hinckley. Freehand, Cecil Goodspeed.

First Year:—Mechanical, Ruth P. Hallett. Honorable mention, Henry S. Baldwin, Russell Stark. Free hand, Grace Clark. Honorable mention, Claribel B. Soule, Amy C. Childs, Florence H. Bearse.

Respectfully submitted,

LUELLA FAY MAYNARD

REPORT OF THE SUPERVISOR OF MUSIC

Mr. G. H. Galger, Superintendent of Schools:

Dear Sir:

I have the honor to submit to you the annual report of the Music Department.

The object of the course followed this year is fivefold: first, to develop in the pupils a love for good music; second, to help all the children in the schools to read music; third, to help them to sing songs well with clear, pleasing tones; fourth, by means of a variety of songs, to provide the children with a medium for expressing their emotions—thus adding to their happiness; fifth, to build character.

In order to accomplish our purpose, the daily work is assigned under the following heads: voice and ear training, sight-singing and song interpretation.

Believing that most young children can learn to sing, much time is given in the first grade to teaching the monotonous.

Daily practice in reading at sight is given in each grade. It is claimed by musicians that sight-singing requires more mental power than almost any other study.

By means of individual singing we endeavor to make all the pupils self-reliant and to help the slower pupils to keep pace with the quicker ones. Only by having such recitations frequently can we secure self-dependent readers in the upper grades.

Throughout the course, effort is made to train the ear of the pupil. Dr. Damrosch is our authority for saying that the fundamental requirement for proper musicianship is ear training.

Two-part singing is taken up in the intermediate grades and three-part singing in the grammar grades. During the second half of the year the boys in the eighth

and ninth grades have practice in singing from the F clef.

We try to increase the interest already felt in music by utilizing individual talent. The little concerts given in the primary rooms are of interest and profit.

In the high schools we have been able to hear by means of the graphophone some of the great masterpieces as sung by the best artists. The high school pupils have also added to our pleasure and aided in broadening the work by contributing vocal and instrumental selections.

By the singing of songs at the opening of school and at intervals during the day, also by observing National days with appropriate songs, much can be done to mold the character of each pupil.

Phillips Brooks once said that a school song in the heart of a child will do as much for his character as a fact in his memory or a principle in his intellect.

At Thanksgiving time "The Pilgrim Fathers" was taught in all the grades and was sung with much enthusiasm by all. Our patriotic songs are always eagerly learned by the foreign, as well as by the native children.

We agree with those who say that every child at the end of the school course, should be able to sing from fifty to one hundred of the songs which are the heritage of the English speaking race, and trust that this will be true of those who graduate from the grammar schools in June.

Cordially thanking all fellow workers for their efficient co-operation this report is

Respectfully submitted,

SYLEND A BEEBE MORRIS

REPORT ON THE ADULT SCHOOL AT BARNSTABLE VILLAGE

To Mr. G. H. Galger, Superintendent of Schools:

The educational work in behalf of our New Americans at West Barnstable has met with appreciation. A class for the study of English has assembled Thursday evenings during the past year, with the exception of stormy evenings and a month's vacation in July. In the winter and spring the average attendance including both sexes was about 18; in the summer and fall it was half this number. During the hour's session there is given besides the instruction in English and simple arithmetic, which the text-books provide for, general instruction by means of question and answer in geography, history, and civics. The average age of those attending is about twenty years. Those starting in who are middle-aged or over are apt to fall out soon, with the excuse that "English is too hard." Recently a picture show was given with lantern-slides, illustrating life in Finland, and wholesome American child life. There were present thirty-five persons. This was the first picture show ever held in Finnish hall, and it has borne fruit in stimulating interest in the work of the class. The work has now a good start, and for the welfare of the Town should be maintained. My desire is to find some one willing to share with me some of the burden of teaching.

Respectfully submitted,

REV. B. W. MORRISON

BOARD OF EDUCATION

The School Board consists of three members, one of whom is chosen annually. The Statutes of the State define the powers and duties.

REGULAR MEETINGS.

The regular meetings of the Board occur monthly.

SPECIAL MEETINGS.

Special meetings of the Board may be called by a majority of the Board, or by the chairman.

OFFICERS OF THE BOARD.

The officers of the Board shall consist of a Chairman, a Secretary, and such other officers and special committees as may be necessary.

These officers shall be chosen at the first annual meeting each year.

THE CHAIRMAN OF THE BOARD

shall preside at the meetings of the Board, and perform such other duties as usually pertain to that office.

In the absence of the Chairman his powers and duties shall devolve upon a chairman pro tem.

DUTIES OF THE SECRETARY.

He shall act as scribe at all meetings of the Board and shall keep suitable records of all their proceedings. He shall prepare a statement of all debts, moneys raised by the Town, or received from other sources, paid by the order of the Board, and furnish the Superintendent with the same for publication in his annual report, and together with the Superintendent constitute the Examining Committee.

ORDER OF BUSINESS.

The usual order of business of the Board shall be as follows:

1. Reading the records of the previous meeting; or the call, if a special meeting, and the records.
2. Reports of Committees.
3. Unfinished business.
4. Report of Superintendent.
5. Report of Secretary.
6. Other business.

(Approved by the School Committee December 23, 1893, and December 19, 1908.)

REPORT OF TREE WARDEN.

The work of the Tree Warden the past year has been the care of the trees we already have, no new trees were put in. The necessary trimming and digging around young trees was done, and the Elms were covered with spray for the Beetle, which were very thick. The work of spraying was done with a powerful high pressure machine purchased by the Tree Warden from the U. S. Government; this machine has a six hundred gallon tank and ten horse power engine with a powerful three cylinder pump, and is able to throw a spray one hundred feet in the air; this permits all the work to be done from the ground, doing away with climbing and spurring the trees, which is injurious, and you are also sure that the tops are covered, which is very important. The cost of doing the work with this machine, compared with the old way of climbing was seventy-five dollars less. The work of trimming for the coming year has been started, the village of Centerville having been done; seventy-five loads were taken out. The other villages will be done before spring to be ready for spraying the first of June. The trimming all over town will be heavier than usual because the past few years we have cut out as little as possible in order to save money enough for the Elm Beetle spraying.

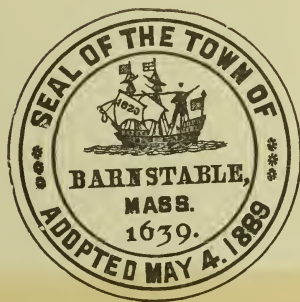

Respectfully submitted,

HARRY W. BODFISH,

Tree Warden

The total amount of money appropriated for the current expenses of the Town was \$125,175.99; of this amount \$123,175.99 was raised by taxation and \$2,000.00 by issuing a note of the Town.

On the following pages will be found A COMPARATIVE TABLE which I have prepared, showing the Appropriations, Expenditures, Valuation of the Town and Tax Rate for each year during the last ten years. I sincerely trust that this will be found to be of interest to many.

Respectfully submitted,

J. C. BEARSE,

Town Treasurer.

Auditors.

REPORT OF MILK INSPECTOR

Marstons Mills, Feb. 2, 1914

To the Board of Health of the Town of Barnstable :

I herewith submit a report of my work since June 1, 1913 :

Number of dairy inspections made, 270.

The samples of milk that I have analyzed have been fully up to the usual standard.

The new sediment test, in addition to the butter fat test, proves to be a most valuable help in noting any undue amount of sediment, and when such sediment was found, and attention was called to those responsible, the results show a marked improvement on samples taken later.

Of course the most of the milk sold in town comes from dairies where the barns are not what would be called up to date as to construction, but nearly all of them are kept in as fair a degree of cleanliness as could reasonably be expected.

The most that is requested of the producers of milk is, that they have a clean cow stable, a clean cow and a clean milker ; and as it is estimated that 90 per cent. of the dirt in milk gets there before it leaves the barn, it is plainly seen that this combination is needed for best results.

Each year there are two or three milk exhibitions held in the state, and many cities and towns offer prizes to the producers sending in the highest scoring samples from their city or town ; and I would suggest that this town do the same, because with a little friendly competition with other parts of the state, it surely encourages the production of good clean milk.

Respectfully submitted,

GEO. T. MECARTA,

Inspector of Milk.

REPORT OF SEALER OF WEIGHTS AND MEASURES

Platform Scales over 5000 lbs.,	Adjusted 0	Sealed 9	Condemned 1
Platform Scales under 5000 lbs.,	“ 2	“ 42	“ 1
Computing Scales,	“ 0	“ 33	“ 3
All others,	“ 3	“ 38	“ 8

J. C. BEARSE,

Town Clerk.

BY - LAWS

The committee appointed at the last annual town meeting to revise and codify the By-laws of the Town, beg leave to submit the following :

ARTICLE I

Section 1. The annual town meeting for the appropriation of money for town purposes, the election of town officers and all other matters that may properly come before it, shall be held at the Town House on the 1st Monday of March in each year. The meeting shall be opened, and after the election of a Moderator shall act upon the articles of the warrant in the order in which they appear in the warrant, unless the meeting shall prescribe a different order. The warrant for the annual meeting shall state the hour at which the meeting shall open.

Section 2. The Selectmen shall insert in the warrant for the annual meetings all articles, petitions for which, signed by ten or more legal voters, shall be delivered to the Selectmen, or either of them, or the Town Clerk, on or before the 15th day of February in each year, but the Selectmen may insert in said warrant any article or articles received by them after said 15th day of February, if in their judgment, it is advisable so to do, and whenever it is possible, shall, before calling a special town meeting, insert in some newspaper published in town, a notice specifying the last day upon which articles to be inserted in the warrant for such meeting shall be presented to the Selectmen or the Town Clerk. The warrant for the annual meeting shall also designate the town officers who are to be chosen by ballot, and their respective terms of office.

Section 3. The warrant for all town meetings shall be directed to either of the Constables of the town, and said warrant shall be served by posting attested printed or written copies thereof in each postoffice district of the town, seven days at least before the day of such meeting, and by publication of said warrant in one or more newspapers published in said town one week at least before the day of such meeting.

ARTICLE II

Section 1. The Selectmen shall have full authority as agents of the town to employ counsel to institute and prosecute suits in the name of the town, except suits on bonds, notes, or other securities given to the Town Treasurer, and to appear and defend suits brought against it, and to appear in proceedings before any tribunal, unless it is otherwise specially ordered by vote of the town.

Section 2. All deeds, conveyances, leases, discharges of mortgages, bonds, agreements, contracts, or other instruments which shall be given by the town and which to be valid in law require to be signed, sealed and acknowledged shall, unless other provision is or may be made by law, or by special vote of a town meeting, be signed and acknowledged by the Selectmen or a majority of the Board in behalf of the town, and shall be sealed with the common seal of the town.

Section 3. The seal of the town shall be circular in form, and one and one-half inches in diameter. Upon the upper part of the seal and within the circle, a ship of the Mayflower period, pierced with four port-holes; the foresail, upon which shall be the date 1620, and mainsail both set and drawing; flags at the fore and main and at the stern, the flag at the main being an English Admiral's flag; below the ship upon the lower part of the seal the words, Barnstable, Mass., 1639; between said circle and the outside edge the words, "Seal of the Town of, adopted May 4th, 1889."

Section 4. The Selectmen shall have the care, custody and supervision of all town buildings, commons, squares or inclosures belonging to the town, excepting such as by the Statutes of the Commonwealth are placed in charge of other town officials.

Section 5. The Selectmen may authorize the Treasurer of the town to borrow money temporarily in anticipation of the collection of taxes and to give promissory notes therefor in behalf of the town, the same to be signed by the Treasurer and countersigned by a majority of the Selectmen, and all promissory notes shall be executed in like manner.

Section 6. The Treasurer is authorized to engage counsel at the expense of the town for the purpose of prosecuting any action at law under the provisions of the Public Statutes relating to suits on bonds, notes, or other securities and for trespasses committed on any public buildings or inclosures belonging to the town but no bill shall be paid by him for services of counsel so employed until it has been approved by the Selectmen or a majority of the same.

Section 7. All boards and committees appointed or elected by the town are authorized to procure at the expense of the town, legal advice, and bills so incurred shall be paid by the Treasurer upon their approval by the Selectmen or by a majority thereof.

Section 8. The Auditors shall have free access to all books of accounts of any officer of the town in which are kept the accounts of the town, as often as once a month, but shall examine the same at least once a year.

Section 9. The Auditors shall require proper vouchers for all sums expended, from such officers as are entrusted with the town's money, and shall annually report to the town in writing, the result of their labors.

Section 10. The Selectmen shall annually, not less than one week before the annual meeting, cause to be printed and distributed among the tax payers and voters of the town a detailed report of the receipts and expenditures of the Town Treasurer during the preceding financial year, together with the reports of all the various officers of the town, and when practicable the report of all committees appointed by the town.

Section 11. The Selectmen of the town shall make regulations concerning the taking of eels, clams, quahaugs, scallops and other shell-fish within the town, which regulations shall be published in some newspaper published in said town, and shall, upon a complaint being made to them, or either of them, such complaint being made in writing, and specifying the time and place and circumstances under which the alleged breach was committed, prosecute to final judgment all persons digging or taking said fish contrary to such regulations.

ARTICLE III

Section 1. The financial year of the town shall begin on the first day of January in each year, and end with the last day of December following.

Section 2. The Town Treasurer shall be the sole disbursing agent for the town, but no moneys shall be paid by him except upon an order signed by a majority of the Selectmen, except as is otherwise provided by law, by these by-laws or by vote of the town.

Section 3. The Selectmen shall meet at the Town Office on each Saturday for the purpose of drawing orders and approving bills as is hereinafter provided, and shall remain in session from 9 a.m. until 3 p.m.

Section 4. All orders drawn by the Selectmen shall state upon

the face of the same the purpose for which they are drawn.

Section 5. All bills for the salary of school teachers, and all bills contracted by the School Committee, either for repairs on School Houses, transportation of scholars, or for any other purpose within the province of said board, except bills contracted for legal advice, shall be approved by the School Committee or a majority of said board, and presented to the Selectmen for their approval. After their approval the Town Treasurer shall, upon presentation, pay the same.

Section 6. All bills contracted by the Superintendent of Streets or Surveyor of Highways for work done on roads, bridges, or any other purposes, shall be approved in writing by said Superintendent or Surveyor of Highways, and presented to the Selectmen for their approval. After their approval the Town Treasurer shall, upon presentation, pay the same.

Section 7. In the event of the election by the town of a Board of Road Commissioners, all bills incurred for work done on roads, bridges, or for any other purpose shall be approved by the Road Commissioner engaging such services, and presented to the Selectmen for their approval. After their approval the Town Treasurer shall, upon presentation, pay the same.

Section 8. Each member of the School Board, the Superintendent of Streets or the Road Commissioners, shall be furnished with an account book, in which he shall copy all bills in detail before the same are presented for approval.

Section 9. At the close of every year the Treasurer shall render his account to the Selectmen, and shall account with them for all money received and paid by him in behalf of the town.

ARTICLE IV

Section 1. Before proceeding to make an assessment of taxes, the Assessors shall give reasonable notice thereof by posting in each and every Post Office District, and by publishing for two successive weeks in one or more newspapers published in the town, a brief notification requiring the inhabitants to bring in lists of poll and property, both real and personal, prescribed by the Statutes or by the Assessors. Such notice shall state explicitly that the inhabitants who fail to return proper lists can have no abatement of their taxes, and that the inhabitants who file such lists after the time specified in such notice, without good cause for such delay, can have no abatement upon their personal property tax, unless such tax exceeds by fifty per cent. the amount which would have been assessed had the lists been seasonably filed.

Section 2. On or before the first day of September in each year the tax list and warrant shall be delivered to the Collector of Taxes or to the person authorized to collect the taxes for the current financial year.

Section 3. Unless the town shall otherwise direct the Collector of Taxes shall have authority to use all means of collecting the taxes which a Town Treasurer when appointed Collector, may use.

Section 4. The compensation of the Collector of Taxes shall be 1.2 per cent. on all taxes collected by him, unless the town at a meeting duly warned for that purpose shall vote to change such rate per cent. In which case he shall receive such compensation as the town may vote.

Section 5. The Collector shall be required to deliver or mail at the expense (for postage) of the town to each tax payer a tax bill as soon as is practicable after the tax books are committed to his care.

ARTICLE V

Section 1. All children between the ages of seven and fourteen years who shall belong to any public school in this town, and who shall without sufficient excuse be absent from said school three or more times in the course of any one month shall be deemed habitual truants.

Section 2. Habitual truants and children between the ages of seven and sixteen years, wandering about in the streets and public places of the town, having no lawful occupation or business, growing up in ignorance, shall be punished by a fine not exceeding twenty dollars, or by commitment for such time not exceeding two years as the Court of Justice having jurisdiction of the offence shall determine, to such place of confinement, discipline and instruction as has been or may hereafter be provided by law by the Town of Barnstable, or by the County of Barnstable.

Section 3. Any minor so committed may upon proof of amendment or for other sufficient cause shown upon a hearing of the case be discharged from the institution named in the preceding section by any justice or court having jurisdiction over the offender at the time of his committal.

Section 4. The School Committee of the town shall appoint and fix the compensation of two or more suitable persons to be designated truant officers, who shall, under the direction of the School Committee, inquire into all cases arising under the by-laws of this article, and shall alone be authorized in case of violation

thereof, to make complaint. The compensation of such officers shall be paid from the Treasury of the town.

Section 5. All complaints shall first be made to the School Committee, who shall notify the parent or guardian of said child of the nature of the complaint, and also of the time and place when said parent or guardian may have a hearing.

ARTICLE VI

Section 1. No person shall move a building over a public street without the written consent of the Selectmen, who may in their discretion require a bond with sufficient sureties in such sum as they shall require, from the owner of such building or the person or persons moving the same with condition to reimburse the town for all sums of money which it may be liable or compelled to pay in consequence of the use of the way.

Section 2. No person shall throw or sweep into, or place, or drop, or suffer to remain in any street, any hoops, boards, or other wood with nails projecting therefrom, or nails of any kind, shavings, ashes, hair, manure, rubbish, offal or filth of any kind, or any noxious or refuse liquid or solid substance. The Superintendent of Streets or Road Commissioners may so place clam and oyster shells at their discretion.

Section 3. No person shall pasture any cattle, goats or other animal, either with or without a keeper upon any street or way in the town, provided that nothing herein contained shall affect the right of a person to the use of the land within the limits of a street or way adjoining his own premises.

Section 4. No person shall drive any horse, cattle or swine, or permit any horse, cattle or swine under his care, to go upon and over any sidewalk, or suffer any horse to remain hitched across any sidewalk, or hitch his horse to, or in close proximity to any ornamental tree standing or growing upon any sidewalk.

Section 5. No person shall post up or affix in any manner paint or write, or cause to be printed, painted or written, a notice, advertisement or bill upon a post, pole, fence, wall, or building in the town, unless he has previously obtained the consent of the person or persons having possession of such post, pole, fence, wall or building.

Section 6. No person without suitable clothing shall swim or bathe in any of the waters surrounding or within the town within eighty rods of any dwelling house, or street so as to be visible therefrom.

Section 7. No person shall ride, propel or drive any bicycle or

tricycle upon or over any public sidewalk of the town within ten feet of any party or parties lawfully in the use of said sidewalk, and any person so riding such bicycle or tricycle, upon meeting or approaching any party or parties in the lawful use of such sidewalk shall bring said bicycle or tricycle to a full stop and dismount therefrom at a point at least ten feet distant from such party or parties.

Section 8. No person shall behave in a rude, indecent or disorderly manner or use profane, indecent, or insulting language in or near any house or in any public place or on any sidewalk or street of the town, to the annoyance of any person there being or passing.

Section 9. No person shall allow any sink water or other impure liquid to run from the house, barn or lot, occupied by him, into any street of the town.

Section 10. No person shall dump, deposit or place, or cause to be dumped, deposited or placed, any paper, broken glass, bottles, shavings, hair or rubbish of any kind, except upon a dumping ground provided by the town, unless upon his or her own land, except that to improve the sidewalks, coal ashes may be evenly distributed upon the same at any time during the month of April or May of each year but at no other.

Section 11. Whoever violates any provision of this article shall be punished by a fine not exceeding \$20.00 for each offence.

Section 12. These by-laws may be amended at any annual town meeting, an article or articles for that purpose having been inserted in the warrant for such meeting.

Section 13. No person shall be prosecuted or tried for any breach of the provisions of any by-laws of this town unless the complaint for the same shall be made within thirty days from the time of committing such breach. Prosecution may be entered by any citizen of the town.

Section 14. No person shall barter, or trade, and collect Junk without a license from the Selectmen of the Town.

Section 15. Upon the approval of the foregoing by-laws by the Attorney-General, all by-laws heretofore existing shall be annulled and repealed and these by-laws shall take effect.

EDGAR W. LOVELL,
ALEX. G. CASH,
HOWARD N. PARKER,
J. C. BEARSE,

Committee.

REPORT OF THE SCHOOL COMMITTEE

To the Citizens of the Town of Barnstable :

We respectfully submit the following report on the Public Schools, prepared by the Superintendent and Secretary, for the year ending December 31, 1913 :

Z. H. JENKINS,
J. MILTON LEONARD,
EDWARD C. HINCKLEY.

ORGANIZATION OF THE SCHOOL BOARD

<i>Members</i>	<i>Term Expires</i>	<i>Residence</i>
ZEBINA H. JENKINS,	1914	West Barnstable
J. MILTON LEONARD,	1915	Osterville
EDWARD C. HINCKLEY,	1916	Hyannis

G. H. GALGER, Superintendent of Schools, Hyannis

Chairman of Board—Zebina H. Jenkins

Secretary of Board—G. H. Galger, Tel., 71-3

Auditing Committee—Z. H. Jenkins, J. M. Leonard,
Edward C. Hinckley.

Committee on Examination of Teachers—Superintendent.
 Purchaser of Books, Apparatus and Supplies—Superintendent.

Special Committee in Charge of School Buildings at Centerville and Hyannis—Edward C. Hinckley.

Special Committee in Charge of School Buildings at Barnstable, West Barnstable and Marstons Mills—Z. H. Jenkins.

Special Committee in Charge of School Buildings at Cotuit, Santuit and Osterville—J. M. Leonard.

Committee on Transportation of Scholars to High Schools—Z. H. Jenkins, J. M. Leonard, E. C. Hinckley.

Truant Officers—George A. Smith, Barnstable; John Bursley, West Barnstable; J. Albert Grigson, Cotuit; John J. Harlow, Santuit; James N. Rogers, Osterville; E. W. Childs, Centerville; I. J. Green, Marstons Mills; Geo. F. Hart, Hyannis.

CALENDAR, 1914

The High Schools begin Jan. 5, and continue 13 weeks; April 13, and continue 11 weeks; the first Tuesday after the first Monday in September, and continue 16 weeks.

The Training School, in the commencement and continuance of its several terms, unless otherwise ordered, is subject to the Normal School calendar, except that in the Fall it commences September 14.

All other schools begin January 5, and continue 12 weeks; April 13, and continue 10 weeks; Sept. 14, and continue 14 weeks.

Calendar subject to change.

SUPERINTENDENT'S REPORT

To the School Committee of Barnstable :

In accordance with the rules of the School Committee I have the honor to submit my ninth annual report on the public schools for the year ending December 31, 1913, the same being the twenty-third in the series of Superintendents' reports.

ENROLMENT, ATTENDANCE, NEW SCHOOL LAWS, ETC.

The total enrolment for 1912-1913 showed an increase of thirty and the average membership an increase of fifty over the preceding year. The villages of West Barnstable, Osterville and Hyannis showed the largest increases. Several outbreaks of contagious diseases reduced the percentage of daily attendance. Cases of actual truancy were rare, but a few parents still show a regrettable indifference to enforcing strict attendance.

New laws in regard to school attendance and the employment of minors, designed to lessen the unquestioned evils of factory child labor, are of such a sweeping character that their literal enforcement in such a community as ours will in some cases produce anything but desirable results. For instance, the total prohibition of work in stores, even during the summer vacation, for minors under fourteen, shuts out profitable and not harmful employment to boys during a period when it is especially needful that they be not wholly

idle. Our long summer vacation is distinctly demoralizing to a large proportion of our school children; it can hardly be made less so by closing still further the avenues to helpful employment, and this at a time when church and state authorities are rightly alarmed by the growth of the hoodlum spirit—the direct outcome of idleness and street loitering.

The new laws also call for an enormous amount of "red tape" to be added to the excessive quantity which already overburdens the administrative department of the schools. One example of this is found in the fact that any girl minor between the ages of fourteen and sixteen, who leaves school with the laudable intention of helping in the housework at home must secure from the school authorities an elaborate "Special Home Permit" card so to do. This card is but one of seven used in connection with minors leaving school.

RESIGNATIONS AND APPOINTMENTS

Mr. Taintor Parkinson, principal of the West Barnstable school, Mr. L. A. Sheafe, principal of the Osterville school, Miss M. Genieve Leonard, teacher of the Osterville primary school, Miss Rebecca C. Lapham, assistant at the Santuit school and Miss Ida E. Finley of the primary department of the Training School resigned during the year. All were thoroughly faithful workers, Miss Finley having served fourteen years and being considered by good judges one of the most competent primary teachers in the state. She was elected principal of the Framingham Normal Training School at a large increase in salary. The vacancies were filled in the above order as follows: Mr. F. A. Chapman; Katherine F. Conlan, substitute, followed by D. Alva Crandall; Miss Mary McConnel; Miss Gertrude L. Greene; Mabel K. Baker, substitute, followed by Miss Laura J. Wright. Miss McConnel and Mrs. Baker had previously served the town

with notable ability. Miss Olivia M. Phinney, of the Osterville intermediate school, was granted leave of absence for the fall term, her place being acceptably filled by Miss Hazel M. Staples of Mansfield.

Mrs. Addie G. Crosby, at the end of her year's leave of absence, found her health not equal to the strain of resuming her school work and Miss McConnel was continued in the position. It is not easy to measure the debt owed by a community to a teacher who for a generation gives unstintedly of her best to the young under her charge, and it seems an injustice that so few communities provide for any substantial recognition of such indebtedness.

COMPARISON OF EXPENDITURES

An analysis of the expenditures for town purposes for the last ten years, prepared by the town treasurer, shows an increase in total expenditures of about 59 per cent., the expenditures for School Purposes showing almost exactly the same ratio of increase. School Transportation shows an increase of 90 per cent., and Road Repairs 183 per cent. Under School Purposes the expenditures for janitor service and fuel show a much greater relative increase than those for teaching and supervision. Salary increases in the last two have not kept pace even with the minimum estimates of the increased cost of living.

Most of our Cape towns have for the last few years been making some advance in teachers' salaries, and until recently Barnstable was among the leaders in this respect. At present however most of our teachers are paying from 20 per cent. to 40 per cent. more for board than neighboring teachers, so that their net income is actually *less* than that of the teachers in smaller and poorer towns. This adds to the many unfavorable factors which render the securing and retention of strong teachers almost impossible. Most cities

and towns of moderate size are now paying grade teachers from 30 per cent. to 50 per cent. more than is paid by us.

The laws regarding the new state retirement association go into effect next July and all teachers newly entering the service of the schools will be obliged to pay into the fund of the association from \$35 to \$100 annually. This means that towns paying low salaries will be practically forced to increase them to an amount equal to the payments required. Several towns in the county have already done so.

SCHOOL FINANCES

The close of the fiscal year of 1912 showed a deficiency of \$792.77 in the school department, that of 1913 shows a deficiency of \$670.15, the excess expenditures coming under "Transportation" and "Repairs."

SUMMARY OF RECEIPTS AND EXPENDITURES, 1913

	Total Available Appropriations	Expenditures	Balance or Deficiency
School Purposes,	\$27,200 42	*\$26,950 78	+\$249 64
Text-books and supplies,	1,600 00	1,597 13	+2 87
Repairs,	1,650 00	2,304 10	—654 10
Transportation,	5,000 00	5,268 56	—268 56
	<hr/> \$35,450 42	<hr/> \$36,120 57	<hr/> —\$670 15

ANALYSIS AND ESTIMATES

Expenditures

Rigid economy in miscellaneous expenses and a slightly larger income than anticipated from tuition receipts enabled the expenditures for "School Purposes" to be kept within the appropriation, in spite of the fact that the expenditure for fuel exceeded the estimate by several hundred

*State authorities differing as to placing a tuition charge of \$150, the same appears in the report of the town treasurer.

dollars, totaling over \$3,000. The average annual expenditure for fuel for the past two years has been \$2,810.22, and if this indicates future expenditures for that purpose suitable provision will have to be made therefor in the appropriations for "School Purposes."

The expenditures for "Text-books and Supplies" were kept within the appropriation by supplying only necessities. The expenditure per capita was \$1.98. The average for Barnstable County is \$2.19 per capita. Increased membership in the schools will call for some increase in the appropriation for these items.

The quantity of miscellaneous "Repairs" found necessary was much greater than anticipated and resulted in the excess expenditure noted under that head. Included in the repairs were the painting of the schoolroom walls in the Barnstable building, a new fence and the thorough renovation of the interior of the Cotuit grammar school building, new Allen shades and the grading of the grounds at Osterville, repairs on the crematory system and engine at the Training School, a new steel ceiling in the English room at the Barnstable high school and a new fence at the Centerville school. A contribution of \$40 toward the expense of grading at Osterville was made from a private fund donated some time ago for such a purpose.

Under "Transportation" increases were made in the compensation of the drivers of the Marstons Mills, West Barnstable and Hyannisport barges. Barnstable expends the largest lump sum for this purpose of any town in the state, but many towns expend more per capita of the school population, one small town expending over thirty dollars per head. The cost in Barnstable last year was approximately \$6.40 per head of the school enrolment.

CLASSIFICATION OF ACCOUNTS

It should be understood in analyzing school expendi-

tures that under "School Purposes" are included all salaries, including those of janitors and supervisors, expenditures for fuel and for all miscellaneous items not included under "Text-books," "Repairs," and "Transportation." Under "Repairs" are included all new furniture, janitors' supplies, cleaning of buildings, etc., and ordinary repairs.

ESTIMATE FOR "SCHOOL PURPOSES"

It has been found possible in the past by careful calculation to estimate to within from one to three per cent. the amount needed in a given year for "School Purposes." The sum of \$26,000 was appropriated for "School Purposes" in 1913. A larger income from tuition pupils than anticipated allowed a small balance to show at the end of the year. Allowing for no increase in salaries and a minimum increase in the estimated cost of fuel over that of last year of \$300, and for an income from miscellaneous sources of \$1,000, the former sum should be added to the estimate for the current year. The salaries of two high school assistants should as a matter of fairness be somewhat increased, at a total added expense of not over \$100, while the action of the School Board on the matter of compensation for obligatory contributions to the state retirement fund will probably be influenced by the action of towns similar to our own in resources. Eliminating the last factor, an increase of about \$600 in the appropriation for "School Purposes" over that of last year would seem to be as close an estimate as under the new law it would be safe to make.

ESTIMATE FOR "TEXT-BOOKS AND SUPPLIES"

For "Text-books and Supplies" an increase of about \$75 would provide for the increased membership, on a basis

similar to that of last year, that is, an expenditure somewhat less per capita than the average in the county.

ESTIMATE FOR "TRANSPORTATION"

Calculating on the present rates of compensation for transportation service and essentially the same expenditure for railroad service, a total of not less than \$5,500 will probably be needed for "Transportation."

ESTIMATE FOR "REPAIRS"

It is not possible at the present writing to give even an approximate estimate of the cost of repairs needed. Ordinary repairs will doubtless call for about their usual expenditure with some reduction allowed for the new buildings. Repairs of a more extensive nature which await the action of the town are those mentioned in previous reports, viz., the introduction of modern sanitary accommodations at the Barnstable, Centerville and Cotuit buildings, and the renovation of the interior of the Training School. These projects would seem to be of sufficient importance to call for separate appropriations in each case.

NEW APPROPRIATION LAW

The new law referred to above forbids the expenditure for any given purpose beyond the amount appropriated therefor. This makes it necessary in estimating the probable expenditures for the several town departments to ask for amounts which seem to allow a sufficient margin of safety, as otherwise the trouble and expense of frequent special town meetings would be involved. In the above estimates what seems to be only a minimum margin of safety has been allowed.

RANK OF BARNSTABLE IN SCHOOL APPROPRIATIONS

In the amount appropriated to the support of the public schools to each thousand dollars of valuation Barnstable ranks two hundred seventy-fourth, seventy-nine towns taxing themselves more lightly and two hundred and seventy-three more heavily per thousand than Barnstable. Barnstable appropriates \$4.13; the average for the state is \$4.37.

PROGRESS OF THE SCHOOLS

No notable advance, either in quality or scope of school work, appears to have been made the past year, but the teachers almost without exception have labored hard and faithfully, with "Fundamentals first," as their guiding principle.

The process of modernizing the curriculum is necessarily a slow one; courses of study in active use cannot be pulled down and rebuilt as might a brick house. Such courses are to a large degree an organic part of the school life, and most changes must come about slowly at best. This fact however is no adequate excuse for the inertia and the indifference to the need of constant improvement so often shown. It is well both for teachers and school officials that we have state and national authorities with the power and ability to stimulate and if necessary compel more vigorous and constant efforts to advance. The crying need is always *foresight*, a constructive imagination capable of seeing the kind of demands the future will make upon the men and women who are now our boys and girls, dependent for their future success or failure upon the kind and spirit of the training they now receive.

The United States Bureau of Education is now publishing

accounts of actual concrete progress in educational effort all over the country, and the energy, enterprise and financial sacrifices shown by small towns in the west and poverty-stricken villages in the south should put to shame many a self-satisfied New England community. Excellent physical advantages, courses of study which actually involve the practical issues of life, and a splendid spirit of collective and cooperative effort for good citizenship, are the dominant characteristics of this remarkable educational awakening. These people of the west and south are working out the problem of bringing together the science and power of the schools and the popular will. Says a report of the N. E. A., "There has always been a selfishly unsocial factor in culture and the whole movement of today is to correct this by connecting higher education and all education with democracy."

In difficulty and complexity of administration the schools of today, even the rural schools, compare with those of a generation ago much as the automobile does with the oxcart. In the many questions of fundamental importance constantly arising we look to the best educational authorities for advice, to parents for suggestion and cooperation.

If we are to get usable results from all our efforts we need to simplify our courses of study, cease multiplying subjects, concentrate on those which may be vitalized and related to the life which the pupils must face. We should reduce the amount of detail and abstract work to a minimum, make school activities akin to those of practical life and place the development of power on the part of the pupil to *do* something worth while above the mere accumulation of facts for selfish use or enjoyment.

We still hear occasionally some corner grocery philosopher proclaim that the swimming-hole of forty years ago was deeper, the snow-storms heavier, the apples better flavored and the schools better taught than those of today. What-

ever may be true of the swimming-holes, the snowstorms and the apples, we know from absolute documentary evidence that the average pupil of today does better work in the three R's, knows more of the history of his own and other countries and is much more widely read than the average pupil of the old district school. Still the total results are far from satisfactory and the efforts for improvement must be unceasing.

Our own special needs in addition to those mentioned above, are, as often urged in previous reports,

Reduction of the number of grades and pupils
to a teacher ;

Systematic compulsory hand training through-
out the grades ;

The offering of such inducements as will result
in retaining capable teachers for a term of
years.

Though we do everything else and leave the last undone we can never get the best results. The capable teacher, who remains open-minded to the last and willing to put into practice the latest best thoughts of her profession, grows in value to the community as her term of service lengthens and does incomparably more solid and enduring good than the transient teacher, however brilliant the latter's work may seem. So vital is this to the success of rural schools, to giving country boys and girls the equal opportunities, the 'square deal' which democracy demands, that it has been seriously proposed that the state so contribute to the salaries of rural school teachers as to make them equal or superior to those of city teachers, that it require that rural teachers have special training for their work, and that it shall compel rural towns to furnish school facilities of the first class.

In the final analysis, after all, as is the teacher so is the school, and as is the school, so shall the community be.

Respectfully submitted,

G. H. GALGER.

REPORT OF THE PRINCIPAL OF THE BARNSTABLE HIGH SCHOOL

G. H. Galger, Superintendent of Schools:

Dear Sir:—

I hereby submit to you my report as Principal of the Barnstable High school:

In looking back over the work of the past year, the feature of school life which impresses me most is the growing appreciation among parents and pupils of what the public schools have to offer. This is decidedly noticeable in the ever increasing number of those pupils, who, failing to do satisfactory work for the year, have returned with a renewed interest in their studies and a determination to overcome the difficulties which before they tried to avoid. These pupils are given every opportunity to redeem themselves and the teachers make especial effort to aid and encourage such in every possible way. On the other hand, any boy or girl showing exceptional ability is given the chance to participate in the work of the next higher class, and thus complete his course in less than the allotted time.

SCIENCE

In the study of elementary forestry the school grounds have afforded an opportunity for demonstrating the value of clearing the underbrush from a grove of pine, and later of thinning the pines to the proper distances. The two groves that have been cleared in this way by the first-year boys show a striking contrast to the other groves still in the wild condition.

Other forestry topics studied at first hand are wind-breaks, fire prevention and control, identification of common trees and shrubs, and poisonous plants.

Certain "projects" are being tried out this winter in accordance with the recommendation of the State Board of Education.

In the Junior class more attention is being given to the household applications of Chemistry, as made in the study of water analysis, food analysis, fermentation, and the uses of coal tar products in foods and medicines.

ENGLISH

As at present outlined, the work in English is as follows:

The first year is devoted to getting the class ready for the actual literary and composition work of the remaining three years. A necessary review of the simplest principles in grammar is given, with forty lessons in spelling. The pupil gains an elementary knowledge of how to express himself; to tell a story, to describe what appeals to the eye, what forms a picture, to give a clear explanation or direction.

Letter-writing is introduced early in the year, with frequent reviews, as opportunity occurs, in conjunction with the reading matter. Reading is of the story form, narrative, principally, the greatest stress during the first year being laid on how the author makes his work interesting.

The second year is given to advanced grammar drill, closely correlated with the structure of the sentence from the rhetorical view-point. In reading, especial attention is paid to the plot of the story, the nature of the description, and the style of the work as a whole. The development of the essay in its paragraph type forms the basis of the year's work in writing.

The third year reviews the principles acquired in the first two. Owing to the limited time given to the study of English up to two years ago, much of the work that should have been done in the first and second years is crowded at

present into the third and even into the fourth, necessarily crippling the advanced work of these years.

It is hoped that soon the first half of the junior year may be devoted to the study of American authors, with a history of American literature, thus leaving the last half of the year open to the larger field offered by the English authors.

The fourth year is devoted to a review of the principles of the first three years. At present, owing to the same difficulties as are encountered in the third year, the class is hindered in its attempt to do the work it should be doing in composition. In this year, more intensive work is attempted. Character study is dwelt upon in connection with plot study. Considerable reading is done from the works of the English writers, and some time is given to the history of English literature.

The works studied are representative of the four different classes of discourse: the essay, the drama, the oration and the poem.

MODERN LANGUAGE

In pursuance of the policy to confine ourselves to the teaching of one modern language, German was included this year in the list of first-year studies, thus making the course in German extend through four years.

REPORT OF COMMERCIAL TEACHER

It is no doubt quite generally understood that the purpose of the usual High school business course is not merely to make of its members good office assistants, but furthermore to give such training as will aid them in earning promotion to the more responsible positions of business life and to fit them foundationally for intelligent and useful citizen-

ship. In any case, however, the accomplishment of this object must of necessity depend largely upon the initial equipment of the entering student, his belief in himself, his attitude toward school life, and upon the size of the teaching force of his school with reference to the courses offered by it. Nevertheless, if it is true that, "Circumstances, however unfavorable they may seem, are always opportunities; not limitations," then we should not waste time in deploring conditions as they may exist, but should be glad in the belief that although at present they may not seem to be ideal, they are in process of becoming so. "The measure of a man's soul," says Mabie, "is his ability to disregard the hindrances and to concentrate his energy on the achievement."

There is pleasure in being able to report that this year, as last, it has been found possible to offer the second-year pupils a three-period course in penmanship. According to a plan followed in the Washington Irving High school and others, simple breathing and relaxing exercises have been given at the beginning of each recitation to facilitate the acquirement of such free and harmonious interchange of activity between mind and body as is necessary in developing the desired ease of movement and correctness of form. Several members of the first and third-year classes have been allowed to take this course as extra work, and more would like to do so if the present arrangement of program would permit.

It is hoped that ultimately the time given to this study may be extended, results so far obtained being convincing proof of the fact that the course, brief though it is, in a measure satisfies a real need. However, in accordance with the compensational law that that which one gets is proportionate to what one gives, it is true that in penmanship, as in any other task, the intense desire of a student for personal and class progress and accomplishment, with its resultant con-

centrative and diffusive power, is the strong factor in successful attainment.

It is gratifying to note among the upper classmen of this department a growing consciousness of personal responsibility for themselves and others. Almost without exception these students are applying themselves earnestly and well. Whenever opportunity and time permit, many of the juniors are doing extra work in typewriting. Both classes have found the new keyboard shields valuable aids in resisting a natural inclination to look at the keys.

To their work in other commercial subjects, as well as to typewriting, the seniors bring a happy desire to think things out for themselves, supplemented by a cheerful readiness of response to suggestion or direction, and an optimistically philosophic spirit generally that is most helpful.

Partly because of these characteristics, and partly because of the extra period in stenography we were able to put in last year, these pupils have been qualified to do more original work in shorthand than have their predecessors. Besides the daily speed practice on letters, they have read several books in shorthand and have taken to dictation much new literary matter, thoughtfully chosen for its variety of subject and excellent English. These notes have been carefully corrected by comparison with those in the best of shorthand, read back, and finally transcribed on the machines. Aside from the mechanical practice afforded by this transcriptive work, it is obviously useful in bringing to the student a realizing sense of his own limitations in spelling and English, and hence the need for faithful effort in these subjects.

Thus, as the point just given suggests, it has been our endeavor throughout the entire business course to make the work such as will aid in developing judgment, initiative, and an active, sympathetic interchange of service, believing as we do, that, "Whatever we have we have through the aid of others; all that we have we have for the aid of others,"

and that, "Co-operation in production, and sharing in use and enjoyment are the twin secrets of rightly adjusted, harmonious living."

LUELLA ROSE LYON

GIFTS

A steel engraving of Benjamin Franklin was presented to the school by Judge C. C. Paine, as was also a colored photograph of Lake Geneva by Mr. James Otis, both of which have been placed upon the walls of the assembly room.

In June, a check for \$7.79, representing profits from the eighth grade garden of the Hyannis Training school was received from Treasurer Walter B. Pollock, as a contribution to the Athletic Field Fund.

MEMORIAL EXERCISES

On the afternoon of May 29, appropriate exercises were held at which there were present representatives of each of the two G. A. R. Posts, the Woman's Relief Corps and other friends of the school. Similar exercises will be held on May 29 of the present year which all who are interested in the school are invited to attend.

Knowing that our young people are influenced more easily by example than by precept, and believing that the most good can be accomplished by men acquainted with local conditions, I am making an effort to bring before the school speakers prominent in state and county affairs. Already several such have signified their readiness to aid me in this matter. In the successful carrying out of this plan I shall be most grateful for any assistance which may be rendered me by those interested in the welfare of the school.

Respectfully submitted,

LOUIS M. BOODY

REPORT OF THE SUPERVISOR OF DRAWING

Mr. George H. Galger,

Dear Sir:—

The past year's work in drawing has been along lines stated in previous reports and the results are, in the main, satisfactory. The prevalence of scarlet fever, measles, and diphtheria in several of the villages caused unavoidable interruptions and consequent loss. The resignations of teachers during the school year also complicated our problems and retarded the progress of many pupils.

Mr. Smith and Miss Fuller of Cotuit Grammar school have combined forces in manual work this year, as they did last. Good work has been done by the boys in their simply equipped shop, while the girls in the same periods have been taught plain sewing.

At Santuit at Christmas, creditable needle work was done by all the older girls under Miss Warner's efficient direction.

Barnstable village Grammar was the first of our Grammar schools to undertake wood-work, and it was taught with profit, in spite of many drawbacks, in one corner of the old "up-stairs" school-room. Now the unfinished room in the remodeled building gives ample space for bench work.

Additional tools have been obtained through the efforts of the Principal, aided by a generous friend of this school.

We are now prepared to do here all the work that time limitations permit in a Grammar school of three grades. Much credit is due to the Principal, Mr. Hopkins, who has worked earnestly for more than three years to bring about these conditions. Sewing, commenced along with the wood-work by efficient assistants in the old room, is now regularly taught as at Cotuit, by the Intermediate teacher, to the girls of the upper rooms. Articles made in this class

were exhibited at the county fair and received high commendation.

There is much encouragement in the quality of the drawings we are now obtaining from many of the ninth grade pupils. It is always difficult to do justice to these capable pupils when we must bring on at the same time all of the seventh and eighth grade children, and sometimes even those of the fifth and sixth grades. We are determined that the ninth grade boys shall not leave school without some knowledge of the fundamental principles of working drawings, and the ability to read a simple working drawing or blue-print.

The record now being made by one pupil who went from the Barnstable High school to an Art school last September shows what this High school can do for an earnest, capable pupil.

One of the best things to be said of drawing in this High school today, is the fact that thirteen juniors from a class of seventeen are taking drawing as an elective, and are doing the best average work ever done in B. H. S. by juniors.

The James Otis prizes in drawing were awarded as follows:

Senior:—Drawing, Grace Bursley. Art Note Book, Frances V. Maher.

Junior:—Freehand Drawing, Ellen Bursley.

Second Year:—Freehand, Claribel B. Soule. Mechanical, Russell G. Starek.

First Year:—Freehand, Lymena T. Baxter. Mechanical, Frederic H. Smith.

The Elizabeth Lowell school has lost by removal, some of its best pupils, whose work was an inspiration to us in all lines of endeavor. The small classes permit more personal instruction, and should enable us to beat the records made when there was a larger enrolment. Prizes were given in this school last year, because we are determined that as far

as possible no stimulus offered at the Barnstable High school shall be missing at Cotuit.

The following characterization of drawing has recently come to hand from a report of a National Convention of French Drawing Teachers, recently held at Rouen. "Drawing is the greatest factor in the Manual Training of our Youth, on whom the prosperity of the nation depends." To this I add this testimony of Mr. Henry Turner Bailey in a December Magazine:

"Whatever the results in drawing may have been, they have never satisfied us. We want to see better results every year We know, in our heart of hearts, we ought to teach drawing so that our pupils can draw. We may begin with color or with design. We may 'stress' culture epochs or stage trappings, but sooner or later our old enemy turns up smiling. We are confronted with the problem of teaching drawing, just ordinary, old-fashioned, hard headed, sure handed DRAWING."

Respectfully submitted,

Feb. 7, 1914

G. H. GALGER,

Secretary School Committee.

December 31, 1913.

REPORT OF THE SUPERVISOR OF MUSIC

Mr. G. H. Galger, Superintendent of Schools :

Dear Sir :—

Many interested in having our country become a musical nation are taking as one of their mottoes, "I hear America Singing." Our motto is, "I hear the children of Barnstable singing."

That we may bring more music into the home life of our pupils, both foreign and native born, and thus lead them to a better knowledge of our heritage of song, we are using in the schools melodies every American child is supposed to know. Our object, we think, is being attained, as nearly three hundred books, each containing one hundred of these favorites, have been eagerly purchased by our young people.

The plan being used in our daily lessons is the same as that outlined in the report made last year. In connection with the regular work a little practice in composition is given. Last June two of the pupils in the Centerville grammar school wrote the words and music for their class song. We trust there may be several original class songs this June. We ask the children in the lower grades to teach their favorite songs to the younger brothers and sisters. As a result of this home work progress has been made with less effort than last year. Most of those in the second grade who, a year ago, could not sing a melody correctly, are able to do so now. It is interesting to see the enthusiasm with which these little people render their songs, especially the old carols sung this year in many cities around the municipal Christmas trees.

Realizing that appreciation of good music is of more value than the ability to read it—important as that is—we desire that the pupils throughout the grades shall enjoy the music lessons; even the boys who are apt to lose confidence while their voices are deepening. Such pupils are encouraged to learn all they can of the subject matter and to continue to sing. We also suggest that they learn to play an instrument. A well-known supervisor of music says that nothing is more valuable to a boy than the ability to play some one of the single-voiced instruments, as these furnish a satisfactory medium of emotional expression. We judge that many agree with this statement, for, in most of the cities of the British Isles, the school authorities offer a violin, at the factory price, to each child desiring to learn to play this instrument. Teachers are also provided for the classes formed. Similar work is being successfully carried on this year in six of the public schools of Boston.

The extent to which this plan, originating in a small English town, has been adopted indicates that there is developing, both here and abroad, a fuller realization of what a course in music may mean to the home, the school and to the community.

Cordially acknowledging the valuable assistance given by my fellow-teachers this report is

Respectfully submitted,

SYLEND A. B. MORRIS

BOARD OF EDUCATION

The School Board consists of three members, one of whom is chosen annually. The Statutes of the State define the powers and duties.

REGULAR MEETINGS

The regular meetings of the Board occur monthly.

SPECIAL MEETINGS

Special meetings of the Board may be called by majority of the Board, or by the chairman.

OFFICERS OF THE BOARD

The officers of the Board shall consist of a Chairman, a Secretary, and such other officers and special committees as may be necessary.

These officers shall be chosen at the first annual meeting each year.

THE CHAIRMAN OF THE BOARD

shall preside at the meetings of the Board, and perform such other duties as usually pertain to that office.

In the absence of the Chairman his powers and duties shall devolve upon a chairman pro tem.

DUTIES OF THE SECRETARY

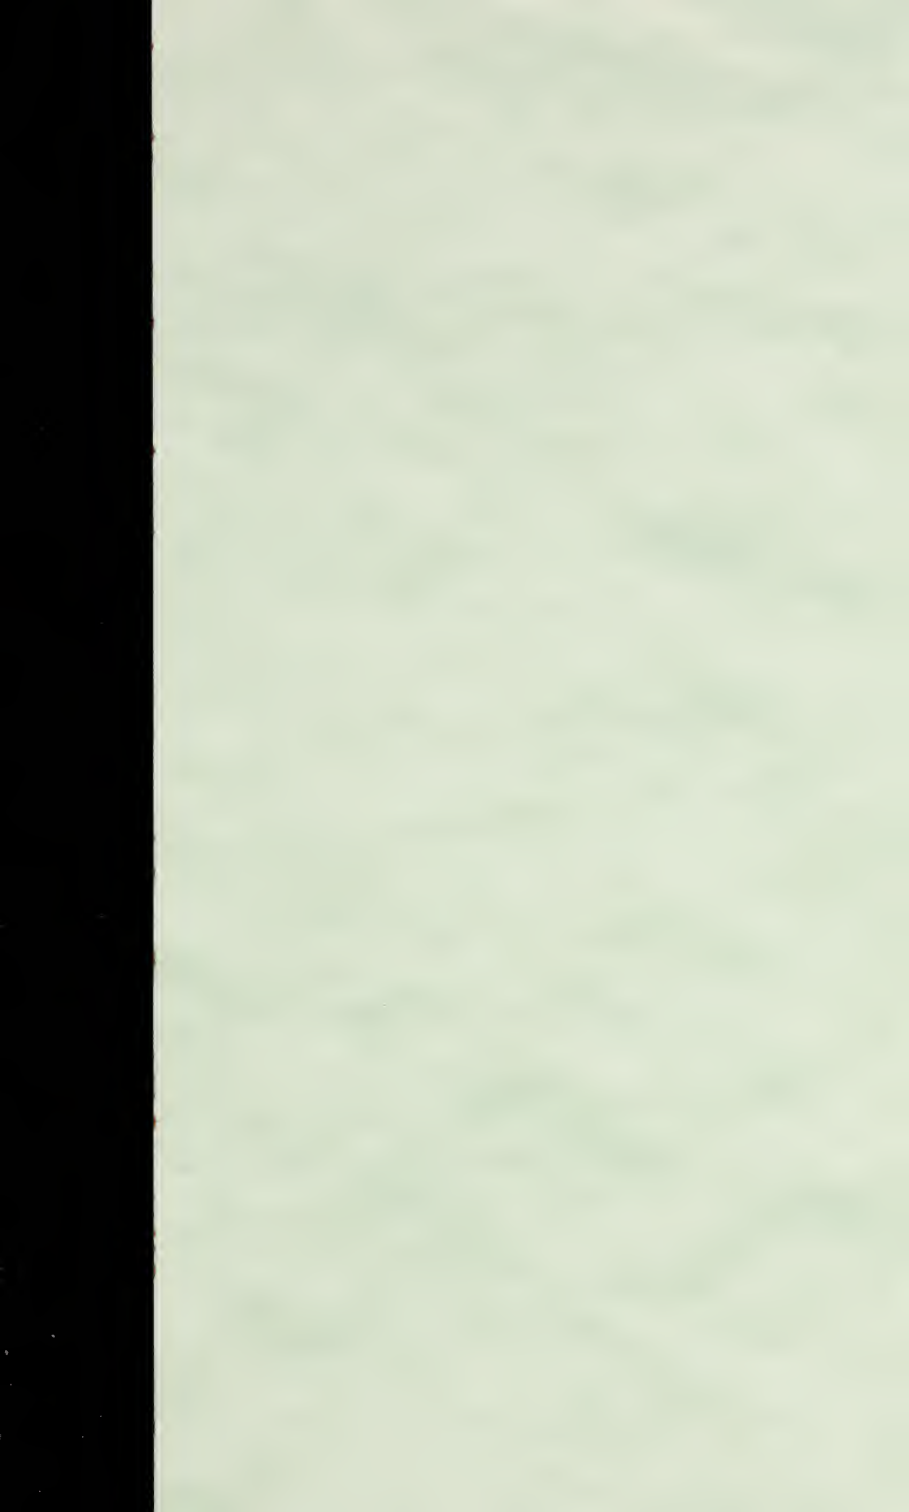

He shall act as scribe at all meetings of the Board and shall keep suitable records of all their proceedings. He shall prepare a statement of all debts, moneys raised by the Town, or received from other sources, paid by the order of the Board, and furnish the Superintendent with the same for publication in his annual report, and together with the Superintendent constitute the Examining Committee.

ORDER OF BUSINESS

The usual order of business of the Board shall be as follows:

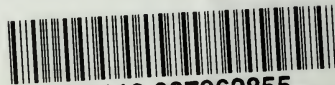

1. Reading the records of the previous meeting; or the call, if a special meeting, and the records.
2. Reports of Committees.
3. Unfinished business.
4. Report of Superintendent.
5. Report of Secretary.
6. Other business.

[Approved by the School Committee December 23, 1893, and December 19, 1908.]
